A Study of Decision Makers

Global Media Ethics and the Digital Revolution

In this study of busy, complex Regional City -- and it is a real city -- the author has analyzed the power structure from top to bottom. He has searched out the men of power and, under fictitious names, has described them as they initiate policies in their offices, their homes, their clubs. They form a small, stable group at the top of the social structure. Their decision-making activities are not known to the public, but they are responsible for whatever is done, or not done, in their community. Beneath this top policy group is a clearly marked social stratification, through which decisions sift down to the substructures chosen to put them into effect. The dynamic relations within the power structure are made clear in charts, but the real interest lies in the author's report of what people themselves say. The African American community is also studied, with its own power structure and its own complicated relations with the large community. The method of study is fully described in an Appendix. The book should be of particular value to sociologists, political scientists, city-planning executives, Community Council members, social workers, teachers, and research workers in related fields. As a vigorous and readable presentation of facts, it should appeal to the reader who would like to know how his/her own community is run. Community Power Structure is not an expose. It is a description and discussion of a social phenomenon as it occurred. It is based on sound field research, including personal observation and interviews by the author.

This volume responds to the challenges posed by the rapid developments in satellite TV and digital technologies, addressing media ethics from a global perspective to discuss how we can understand journalism practice in its cultural contexts. An international team of contributors draw upon global and non-Western traditions to discuss the philosophical origins of ethics and the tension that exists between media institutions, the media market and political/ideological influencers. The chapters then unveil the discrepancies among international journalists in abiding by the ethics of the profession and the extent to which media ethics are understood and applied in their local context/environment. Arguing that the legitimacy of ethics comes not from the definition per se, but from the extent to which it leads to social good, the book posits this should be the media's raison d'être to abide by globally accepted ethical norms in order to serve the common good.

Taking a truly global approach to the question of media ethics, this volume will be an important resource for scholars and students of journalism, communication studies, media studies, sociology, politics and cultural studies.
