

## The Microsoft Expression Web Developers Guide To AspNet 35 Learn To Create AspNet Applications Using Visual Web Developer 2008

Microsoft's Expression Suite promises new levels of power in creating rich dynamic user experiences on the web, and Expression Web Designer is but one program within that suite. This is one of the first books available on the subject. The author starts with the very basics, and then takes the reader up to advanced level through a series of practical real world exercises. Although no knowledge is assumed, the book is carefully written to not be patronizing, and be of use to more advanced web developers and designers wishing to make use of the software, as well as complete beginners.

You can easily create a professionally-looking website with nothing more than an ordinary computer and some raw ambition. Want to build a blog, sell products, create forums, or promote an event? No problem! This friendly, jargon-free book gives you the techniques, tools, and advice you need to build a site and get it up on the Web. The important stuff you need to know: Master the basics. Learn HTML5, the language of the Web. Design good-looking pages. Use styles to build polished layouts. Get it online. Find a reliable web host and pick a good web address. Use time-saving tools. Learn free tools for creating web pages and tracking your visitors. Attract visitors. Make sure people can find your site through popular search engines like Google. Build a community. Encourage repeat visits with social media. Bring in the cash. Host Google ads, sell Amazon's wares, or push your own products that people can buy via PayPal. Add pizzazz: Include audio, video, interactive menus, and a pinch of JavaScript.

Learn how to build a professional standards-based website with Microsoft Expression Web 4 and the latest web technologies More than six hours of comprehensive video training, broken into 26 individual lessons. Expression Web has become the product of choice for casual web designers. Expression Web has become the product of choice for casual web designers. Covers all the new features of version 4 thoroughly, including HTML5. Perfect both for those new to Expression Web, as well as those upgrading to version 4. Expression Web 4 is an easy to use yet powerful web design and development tool for beginners as well as seasoned professionals. It stands apart from the competition in that it produces code that complies with web standards and supports the two most common server-side scripting languages (ASP.NET and PHP) as well as HTML, CSS, and JavaScript. Microsoft Expression Web 4 LiveLessons will be a hands-on tutorial taking the viewer from a hand drawing of a web site all the way to a fully functional one. Interspersed in the tutorial will be discussions on best practices, explanations of why things work the way they do, tips and tricks of the trade and a roadmap of how to get from point a to point z in the shortest possible time without sacrificing quality. As far as we are aware, there are no competing video titles on this topic. Furthermore, the approach of this video series is different from others in that it sets out to not only teach the fundamentals of the application itself but also web design in general, as well as producing a completed website ready for publication.

This book has one primary goal: to get you working in Expression Blend 4 effectively using the features and functionality of the tool. This book is not about XAML, not about code nor explicit work flows. It is about simply dragging, dropping, drawing, and defining the experience and vision for a user interface and rich interactive experience. You will learn how to work with the core features of Blend, edit Styles and Templates, and more importantly, understand what they all mean. You will also work in detail with Parts, States, and Behaviors to understand how collectively they can provide your solutions advanced functionality without the need for code or hand-cranked XAML. Animations and Storyboards will allow you to bring life to your vision, as will working with data efficiently and learning how to create and manage Resources. In short, this book will give you the answers to many questions asked in forums by new and experienced users alike. Microsoft Expression Blend 4 Unleashed is a stunning, full-color resource with hundreds of screenshots and informative figure references. It has also been authored sequentially, to enable you to build your knowledge step-by-step and gain confidence through repetition and fearlessness in discovery. Detailed information on how to... Create, edit, and work effectively with Styles and Templates Master Parts, States, and Behaviors to enable XAML and code free functionality Use Blend's Animation and Storyboard workflows to bring life to your solutions Create and manage Resource Dictionaries, Skins, and Themes Create simple and Sams Teach Yourself Microsoft Expression Web 4 in 24 Hours

Microsoft Expression Web: Visual Quickstart Guide  
Beginning Expression Web

With the release of Expression Web 4, Microsoft moved to a new add-in model that allows for the development using HTML and JavaScript. This enables web designers to use existing skills to develop add-ins and extend the functionality of Expression Web. This book serves as a focused guide to creating add-ins in Expression Web 4. It will walk you through the development and testing of a full-featured add-in for Expression Web 4. If you use Expression Web 4 and want to extend the functionality of the product, either for your own design needs or because you want to market add-ins to other Expression. In just 24 sessions of one hour or less, you'll learn how to build flexible, easy-to-maintain, standards-based websites with Microsoft Expression Web 2. Using this book's straightforward, step-by-step approach, you'll master the entire process—from concept and design through delivery! Each lesson builds on what you've already learned, giving you a strong real-world foundation for success, no matter what kind of site you're building! Step-by-step instructions carefully walk you through the most common Expression Web 2 tasks. Quizzes and Exercises at the end of each chapter help you test your knowledge. By the Way notes present interesting information related to the discussion. Did You Know? tips offer advice or show you easier ways to perform tasks. Watch Out! cautions alert you to possible problems and give you advice on how to avoid them Learn how to... · Build your first Expression website in just five minutes! · Import text from Microsoft Word and other software · Make the most of Expression Web 2's advanced image-editing features · Create hyperlinks that simplify navigation, perform actions, and send commands · Write error-free code quickly and easily with Code View and IntelliSense · Use CSS to control your site's appearance, create standards-based, cross-browser content, and simplify redesigns · Design site layouts that communicate more effectively · Use Dynamic Web Templates to consistently format (or reformat) hundreds of pages · Implement state-of-the-art interactivity with Behaviors · Add Silverlight, Flash, and other multimedia content · Build a web-based email form with FrontPage Server Extensions and PHP · Integrate web application code written in ASP.NET or PHP Morten Rand-Hendriksen is a web designer, developer, programmer, and digital media expert based in Burnaby, B.C., Canada. He has operated Pink and Yellow Media since 2002, creating web and design solutions for small businesses and individuals. For his work with Expression Web, he was invited as a Canadian VIP to the MIX08 conference in Las Vegas and asked to present on Building Compelling Websites on the Microsoft Platform at Microsoft's Innovation Briefing. He blogs on Expression Web at http://blog.pinkandyellow.com/. Category: Web Development Covers: Microsoft Expression Web 2 User Level: Beginning-Intermediate

Web Programming with HTML5, CSS, and JavaScript is written for the undergraduate, client-side web programming course. It covers the three client-side technologies (HTML5, CSS, and JavaScript) in depth, with no dependence on server-side technologies.

Provides information and examples on using CSS to format Web pages, covering such topics as Web typography, links, navigation, page layouts, and Web site design.

The Expression Web Developer's Guide to ASP.NET 3.5

The smart way to learn Microsoft Expression Web 4 -- one step at a time! Experience learning made easy -- and quickly teach yourself how to create dynamic, standards-based Web sites. With Step by Step, you set the pace -- building and practicing the skills you need, just when you need them! Build your site with customizable templates -- or create your own Adjust settings in Expression Web 4 to create different sites Add Photoshop files, Microsoft Silverlight video, and .wmv files Use CSS, HTML, and XHTML to manage site style and accessibility Connect to servers using Microsoft ASP.NET and PHP Choose the right publishing method for your scenario Your Step by Step digital content includes: All the books practice files -- ready to download and put to work. Fully searchable online edition of this book -- with unlimited access on the Web. Video tutorials illustrating important procedures and concepts Offers instructions on building standards-based Web sites with Microsoft Express Web 4, covering such topics as adding images and graphics, using hyperlinks, working in Code View, creating buttons with CSS, building a functional menu, and working with Flash. Get a jump start on using this brand-new Web creation tool from Microsoft. Built from the ground up using current Web standards, Expression Web make it easy to create pages that look good in all browsers. Mirroring the program's focus on standards, the book shows you how to use Cascading Style Sheets to build consistent, easy to navigate designs. CSS newcomers will welcome the plain-spoken approach to a sometimes intimidating topic. Old hands at CSS will find plenty of tips on using Expression Web's many style tools, which are some of the best available in any Web creation program. Packed with more than 600 screenshots, the book goes beyond creating good-looking single pages. Instead, it shows you how to use templates to generate whole sites with uniform, yet creative, layouts that can be reconfigured with the click of a button. You'll also learn how to give sites extra polish with interactive behaviors and forms. Microsoft Expression Web: Visual Quickstart Guide contains exactly what you need to get started building standards-compliant Web sites using this powerful tool.

With the release of Expression Web 4, Microsoft moved to a new add-in model that allows for the development using HTML and JavaScript. This enables web designers to use existing skills to develop add-ins and extend the functionality of Expression Web. This book serves as a focused guide to creating add-ins in Expression Web 4. It will walk you through the development and testing of a full-featured add-in for Expression Web 4. If you use Expression Web 4 and want to extend the functionality of the product, either for your own design needs or because you want to market add-ins to other Expression Web users, then Creating Microsoft Expression Web 4 Add-Ins is perfect for you! /TD/TR/BDY/TABLE

**The Web Development Glossary is probably the largest of its kind. With more than 2,000 terms and explanations it's acquaints and reunites you with the major standards and concepts of the Web, with HTML, CSS, JavaScript, accessibility, security, performance, code quality, internationalization, localization, editors and tooling and more. The glossary then goes beyond web development, touching on computer science, design, typography, usability and user experience, information as well as project management, other disciplines of interest and relevance to the modern developer. It goes beyond, inspiring the curiosity to learn more about the Web and the people creating and using it. And still it is a glossary, of a couple of thousand terms for developers, leaning on (and giving back to) Wikipedia and the MDN Web Docs. 2 This is the book if you choose to extend and validate your web and software development knowledge.**

**This is the Safari online edition of the printed book. Microsoft Expression Web offers a powerful array of visual tools for creating great looking sites while fully supporting Web-based standards. Expression Web makes it easy for designers to quickly design cool sites with tools that feel familiar. Thanks to Expression Web's underlying standards, the files can then be passed to developers who can code the site in the development tools they prefer. This back and forth without designers having to touch the code unless they want to makes this a powerful program. In Expression Web 2, Microsoft has added support for PHP backed sites and made it easy to work with PHP. Other new features include: Silverlight support and new editing capabilities for Flash SWF and Windows Media files. In addition Expression Web 2 now provides ASP.NET AJAX server controls that enable users to quickly create web pages that include a rich user experience with responsive and familiar user interface (UI) elements.**
