In the twenty-first century there are two ways to study logic. The more recent approach is symbolic logic. The history of teaching logic since World War II, however, casts doubt on the idea that symbolic logic is best for a first logic course. Logic as a Liberal Art is designed as part of a minority approach, teaching logic in the "verbal" way, in the student's "natural" language, the approach invented by Aristotle. On utilitarian grounds alone, this "verbal" approach is superior for a first course in logic, for the

whole range of students. For millennia, this "verbal" approach to logic was taught in conjunction with grammar and rhetoric, christened the trivium. The decline in teaching grammar and rhetoric in American secondary schools has led Dr. Rollen Edward Houser to develop this book. The first part treats grammar, rhetoric, and the essential nature of logic. Those teachers who look down upon rhetoric are free, of course, to skip those lessons. The treatment of logic itself follows Aristotle's division of the three acts of the mind (Prior Analytics 1.1). Formal logic is then taken up in Aristotle's order, with Parts on the logic of Terms, Propositions, and Arguments. The emphasis in *Logic as a Liberal Art* is on learning logic through doing

problems. Consequently, there are more problems in each lesson than would be found, for example, in many textbooks. In addition, a special effort has been made to have easy, medium, and difficult problems in each Problem Set. In this way the problem sets are designed to offer a challenge to all students, from those most in need of a log course to the very best students.

One of the fundamental works of Western political thought, Aristotle's masterwork is the first systematic treatise on the science of politics. For almost three decades Carnes Lord's justly acclaimed translation has served as

the standard English edition. Widely regarded as the most faithful to both the original Greek and Aristotle's distinctive style, it is also written in clear, contemporary English. This new edition of the Politics retains and adds to Lord's already extensive notes, clarifying the flow of Aristotle's argument and identifying literary and historical references. A glossary defines key terms in Aristotle's philosophical-political vocabulary. Lord has made revisions to problematic passages throughout the translation in order to enhance both its accuracy and its readability. He has also substantially revised his introduction for the new edition, presenting an account of Aristotle's life in relation to political events of his time; the

character and history of his writings and of the Politics in particular; his overall conception of political science; and his impact on subsequent political thought from antiquity to the present. Further enhancing this new edition is an up-to-date selected bibliography.

This book is a microhistory of eleventh-century Byzantium, built around the biography of the state official Michael Attaleiates. Dimitris Krallis presents Byzantium as a cohesive, ever-evolving, dynamic, Roman political community, built on traditions of Roman governance and Hellenic culture. In the eleventh century, Byzantium faced a crisis as it navigated a shifting international environment of feudal polities, merchant republics, steppe migrations, and a rapidly transforming Islamic world. Attaleiates' life, from provincial birth to

Constantinopolitan death, and career, as a member of an ancient empire's officialdom, raise questions of identity, family, education, governance, elite culture, Romanness, Hellenism, science and skepticism, as well as political ideology during this period. The life and work of Attaleiates is used as a prism through which to examine important questions about a long-lived medieval polity that is usually studied as exotic and distinct from both the European and the Near Eastern historical experience. God wants His people to prosper financially.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Marvels and Miracles is one of the last works written by Maria Woodworth-Etter in her long ministry as an evangelist in the Pentecostal movement. This story recounts many events during her lifetime, from holding tent revival meetings at her own expense, to persecution and violent attacks from local townspeople in attempts to silence her ministry. Contributors such as Stanley Frodsham, F.F. Bosworth, and

many others recount the miracles and healings they received through Jesus Christ. With testimonies of healing from doctors, sinners, and saints; there is an overwhelming cloud of witnesses that these miraculous events did in fact take place. This proving what she taught so adamantly, that God is the same yesterday, today, and forever, and His power to heal has not diminished. It is the same as on the day of Pentecost, in 1924, and today. The world of the resident foreigner in Classical Athens, the metic, was perilous. Emblematic of metic status was the requirement to pay a special metic tax, the metoikion. If this tax were not paid, the metic would be sold into slavery. A celebrated set of Athenian inscriptions recording dedications of silver cups, phialai, here published for the first time as a corpus, reflect this procedure. Known since the nineteenth century as the "Attic Manumissions,"

these inscriptions have been thought to be the result of a legal process by which slaves were set free. But it is shown here that they preserve traces not of the liberation of slaves, but prosecutions of metics for failure to pay the metic tax. In the context of legislation in the 330s BC to improve the lot of metics and entice more to Athens, prosecutors who did not win conviction were fined, and a tithe was paid to the god in the form of a silver cup.

This book aims to rearticulate and reinterpret a Christian concept of God's mission and evangelization in light of the universal, irregular, and transversal horizon of God's narrative as it pertains to the realities of public sphere.

Addressing the role which divination played in ancient Greek society, this volume deals with various forms of prophecy and how each was utilised and for what purpose. Chapters bring together key types of divining, such as from birds, celestial phenomena, the entrails of sacrificed animals and dreams.

Oracular centres delivered prophetic pronouncements to enquirers, but in addition, there were written collections of oracles in circulation.

Many books were available on how to interpret dreams, the birds and entrails, and divination as a religious phenomenon attracted the attention of many writers. Expert diviners were at the heart of Greek prophecy, whether these were Apollo's

priestesses delivering prose or verse answers to questions put to them by consultants, diviners known as manteis, who interpreted entrails and omens, the chresmologoi, who sang the many oracles circulating orally or in writing, or dream interpreters. Divination was utilised not only to foretell the future but also to ensure that the individual or state employing divination acted in accordance with that divinely prescribed future; it was employed by all and had a crucial role to play in what courses of action both states and individuals undertook. Specific attention is paid in this volume not only to the ancient written evidence, but to that of inscriptions and papyri, with emphasis placed on the iconography of Greek

Is secularism a positive force in the modern world? Or does it lead to fragmentation and disintegration? In Saving Leonardo, best-selling award-winning author

Nancy Pearcey (Total Truth, coauthor How Now Shall We Live?) makes a compelling case that secularism is destructive and dehumanizing. Pearcey depicts the revolutionary thinkers and artists, the ideas and events, leading step by step to the unleashing of secular worldviews that undermine human dignity and liberty. She crafts a fresh approach that exposes the real-world impact of ideas in philosophy, science, art, literature, and film--voices that surround us in the classroom, in the movie theater, and in our living rooms. A former agnostic, Pearcey offers a persuasive case for historic Christianity as a holistic and humane alternative. She

equips readers to counter the life-denying worldviews that are radically restructuring society and pervading our daily lives. Whether you are a devoted Christian, determined secularist, or don't know quite where you stand, reading Saving Leonardo will unsettle established views and topple ideological idols. Includes more than 100 art reproductions and illustrations that bring the book's themes to life. Praise for Saving Leonardo: "A feast for the mind and for the eye. Nancy Pearcey not only is a trustworthy guide for a nuanced discussion on the relationship between culture and the gospel, but she is a gifted teacher as well . . . Saving Leonardo is a rare,

precious gift to the churches and universities alike."
Makoto Fujimura, artist and author of Refractions: A Journey of Faith, Art, and Culture "Nancy Pearcey has done it again and better than ever. She has taken the complex sophistication of the best cultural analysis and laid it out for any person to grasp, enjoy and use to live out their daily lives honoring Christ. An astounding accomplishment!" James W. Sire, author of The Universe Next Door "G. K. Chesterton said 'the danger when Men stop believing in God is not that they'll believe in nothing; but that they will believe in anything.' Nancy Pearcey understands where believing in anything leads

and in this book she reveals where a secular philosophy is taking us. A balanced, fair, and impacting work!" Cal Thomas, syndicated and USA Today columnist "Nancy Pearcey helps a new generation of evangelicals to understand the worldview challenges we now face and to develop an intelligent and articulate Christian understanding . . . Saving Leonardo should be put in the hands of all those who should always be ready to give an answer--and that means all of us." R. Albert Mohler, Jr., president, The Southern Baptist Theological Seminary "Nancy Pearcey is an intellectual prophet in our day and one of Evangelicalism's foremost cultural observers.

Saving Leonardo is a tour de force. In it, Pearcey provides a penetrating analysis of the nature of contemporary secularism, a helpful exposition of how we got to the present situation, and a well-crafted strategy for changing the situation. This is her best effort yet . . . a must read." J. P. Moreland, distinguished professor of Philosophy, Biola University and author of The God Question "Nancy Pearcey is unsurpassed in the current generation of Christian thinkers . . . The magic continues with this book. Pearcey's virtues as a writer and thinker are once again fully evident in the range of material that she has mastered, the encyclopedic collection of data that

she presents, and the analytic rigor with which she separates truth from error in worldviews. She is a prophetic voice for contemporary Christians." Leland Ryken, Clyde S. Kilby professor of English, Wheaton College "Brilliant . . . The book brings complex, abstract ideas down-to-earth -- or rather, down-to-life. . . . Saving Leonardo bridges the gaps between the arts and the sciences, the theoretical and the practical. The book not only argues for the unity of Christian truth but exemplifies that unity and shows it in action." Gene Edward Veith, provost, Patrick Henry College
