2017 is the 130th anniversary of the publication of A Study in Scarlet, the first recorded adventure of Sherlock Holmes and Dr. John H. Watson. What an amazing journey it's been! In addition to the pitifully few sixty tales originally presented in the Canon, published between 1887 and 1927, there have been literally thousands of additional Holmes adventures in the form of books, short stories, radio and television episodes, movies, manuscripts, comics, and fan fiction. And yet, for those who are true friends and admirers of the Master Detective of Baker Street, where it is always 1895 (or a few decades on either side of that!) these stories are not enough. Give us more! In 2015, The MX Book of New Sherlock Holmes Stories burst upon the scene, featuring stories set within the correct time period, and written by many of today's leading Sherlockian authors from around the world. Those first three volumes were overwhelmingly received, and there were soon calls for additional collections. Since then, the popularity has only continued to grow. Two more volumes were released in 2016, and the first of two planned for 2017 - with no end in sight! The thirty-five stories in this volume – now bringing the total number of narratives and participating authors in this series to well over one-hundred! – represent some of the finest new Holmes storytelling to be found, and honor the man described by Watson as "the best and wisest … whom I have ever known." All royalties from this collection are being donated by the writers for the benefit of the preservation of Undershaw, one of the former homes of Sir Arthur Conan Doyle. Part VI: 2017 Annual features contributions by: Bob Byrne, Julie McKuras, Derrick Belanger, Robert Perret, Deanna Baran, G.C. Rosenquist, Hugh Ashton, David Timson, Shane Simmons, Stephen Wade, Mark Mower, David Friend, Nick Cardillo, Roger Riccard, S. Subramanian, Carl L. Heifetz, Geri Schear, S.F. A history of color and commerce from haute couture to automobile showrooms to interior design. When the fashion industry declares that lime green is the new black, or instructs us to "think pink!," it is not the result of a backroom deal forged by a secretive cabal of fashion journalists, designers, manufacturers, and the editor of Vogue. It is the latest development of a color revolution that has been unfolding for more than a century. In this book, the award-winning historian Regina Lee Blaszczyk traces the relationship of color and commerce, from haute couture to automobile showrooms to interior design, describing the often unrecognized role of the color profession in consumer culture. Blaszczyk examines the evolution of the color profession from 1850 to 1970, telling the stories of innovators who managed the color cornucopia that modern artificial dyes and pigments made possible. These "color stylists," "color forecasters," and "color engineers" helped corporations understand the art of illusion and the psychology of color. Blaszczyk describes the strategic burst of color that took place in the 1920s, when General Motors introduced a bright blue sedan to compete with Ford's all-black Model T and when housewares became available in a range of brilliant hues. She explains the process of color forecasting—not a conspiracy to manipulate hapless consumers but a careful reading of cultural trends and consumer taste. And she shows how color information flowed from the fashion houses of Paris to textile mills in New Jersey. Today professional colorists are part of design management teams at such global corporations as Hilton, Disney, and Toyota. The Color Revolution tells the history of how colorists help industry capture the hearts and dollars of consumers.

Parts XXXI, XXXII, and XXXIII 2022 Annual 61 New Holmes Adventures Collected in Three Companion Volumes. In 2015, the first three volumes of The MX Book of New Sherlock Holmes Stories arrived, containing over 60 stories in the true traditional Canonical manner, revisiting Holmes and Watson in those days where it is "always 1895" . . . or a few decades on either side of that. That was the largest collection of new Holmes stories ever assembled, and originally planned to be a one-time event. But

readers wanted more, and the contributors had more stories from Watson's Tin Dispatch Box, so the fun continued. Now, with the release of Parts XXXI, XXXII, and XXXIII, the series has grown to nearly 700 new Holmes adventures by over 200 contributors from around with world. Since the beginning, all contributor royalties have gone to the Undershaw school (formerly Stepping Stones) for special needs children at Undershaw, one of Sir Arthur Conan Doyle's former homes, and to date the project has raised nearly $100,000 for the school – as well as helping provide a world-wide awareness of its mission. As has become the tradition, this new collection of 61 adventures features Holmes and Watson carrying out their masterful investigations from the early days of their friendship in Baker Street to the post-War years during Holmes's retirement. Along the way they are involved in dozens of fascinating mysteries, all progressing along completely unexpected lines. Join us as we return to Baker Street and discover more authentic adventures of Sherlock Holmes, described by the estimable Dr. Watson as "the best and wisest . . . whom I have ever known." 61 new traditional Holmes adventures in three simultaneously published volumes The game is afoot! All royalties from this collection are being donated by the writers for the benefit of the preservation of Undershaw, one of the former homes of Sir Arthur Conan Doyle. 64 new traditional Holmes adventures in three simultaneously published volumes In 2018, MX Publishing presented Parts XI and XII of this acclaimed and ongoing series, Some Untold Cases. Now that theme is revisited with 64 new Sherlock Holmes adventures that explore those many tantalizing references to some of Holmes's other cases, as mentioned in The Canon. "Somewhere in the vaults of the bank of Cox and Co., at Charing Cross, there is a travel-worn and battered tin dispatch box with my name, John H. Watson, M.D., Late Indian Army, painted upon the lid. It is crammed with papers, nearly all of which are records of cases to illustrate the curious problems which Mr. Sherlock Holmes had at various times to examine . . . ." - Dr. John H. Watson So wrote Dr. Watson in "The Problem of Thor Bridge" - and ever since, Sherlockians have been seeking to know more about these tales from the legendary tin dispatch box. While Watson's original Literary Agent only edited the pitifully few sixty stories that make up the original Canon, there have since been literally thousands of traditional adventures about the true Sherlock Holmes - and yet there will never be enough! Throughout the original Holmes Canon, there were hints and teases of other intriguing cases - The Giant Rat of Sumatra . . . The Abernetty Tragedy . . . The Manor House Case. Watson mentions well over one-hundred of these, which have collectively come to be known as The Untold Cases. Now, once again MX Publishing brings us sixty-four of these adventures

in three simultaneously published volumes, with all royalties going to support the Stepping Stones School at Undershaw, one of Sir Arthur Conan Doyle's former homes. Join us as we return to Baker Street and discover more authentic adventures of Sherlock Holmes, described by the estimable Dr. Watson as "the best and wisest . . . whom I have ever known." An introduction to the field of applied ontology with examples derived particularly from biomedicine, covering theoretical components, design practices, and practical applications. In the era of "big data," science is increasingly information driven, and the potential for computers to store, manage, and integrate massive amounts of data has given rise to such new disciplinary fields as biomedical informatics. Applied ontology offers a strategy for the organization of scientific information in computer-tractable form, drawing on concepts not only from computer and information science but also from linguistics, logic, and philosophy. This book provides an introduction to the field of applied ontology that is of particular relevance to biomedicine, covering theoretical components of ontologies, best practices for ontology design, and examples of biomedical ontologies in use. After defining an ontology as a representation of the types of entities in a given domain, the book distinguishes between different kinds of ontologies and taxonomies, and shows how applied ontology draws on more traditional ideas from metaphysics. It presents the core features of the Basic Formal Ontology (BFO), now used by over one hundred ontology projects around the world, and offers examples of domain ontologies that utilize BFO. The book also describes Web Ontology Language (OWL), a common framework for Semantic Web technologies. Throughout, the book provides concrete recommendations for the design and construction of domain ontologies.

A stimulating, eclectic accountof new media that finds its origins in old media, particularly the cinema. In this book Lev Manovich offers the first systematic and rigorous theory of new media. He places new media within the histories of visual and media cultures of the last few centuries. He discusses new media's reliance on conventions of old media, such as the rectangular frame and mobile camera, and shows how new media works create the illusion of reality, address the viewer, and represent space. He also analyzes categories and forms unique to new media, such as interface and database. Manovich uses concepts from film theory, art history, literary theory, and computer science and also develops new theoretical constructs, such as cultural interface, spatial montage, and cinegratography. The theory and history of cinema play a particularly important role in the book. Among other topics, Manovich discusses parallels between the histories of cinema and of new media, digital cinema, screen and montage in cinema and in new media, and historical ties between avant-garde film and new media. In 1881, a weary doctor – wounded while serving in the military in Afghanistan – returned to London, only to be introduced to a most unusual young man who was already making a name for himself as the world's first consulting detective. Notes about successes and failures, joys and sorrows, things that made me marvel, and things that made me laugh out loud. How to be fair. How to have less stress. How to have

fun. How to hurt people less. How to get hurt less. How to be a good man. How to have meaning in life. How to be more me. Recently, I worked up the courage to sit down with those diaries. I found stories I experienced, lessons I learned and forgot, poems, prayers, prescriptions, beliefs about what matters, some great photographs, and a whole bunch of bumper stickers. I found a reliable theme, an approach to living that gave me more satisfaction, at the time, and still: If you know how, and when, to deal with life's challenges—how to get relative with the inevitable—you can enjoy a state of success I call "catching greenlights." So I took a one-way ticket to the desert and wrote this book: an album, a record, a story of my life so far. This is fifty years of my sights and seens, felts and figured-outs, cools and shamefuls. It's a love letter. To life. It's also a guide to catching more greenlights—and to realizing that the yellows and reds eventually turn green too. Good luck.

presented in two companion volumes – more Holmes than could fit into one book! In 2015, The MX Book of New Sherlock Holmes Stories was first published, a
huge three-book set featuring over sixty new traditional Holmes exploits, all set within the correct time period. Soon, the demand for even more traditional Holmes
adventures led to further volumes. The next year brought Part IV: 2016 Annual, and then Part V: Christmas Adventures. In spring 2017 there was Part VI: 2017

Parts IX and X: 2018 Annual (1879-1895) and (1896-1916). There can be no argument that Sherlock Holmes is one of the most famous and recognizable
figures in the world. There were only sixty narratives brought to us by the original Literary Agent, Sir Arthur Conan Doyle. Clearly that is not enough. Watson
once wrote that he kept his unpublished cases in his old Tin Dispatch Box. Now, with the publication of these latest volumes, that box has again been explored by
some of today's best Sherlockian writers, all of whom are donating their royalties from these anthologies toward the restoration of Undershaw, one of Sir Arthur
Conan Doyle's houses, and the location where The Hound of the Baskervilles and many later Holmes stories were completed. Climb the seventeen steps to the
sitting room at 221b Baker Street. Sherlock Holmes and Doctor Watson are waiting.... The game is afoot!*

Watson, M.D., Late Indian Army, painted upon the lid. It is crammed with papers, nearly all of which are records of cases to illustrate the curious problems which Mr. Sherlock Holmes had at various times to examine . . . ." – Dr. John H. Watson So wrote Dr. Watson in "The Problem of Thor Bridge" – and ever since, Sherlockians have been bringing us new adventures from this legendary tin dispatch box. While Watson's original First Literary Agent only edited the pitifully few sixty stories that make up the original Canon, there have since been literally thousands of traditional adventures about the true Sherlock Holmes – and there will never be enough! In 2015, The MX Book of New Sherlock Holmes Stories burst upon the scene, featuring adventures set within the correct time period, and written by many of today's leading Sherlockian authors from around the world. Those first three volumes were overwhelmingly received, and there were soon calls for additional collections. Since then, their popularity has only continued to grow. In Fall 2016, the series presented its first "themed" collection – Part V: Christmas Adventures – containing 30 new adventures that proved to be extremely and enduringly popular. With that in mind, we now revisit that season, with 57 more Christmas Adventures, ranging from a consequential case that occurred when Holmes was still a teenager, to another in the late 1920's when Holmes – in retirement – was still at the top of his game. The fifty-seven stories in these three companion volumes are a thrilling mix of mysteries, whatever the season. Some are directly involved with Christmas, while others occur during and in around that season. These

represent some of the finest new Holmesian storytelling to be found by the best pasticheurs, and once again they honor the man described by Watson as "the best and wisest . . . whom I have ever known." 57 new traditional Holmes adventures in three simultaneously published volumes The game is afoot! A new way of thinking about data science and data ethics that is informed by the ideas of intersectional feminism. Today, data science is a form of power. It has been used to expose injustice, improve health outcomes, and topple governments. But it has also been used to discriminate, police, and surveil. This potential for good, on the one hand, and harm, on the other, makes it essential to ask: Data science by whom? Data science for whom? Data science with whose interests in mind? The narratives around big data and data science are overwhelmingly white, male, and techno-heroic. In Data Feminism, Catherine D'Ignazio and Lauren Klein present a new way of thinking about data science and data ethics—one that is informed by intersectional feminist thought. Illustrating data feminism in action, D'Ignazio and Klein show how challenges to the male/female binary can help challenge other hierarchical (and empirically wrong) classification systems. They explain how, for example, an understanding of emotion can expand our ideas about effective data visualization, and how the concept of invisible labor can expose the significant human efforts required by our automated systems. And they show why the data never, ever "speak for themselves." Data Feminism offers strategies for data scientists seeking to learn how feminism can help them work toward justice, and for feminists who want to focus their efforts on the growing field of data science. But Data Feminism is about much more than gender. It is about power, about who has it and who doesn't, and about how those differentials of power can be challenged and changed.

Watson, and forewords by Peter Lovesey, Roger Johnson, Steve Emecz, and David Marcum Here, though the world explode, these two survive, And it is always eighteen-ninety-five. So wrote Sherlockian Vincent Starrett in his 1942 poem 221b, soon after the United States entered World War II. Even as those years brought terrible challenges, so too has 2020 been a year of great testing for so many of us, as a global pandemic rages and good people are called to stand against evil. For Sherlockians, comfort can be found in climbing those seventeen stairs to the Baker Street sitting room, where it is always eighteen-ninety-five - or a few decades on either side of it. In 2015, the first three volumes of The MX Book of New Sherlock Holmes Stories arrived, containing over 60 stories in the true traditional Canonical manner. That was the largest collection of new Holmes stories ever assembled, and originally planned to be a one-time event. But readers wanted more, and the contributors had more stories from Watson's Tin Dispatch Box, so the fun continued. Now, with the release of Parts XXV, XXVI, and XXVII, the series has grown to nearly 600 new Holmes adventures by almost 200

contributors from around with world. Since the beginning, all contributor royalties go to the Stepping Stones School for special needs children at Undershaw, one of Sir Arthur Conan Doyle's former homes, and to date the project has raised over $75,000 for the school. Once again, the adventures of Sherlock Holmes and Dr. Watson continue in this acclaimed anthology series, with thirty-seven new tales presented in two companion volumes – more Holmes than could fit into one book! In 2015, The MX Book of New Sherlock Holmes Stories was first published, a huge three-book set featuring over sixty new traditional Holmes exploits, all set within the correct time period. Soon, the demand for even more traditional Holmes adventures led to further volumes. The next year brought Part IV: 2016 Annual, and then Part V: Christmas Adventures. In spring 2017 there was Part VI: 2017 Annual, and that fall revealed the massive two-volume set, Parts VII and VIII: Eliminate the Impossible. Now we present another two simultaneous volumes, Parts IX and X: 2018 Annual (1879-1895) and (1896-1916). There can be no argument that Sherlock Holmes is one of the most famous and recognizable figures in the world. There were only sixty narratives brought to us by the original Literary Agent, Sir Arthur Conan Doyle. Clearly that is not enough. Watson once wrote that he kept his unpublished cases in his old Tin Dispatch Box. Now, with the publication of these latest volumes, that box has again been explored by some of today's best Sherlockian writers, all of whom are donating their royalties from these anthologies toward the restoration of Undershaw, one of Sir Arthur Conan Doyle's houses, and the location where The Hound of the Baskervilles and many later Holmes stories were completed. Climb the seventeen steps to the sitting room at 221b Baker Street. Sherlock Holmes and Doctor Watson are waiting... The game is afoot!
