In addition, more than 50 carefully selected radiologic images help bridge illustrated anatomy to living anatomy as seen in everyday practice. Region-by-region coverage, including Muscle Table appendices at the end of each section. Large, clear illustrations with comprehensive labels not only of major structures, but also of those with important relationships. Updates to the 7th Edition - based on requests from students and practitioners alike: New Systems Overview section featuring brand-new, full-body views of surface anatomy, vessels, nerves, and lymphatics. More than 25 new illustrations by Dr. Machado, including the clinically important fascial columns of the neck, deep veins of the leg, hip bursae, and vasculature of the prostate; and difficult-to-visualize areas like the infratemporal fossa. New Clinical Tables at the end of each regional section that focus on structures with high clinical significance. These tables provide quick summaries, organized by body system, and indicate where to best view key structures in the illustrated plates. More than 50 new radiologic images - some completely new views and others using newer imaging tools - have been included based on their ability to assist readers in grasping key elements of gross anatomy. Updated terminology based on the international anatomic standard, Terminologia Anatomica, with common clinical eponyms included.**

**The Integumentary System, by Bryan E. Anderson, MD, takes a concise and highly visual approach to illustrate the basic sciences and clinical pathology of the skin, hair and nails. This newly added, never-before-published volume in The Netter Collection of Medical Illustrations (formerly the CIBA "Green Books") captures current clinical perspectives on the integumentary system - from normal anatomy and histology to pathology, dermatology, and common issues in plastic surgery and wound healing. Using classic Netter illustrations and new illustrations created in the Netter tradition, as well as a great many cutting-edge histologic micrographs and diagnostic images, it provides a vivid, illuminating, and clinically indispensable view of this body system. Gain a rich, holistic clinical view of every structure by seeing classic Netter anatomic illustrations, cutting-edge histologic images and diagnostic imaging studies side by side. Visualize the most recent topics in cutaneous pathology such as sporothrix and cutaneous t-cell lymphoma as well as classic problems like alopecia and neurofibromatosis, informed by the latest developments in molecular biology and histologic imaging. See current dermatologic concepts captured in the visually rich Netter artistic tradition via major new contributions from Netter disciple Carlos Machado, MD - making complex concepts easy to understand and remember through the precision, clarity, detail, and realism for which Netter's work has always been known.
