

The Portable Atheist Essential Readings For The Non Believer

"All first-rate criticism first defines what we are confronting," the late, great jazz critic Whitney Balliett once wrote. By that measure, the essays of Christopher Hitchens are in the first tier. For nearly four decades, Hitchens has been telling us, in pitch-perfect prose, what we confront when we grapple with first principles—the principles of reason and tolerance and skepticism that define and inform the foundations of our civilization—principles that, to endure, must be defended anew by every generation. "A short list of the greatest living conversationalists in English," said *The Economist*, "would probably have to include Christopher Hitchens, Sir Patrick Leigh-Fermor, and Sir Tom Stoppard. Great brilliance, fantastic powers of recall, and quick wit are clearly valuable in sustaining conversation at these cosmic levels. Charm may be helpful, too." Hitchens—who staunchly declines all offers of knighthood—hereby invites you to take a seat at a democratic conversation, to be engaged, and to be reasoned with. His knowledge is formidable, an encyclopedic treasure, and yet one has the feeling, reading him, of hearing a person thinking out loud, following the inexorable logic of his thought, wherever it might lead, unafraid to expose fraudulence, denounce injustice, and excoriate hypocrisy. Legions of readers, admirers and detractors alike, have learned to read Hitchens with something approaching awe at his felicity of language, the oxygen in every sentence, the enviable wit and his readiness, even eagerness, to fight a foe or mount the ramparts. Here, he supplies fresh perceptions of such figures as varied as Charles Dickens, Karl Marx, Rebecca West, George Orwell, J.G. Ballard, and Philip Larkin are matched in brilliance by his pungent discussions and intrepid observations, gathered from a lifetime of traveling and reporting from such destinations as Iran, China, and Pakistan. Hitchens's directness, elegance, lightly carried erudition, critical and psychological insight, humor, and sympathy—applied as they are here to a dazzling variety of subjects—all set a standard for the essayist that has rarely been matched in our time. What emerges from this indispensable volume is an intellectual self-portrait of a writer with an exemplary steadiness of purpose and a love affair with the delights and seductions of the English language, a man anchored in a profound and humane vision of the human longing for reason and justice.

An anthology of writings on atheism, agnosticism, and skepticism by some of the world's most celebrated thinkers.

Should we believe in God? In this brisk introduction to modern atheism, one of the world's greatest science writers tells us why we shouldn't. Richard Dawkins was fifteen when he stopped believing in God. Deeply impressed by the beauty and complexity of living things, he'd felt certain they must have had a designer. Learning about evolution changed his mind. Now one of the world's best and bestselling science communicators, Dawkins has given readers, young and old, the same opportunity to rethink the big questions. In twelve fiercely funny, mind-expanding chapters, Dawkins explains how the natural world arose without a designer—the improbability and beauty of the "bottom-up programming" that engineers an embryo or a flock of starlings—and challenges head-on some of the most basic assumptions made by the world's religions: Do you believe in God? Which one? Is the Bible a "Good Book"? Is adhering to a religion necessary, or even likely, to make people good to one another? Dissecting everything from Abraham's abuse of Isaac to the construction of a snowflake, *Outgrowing God* is a concise, provocative guide to thinking for yourself. Praise for *Outgrowing God* "My son came home from his first day in the sixth grade with arms outstretched plaintively demanding to know: 'Have you ever heard of Jesus?' We burst out laughing. Maybe not our finest parenting moment,

given that he was genuinely distraught. He felt that he had woken up one day to a world in which his peers were expressing beliefs he found frighteningly unreasonable. He began devouring books like *The God Delusion*, books that helped him formulate his own arguments and helped him stand his ground. Dawkins's new book is special in the terrain of atheists' pleas for humanism and rationalism precisely since it speaks to those most vulnerable to the coercive tactics of religion. As Dawkins himself says in the dedication, this book is for 'all young people when they're old enough to decide for themselves.' It is also, I must add, for their parents."—Janna Levin, author of *Black Hole Blues* "When someone is considering atheism I tell them to read the Bible first and then Dawkins. Outgrowing God—second only to the Bible!"—Penn Jillette, author of *God, No!*

The Monarchy

A former preacher tell why he abandoned the guidance of the Bible to follow the dictates of own conscience.

On June 8, 2010, while on a book tour for his bestselling memoir, Hitch-22, Christopher Hitchens was stricken in his New York hotel room with excruciating pain in his chest and thorax. As he would later write in the first of a series of award-winning columns for Vanity Fair, he suddenly found himself being deported "from the country of the well across the stark frontier that marks off the land of malady." Over the next eighteen months, until his death in Houston on December 15, 2011, he wrote constantly and brilliantly on politics and culture, astonishing readers with his capacity for superior work even in extremis. Throughout the course of his ordeal battling esophageal cancer, Hitchens adamantly and bravely refused the solace of religion, preferring to confront death with both eyes open. In this riveting account of his affliction, Hitchens poignantly describes the torments of illness, discusses its taboos, and explores how disease transforms experience and changes our relationship to the world around us. By turns personal and philosophical, Hitchens embraces the full panoply of human emotions as cancer invades his body and compels him to grapple with the enigma of death. MORTALITY is the exemplary story of one man's refusal to cower in the face of the unknown, as well as a searching look at the human predicament. Crisp and vivid, veined throughout with penetrating intelligence, Hitchens's testament is a courageous and lucid work of literature, an affirmation of the dignity and worth of man.

In this anthology of recent criticisms aimed at the reasonableness of Christian belief, a former evangelical minister and apologist, author of the critically acclaimed Why I Became an Atheist, has assembled fifteen outstanding articles by leading skeptics, expanding on themes introduced in his first book. Central is a defense of his "outsider test of faith," arguing that believers should test their faith with the same skeptical standards they use to evaluate the other faiths they reject, as if they were outsiders. Experts in medicine, psychology, and anthropology join Loftus to show why, when this test is applied to Christianity, it becomes very difficult to rationally defend. Collectively,

these articles reveal that popular Christian beliefs tend to rely on ignorance of the facts. Drawing together experts in diverse fields, including Hector Avalos, Richard Carrier, David Eller, and Robert Price, this book deals a powerful blow against Christian faith.

*For thousands of years, the faithful have honed proselytizing strategies and talked people into believing the truth of one holy book or another. Indeed, the faithful often view converting others as an obligation of their faith—and are trained from an early age to spread their unique brand of religion. The result is a world broken in large part by unquestioned faith. As an urgently needed counter to this tried-and-true tradition of religious evangelism, *A Manual for Creating Atheists* offers the first-ever guide not for talking people into faith—but for talking them out of it. Peter Boghossian draws on the tools he has developed and used for more than 20 years as a philosopher and educator to teach how to engage the faithful in conversations that will help them value reason and rationality, cast doubt on their religious beliefs, mistrust their faith, abandon superstition and irrationality, and ultimately embrace reason.*

Journeys and Essays

The author of *Why Orwell Matters* demonstrates how Thomas Paine's Declaration of the Rights of Man, first published in 1791, a passionate defense of the inalienable rights of humankind, forms the philosophical cornerstone of the United States of America, in an engaging critical work. Reprint.

In this new book, Ian Markham analyzes the atheistic world view, opposing the arguments given by renowned authors of books on atheism, such as Richard Dawkins. Unlike other responses to the new atheism, Markham challenges these authors on their own ground by questioning their understanding of belief and of atheism itself. The result is a transforming introduction to Christianity that will appeal to anyone interested in this debate. A fascinating challenge to the recent spate of successful books written by high-profile atheist authors such as Richard Dawkins, Christopher Hitchens, and Sam Harris Tackles these authors on their own ground, arguing that they do not understand the nature of atheism, let alone theology and ethics Draws on ideas from Nietzsche, cosmology, and art to construct a powerful response that allows for a faith that is grounded, yet one

that recognizes the reality of uncertainty Succinct, engaging, but robustly argued, this new book by a leading academic and writer contains a wealth of profound insights that show religious belief in a new light

After losing nearly everything, including his job and his wife, due to his crumbling faith, the author shares his transformative journey from a pastor with a deep Christian faith to a leader and well-known speaker in America's fast-growing atheist movement.

50,000 first printing.

As the Duke and Duchess of Sussex bring renewed focus to the monarchy, now is the perfect time to re-examine Christopher Hitchens's powerful polemic. In this scathing essay, Christopher Hitchens looks at the relationship of the press and the public to the royal family, unpacking the tautology and contradictory arguments that prop it up. In his inimitable style, Hitchens argues that our desire not to profane or disturb the monarchy is a failure of reason and a confusion of reality. Fealty to the magic of monarchy stops us looking objectively at our own history and hinders open-minded criticism of our present. It is time we outgrew it. With the recent birth of royal baby Archie, during a time of austerity and national inequality, Hitchens's 10,000-word critique is even more relevant today than when it was first published in 1990. 'Christopher is one of the most terrifying rhetoricians that the world has yet seen' Martin Amis

Can I get a "ramen" from the congregation?! Behold the Church of the Flying Spaghetti Monster (FSM), today's fastest growing carbohydrate-based religion. According to church founder Bobby Henderson, the universe and all life within it were created by a mystical and divine being: the Flying Spaghetti Monster. What drives the FSM's devout followers, a.k.a. Pastafarians? Some say it's the assuring touch from the FSM's "noodly appendage." Then there are those who love the

worship service, which is conducted in pirate talk and attended by congregants in dashing buccaneer garb. Still others are drawn to the Church ' s flimsy moral standards, religious holidays every Friday, or the fact that Pastafarian heaven is way cooler: Does your heaven have a Stripper Factory and a Beer Volcano? Intelligent Design has finally met its match—and it has nothing to do with apes or the Olive Garden of Eden. Within these pages, Bobby Henderson outlines the true facts – dispelling such malicious myths as evolution (“ only a theory ”), science (“ only a lot of theories ”), and whether we ' re really descended from apes (fact: Humans share 95 percent of their DNA with chimpanzees, but they share 99.9 percent with pirates!) See what impressively credentialed top scientists have to say: “ If Intelligent Design is taught in schools, equal time should be given to the FSM theory and the non-FSM theory. ” – Professor Douglas Shaw, Ph.D. “ Do not be hypocritical. Allow equal time for other alternative ‘ theories ’ like FSMism, which is by far the tastier choice. ” – J. Simon, Ph.D. “ In my scientific opinion, when comparing the two theories, FSM theory seems to be more valid than classic ID theory. ” – Afshin Beheshti, Ph.D. Read the book and decide for yourself!

Maajid Nawaz spent his teenage years listening to American hip-hop and learning about the radical Islamist movement spreading throughout Europe and Asia in the 1980s and 90s. At 16, he was already a ranking member in Hizb ut-Tahrir, a London-based Islamist group. He quickly rose through the ranks to become a top recruiter, a charismatic spokesman for the cause of uniting Islam ' s political power across the world. Nawaz was setting up satellite groups in Pakistan, Denmark, and Egypt when he was rounded up in the aftermath of 9/11 along with many other radical Muslims. He was sent to an Egyptian prison where he was, fortuitously, jailed along with the assassins of Egyptian President Anwar Sadat. The 20 years in prison had changed the assassins ' views on Islam and violence; Maajid went into prison preaching to them about the Islamist cause, but the lessons ended up going the other way. He came out of prison four years later completely changed, convinced that his entire belief system had been wrong, and determined to do something about it. He met with activists and heads of state, built a network, and started a foundation, Quilliam, funded by the British government, to combat the rising Islamist tide in Europe and elsewhere, using his intimate knowledge of recruitment tactics in order to reverse extremism and persuade Muslims that the ‘ narrative ’ used to recruit them (that the West is evil and the cause of all of Muslim suffering), is false. Radical, first published in the UK, is a fascinating and important look into one man's journey out of extremism and into something else entirely. This U.S. edition contains a "Preface for US readers" and a new, updated epilogue.

On one side of the argument is a collection of godless academics with doctorates from the finest universities in England, France, and the United States. On the other is Irrational Atheist author Vox Day, armed with nothing more than historical and statistical facts. Presenting a compelling argument (but not for the side one might expect), Day strips away the pseudo-scientific pretensions of New Atheism with his intelligent application of logic, history, military science, political economy, and well-documented research. The arguments of Richard Dawkins, Sam Harris, Christopher Hitchens, Daniel Dennett, and Michel Onfray are all methodically exposed and discredited as Day provides extensive evidence proving, among other things, that: More than 93 percent of all the wars in human history had no relation to religion The Spanish Inquisition had no jurisdiction over professing Jews, Muslims, or atheists, and executed fewer people on an annual basis than the state of Texas Atheists are 3.84 times more likely to be imprisoned than Christians "Red" state crime is primarily in "blue" counties Sexually abused girls

are 55 times more likely to commit suicide than girls raised Catholic In the twentieth century, atheistic regimes killed three times more people in peacetime than those killed in all the wars and individual crimes combined. The Irrational Atheist provides the rational thinker with empirical proof that atheism's claims against religion are unfounded in logic, fact, and science. From the author of The Architecture of Happiness, a deeply moving meditation on how we can still benefit, without believing, from the wisdom, the beauty, and the consolatory power that religion has to offer. Alain de Botton was brought up in a committedly atheistic household, and though he was powerfully swayed by his parents' views, he underwent, in his mid-twenties, a crisis of faithlessness. His feelings of doubt about atheism had their origins in listening to Bach's cantatas, were further developed in the presence of certain Bellini Madonnas, and became overwhelming with an introduction to Zen architecture. However, it was not until his father's death -- buried under a Hebrew headstone in a Jewish cemetery because he had intriguingly omitted to make more secular arrangements -- that Alain began to face the full degree of his ambivalence regarding the views of religion that he had dutifully accepted. Why are we presented with the curious choice between either committing to peculiar concepts about immaterial deities or letting go entirely of a host of consoling, subtle and effective rituals and practices for which there is no equivalent in secular society? Why do we bristle at the mention of the word "morality"? Flee from the idea that art should be uplifting, or have an ethical purpose? Why don't we build temples? What mechanisms do we have for expressing gratitude? The challenge that de Botton addresses in his book: how to separate ideas and practices from the religious institutions that have laid claim to them. In Religion for Atheists is an argument to free our soul-related needs from the particular influence of religions, even if it is, paradoxically, the study of religion that will allow us to rediscover and rearticulate those needs.

Fighting God is a firebrand manifesto from one of the most recognizable faces of atheism. In his book, Silverman—a walking, talking atheist billboard known for his appearances on Fox News—discusses the effectiveness, ethics and impact of the in-your-face-atheist who refuses to be silent. Silverman argues that religion is more than just wrong: it is malevolent and does not deserve our respect. It is our duty to be outspoken and do what we can to bring religion down. Examining the mentality, methods and issues facing the firebrand atheist, Silverman presents an overwhelming argument for firebrand atheism and reveals: - All religion is cafeteria religion and almost all agnostics are atheists. - American society grants religion a privileged status, despite the intentions of the Founding Fathers. - Christian politicians have adversely (and un-Constitutionally) affected our society with regard to science, health, women's rights, and gay rights. - The notion of "atheist Jews" is a lie forced on us by religion. - It is not "Islamophobia" to observe dangerous teachings and disproportionate violence in Islam. - Atheists are slowly but surely winning the battle. Fighting God is a provocative, unapologetic book that takes religion to task and will give inspiration to non-believers and serve as the ultimate answer to apologists.

In 2007, Christopher Hitchens, Richard Dawkins, Sam Harris, and Daniel Dennett filmed a landmark discussion about modern atheism. The video went viral. Now in print for the first time, the transcript of their conversation is illuminated by new essays from three of the original participants and an introduction by Stephen Fry. At the dawn of the new atheist movement, the thinkers who became known as “the four horsemen,” the heralds of religion's unraveling—Christopher Hitchens, Richard Dawkins, Sam Harris, and Daniel Dennett—sat down together over cocktails. What followed was a rigorous, pathbreaking, and enthralling exchange, which has been viewed millions of times since it was first posted on YouTube. This is intellectual inquiry at its best: exhilarating, funny, and unpredictable, sincere and probing, reminding us just how varied and colorful the threads of modern atheism are. Here is the transcript of that conversation, in print for the first time, augmented by material from the living participants: Dawkins, Harris, and Dennett. These new essays, introduced by Stephen Fry, mark the evolution of their thinking and highlight particularly resonant aspects of this epic exchange. Each man contends with the most fundamental questions of human existence while challenging the others to articulate their own stance on God and religion, cultural criticism, spirituality, debate with people of faith, and the components of a truly ethical life. Praise for The Four Horsemen “This bracing exchange of ideas crackles with energy. It’s fascinating to watch four first-class minds explore a rugged intellectual terrain. . . . The text affords a different, more reflective way of processing the truly vital exchange of ideas. . . . I commend the book to those seeking an honest reckoning with their religion—and those curious about how the world looks from a rigorously naturalistic and atheistic point of view.”—Pittsburgh Post-Gazette “The full, electrifying transcript of the one and only conversation

Fighting God

This handbook is a pioneering edited volume, exploring atheism - understood in the broad sense of 'an absence of belief in the existence of a God or gods' - in its historical and contemporary expressions. It probes the varied manifestations and implications of unbelief from an array of disciplinary perspectives and in a range of global contexts.

Through the skillful use of a great variety of literary genres, this book explores the intimate relation and tension between religion and spirituality, evoking a wide range of responses that may awaken one to various possibilities of spiritual experience.

"I did not, I wish to state, become a journalist because there was no other 'profession' that would have me. I became a journalist because I did not want to rely on newspapers for information." Love, Poverty and War: Journeys and Essays showcases America's leading polemicist's rejection of consensus and cliché, whether he's reporting from abroad in Indonesia, Kurdistan, Iraq, North Korea, or Cuba, or when his pen is targeted mercilessly at the likes of William Clinton, Mother Theresa ("a fanatic, a fundamentalist and a fraud"), the Dalai Lama, Noam Chomsky, Mel Gibson and Michael Bloomberg. Hitchens began the nineties as a "darling of the left" but has become more of an "unaffiliated radical" whose targets include those on the "left," who he accuses of "fudging" the issue of military intervention in the Balkans, Afghanistan and Iraq. Yet, as Hitchens shows in his reportage, cultural and literary criticism, and opinion essays from the last decade, he has not jumped ship and joined the right but is faithful to the internationalist, contrarian and democratic ideals that have always informed his work.

In this groundbreaking volume, J. Anderson Thomson, Jr., MD, with Clare Aukofer, offers a succinct yet comprehensive study of how and why the human mind generates religious belief. Dr. Thomson, a highly respected practicing psychiatrist with credentials in forensic psychiatry and evolutionary psychology, methodically investigates the components and causes of religious belief in the same way any scientist would investigate the movement of astronomical bodies or the evolution of life over time—that is, as a purely natural phenomenon. Providing compelling evidence from psychology, the cognitive neurosciences, and related fields, he, with Ms. Aukofer, presents an easily accessible and exceptionally convincing case that god(s) were created by man—not vice versa. With this slim volume, Dr. Thomson establishes himself

as a must-read thinker and leading voice on the primacy of reason and science over superstition and religion.

50 Voices of Disbelief: Why We Are Atheists presents a collection of original essays drawn from an international group of prominent voices in the fields of academia, science, literature, media and politics who offer carefully considered statements of why they are atheists. Features a truly international cast of contributors, ranging from public intellectuals such as Peter Singer, Susan Blackmore, and A.C. Grayling, novelists, such as Joe Haldeman, and heavyweight philosophers of religion, including Graham Oppy and Michael Tooley Contributions range from rigorous philosophical arguments to highly personal, even whimsical, accounts of how each of these notable thinkers have come to reject religion in their lives Likely to have broad appeal given the current public fascination with religious issues and the reception of such books as The God Delusion and The End of Faith

A bold reevaluation of Spinoza that reveals his powerful, inclusive vision of religion for the modern age Spinoza is widely regarded as either a God-forsaking atheist or a God-intoxicated pantheist, but Clare Carlisle says that he was neither. In Spinoza's Religion, she sets out a bold interpretation of Spinoza through a lucid new reading of his masterpiece, the Ethics. Putting the question of religion centre-stage but refusing to convert Spinozism to Christianity, Carlisle reveals that "being in God" unites Spinoza's metaphysics and ethics. Spinoza's Religion unfolds a powerful, inclusive philosophical vision for the modern age—one that is grounded in a profound questioning of how to live a joyful, fully human life. Like Spinoza himself, the Ethics doesn't fit into any ready-made religious category. But Carlisle shows how it wrestles with the question of religion in strikingly original ways, responding both critically and constructively to the diverse, broadly Christian context in which Spinoza lived and worked. Philosophy itself, as Spinoza practiced it, became a spiritual endeavor that expressed his devotion to a truthful, virtuous way of life. Offering startling new insights into Spinoza's famously enigmatic ideas about eternal life and the intellectual love of God, Carlisle uncovers a Spinozist religion that integrates self-knowledge, desire, practice, and embodied ethical life to reach toward our "highest happiness"—to rest in God. Seen through Carlisle's eyes, the Ethics prompts us to rethink not only Spinoza but also religion itself.

Presents excerpts on the subject of religion from the writings of such notable non-believers as John

Stuart Mill, Karl Marx, Charles Darwin, Mark Twain, H. L. Mencken, Albert Einstein, Richard Dawkins, and Salman Rushdie.

2016 Winner of the Gospel Coalition Book Awards At the time of his death, Christopher Hitchens was the most notorious atheist in the world. And yet, all was not as it seemed. "Nobody is not a divided self, of course," he once told an interviewer, "but I think it's rather strong in my case." Hitchens was a man of many contradictions: a Marxist in youth who longed for acceptance among the social elites; a peacenik who revered the military; a champion of the Left who was nonetheless pro-life, pro-war-on-terror, and after 9/11 something of a neocon; and while he railed against God on stage, he maintained meaningful—though largely hidden from public view—friendships with evangelical Christians like Francis Collins, Douglas Wilson, and the author Larry Alex Taunton. In *The Faith of Christopher Hitchens*, Taunton offers a very personal perspective of one of our most interesting and most misunderstood public figures. Writing with genuine compassion and without compromise, Taunton traces Hitchens's spiritual and intellectual development from his decision as a teenager to reject belief in God to his rise to prominence as one of the so-called "Four Horsemen" of the New Atheism. While Hitchens was, in the minds of many Christians, Public Enemy Number One, away from the lights and the cameras a warm friendship flourished between Hitchens and the author; a friendship that culminated in not one, but two lengthy road trips where, after Hitchens's diagnosis of esophageal cancer, they studied the Bible together. *The Faith of Christopher Hitchens* gives us a candid glimpse into the inner life of this intriguing, sometimes maddening, and unexpectedly vulnerable man. "If everyone in the United States had the same qualities of loyalty and care and concern for others that Larry Taunton had, we'd be living in a much better society than we do." ~ Christopher Hitchens

Atheism

The easy way to understand atheism and secular philosophy For people seeking a non-religious philosophy of life, as well as believers with atheist friends, *Atheism For Dummies* offers an intelligent exploration of the historical and moral case for atheism. Often wildly misunderstood, atheism is a secular approach to life based on the understanding that reality is an arrangement of physical matter, with no consideration of unverifiable spiritual forces. *Atheism For Dummies* offers a brief history of atheist philosophy and its evolution, explores it as

a historical and cultural movement, covers important historical writings on the subject, and discusses the nature of ethics and morality in the absence of religion. A simple, yet intelligent exploration of an often misunderstood philosophy Explores the differences between explicit and implicit atheism A comprehensive, readable, and thoroughly unbiased resource As the number of atheists worldwide continues to grow, this book offers a broad understanding of the subject for those exploring atheism as an approach to living.

"Art of Mentoring" series In the book that he was born to write, provocateur and best-selling author Christopher Hitchens inspires future generations of radicals, gadflies, mavericks, rebels, angry young (wo)men, and dissidents. Who better to speak to that person who finds him or herself in a contrarian position than Hitchens, who has made a career of disagreeing in profound and entertaining ways. This book explores the entire range of "contrary positions"-from noble dissident to gratuitous pain in the butt. In an age of overly polite debate bending over backward to reach a happy consensus within an increasingly centrist political dialogue, Hitchens pointedly pitches himself in contrast. He bemoans the loss of the skills of dialectical thinking evident in contemporary society. He understands the importance of disagreement-to personal integrity, to informed discussion, to true progress-heck, to democracy itself. Epigrammatic, spunky, witty, in your face, timeless and timely, this book is everything you would expect from a mentoring contrarian.

The first book to deal with all the arguments against religion and, equally important, to put forward an alternative - humanism

What first prompted prehistoric man, sheltering in the shadows of deep caves, to call upon the realm of the spirits? And why has belief thrived ever since, leading us to invent heaven and hell, sin and redemption, and above all, gods? Religion reflects our deepest hopes and fears; whether you are a believer or, like Matthew Kneale, a non-believer who admires mankind's capacity to create and to imagine, it has shaped our world. And as our dreams and nightmares have changed over the millennia, so have our beliefs - from shamans to Aztec priests, from Buddhists to Christians: the gods we created have evolved with us. Belief is humanity's most epic invention. It has always been our closest companion and greatest consolation. To understand it is to better understand ourselves.

Letters to a Young Contrarian

God Is Not Great

Christopher Hitchens's personally curated New York Times bestselling anthology of the most influential and important writings on atheism, including original pieces by Salman Rushdie and Ian McEwan From the #1 New York Times best-selling author of God Is Not Great, a provocative and entertaining guided tour of atheist and agnostic thought through the ages--with never-before-published pieces by Salman Rushdie, Ian McEwan, and Ayaan Hirsi Ali. Christopher Hitchens continues to make the case for a splendidly godless universe in this first-ever gathering of the influential voices--past and present--that have shaped his side of the current (and raging) God/no-god debate. With Hitchens as your erudite and witty guide, you'll be led through a wealth of philosophy, literature, and scientific inquiry, including generous portions of the words of Lucretius, Benedict de Spinoza, Charles Darwin, Karl Marx, Mark Twain, George Eliot, Bertrand Russell, Emma Goldman, H. L. Mencken, Albert Einstein, Daniel Dennett, Sam Harris, Richard Dawkins, and many others well-known and lesser known. And they're all set in context and commented upon as only Christopher Hitchens--"political and literary journalist extraordinaire" (Los Angeles Times)--can. Atheist? Believer? Uncertain? No matter: The Portable Atheist will speak to you and engage you every step of the way.

Suggests that President Clinton's largest legacy may be the weakening of the presidency and of the Democratic Party.

Includes never-before-collected quotes from the controversial best-selling author on hundreds of subjects--from atheism and alcoholism to Iraq and George Orwell.

Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet--the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's Why I Am Not a Christian and Sam Harris's recent bestseller, The End Of Faith, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix.

with anecdotes and accessible examples, *Fear of Physics* nimbly ranges over the tools and thought behind the world of modern physics, taking the mystery out of what is essentially a very human intellectual endeavour.

The essential guide to coming out as a non-believer David G. McAfee was raised in a conservative American Christian household. So when he stopped believing in God—any god—his family was shocked. He quickly realized that atheists are misunderstood, frequently thought of as Satan worshippers and anarchists. Thus started McAfee's journey to his true self, and crusade to tell others—especially those who are devoutly religious—what atheism really is, what he believes in, and why atheists should not be feared. In *Hi, I'm an Atheist!*, McAfee looks at what an atheist believes and how to “come out” as an atheist to your friends, family, and co-workers, offering sound advice on overcoming the difficult moments in any “coming out” conversation. Including a resource guide both for people just coming to atheism and people who have been atheists for years as well as an interview with Rebecca Vitsmun, the woman made famous for coming out as an atheist live on CNN, *Hi I'm an Atheist!* is a smart, sensitive, and realistic guide to living one's life positively and honestly without the need for a belief in God.
