birds live, why they matter, and whether they really are dinosaurs. Colin Tudge shows how birds - who are like us in the general sense but very different in the particulars - live and think. For birds have minds: they feel, they are aware, they work things out. And so, by considering the birds, asking how and why it is possible for them to be so different, we gain insight into ourselves. Birds are beautiful, lively, intriguing - and all around us. This rich and endlessly absorbing book opens up their lives to everyone.
