question of why some metropolitan-area regional economies are resilient in the face of economic shocks and chronic distress while others are not. It is particularly concerned with what public policies make a difference in whether a region is resilient. The authors employ a wide range of techniques to examine the experience of all metropolitan area economies from 1978–2014. They then look closely at six American metropolitan areas to determine what strategies were employed, which of these contributed to regional economic resilience, and which did not. Charlotte, North Carolina, Seattle, Washington, and Grand Forks, North Dakota, are cases of economic resilience, while Cleveland, Ohio, Hartford, Connecticut, and Detroit, Michigan, are cases of economic nonresilience. The six case studies include hard data on employment, production, and demographics, as well as material on

public policies and actions. The authors conclude that there is little that can be done in the short term to counter economic shocks; most regions simply rebound naturally after a relatively short period of time. However, they do find that many regions have successfully emerged from periods of prolonged economic distress and that there are policies that can be applied to help them do so. *Coping with Adversity* will be important reading for all those concerned with local and regional economic development, including public officials, urban planners, and economic developers. Bregg finds a society that he hardly recognizes, in which danger has been eradicated. The people of Earth view Bregg and his crew as “resuscitated Neanderthals,” and pressure them to undergo betrization. Bregg has serious difficulty in navigating the new social mores. While Lem's depiction of a risk-free society is

He is faced with a choice: leave Earth again and hope to return to a different society in several hundred years, or stay on Earth and learn to be content. With *Return from the Stars*, Lem shows the shifting boundaries between utopia and dystopia.
