When kids learn they might receive special education, they often have questions and worries. This book gives kids lots of tools and strategies they can use to deal with their concerns, whether they are in the process of being evaluated or already receiving special education services. It explains key features of special ed, such as individual education plans (IEPs) and 504 plans. Readers will also learn to cope with challenges, focus on their strengths, understand testing, and see how much extra help can benefit them. The book also teaches students skills to help them succeed, such as perseverance, organization, and self-advocacy.

Written for 7-11 year olds, this playful guide appeals to kids who want to know more about what adults are telling them is a serious time. Without talking down to them, and challenging them to learn and do more, the following topics are explored in detail: What Lent Is, What Lent Definitely Is Not, 40 Days of Survival Tactics, and A Few Prayers and Practices – Only for Kids. From What Lent Definitely Is Not: People easily become confused on this subject. In fact, we’re glad you are reading this book, because we want to set you, at least, straight. You can then please set others straight. Lent is not about “giving up” silly things. It is not about making sad faces to show how difficult life has suddenly become for you. (Need we start explaining how most of the world would think that giving up candy bars or soda for 40 days sounds just plain silly? According to Bread for the World, 925 million people around the world go hungry each day. So please don’t talk about the terrible hardship you are undergoing by giving up M&M’s and Coca-Cola for a few weeks.) So instead of focusing on what you may give up, take time to consider why you may do it. You give stuff up for Lent because you want to become a better Christian. You are testing yourself – and allowing God to test you – to see if, by giving up something that maybe you are too focused on in everyday life, you can concentrate more on him.

Continue to have and grow your life. Mom—for your sake and your kids’ . When did being a good mom come to mean giving up everything that used to make you ... you? That ’ s the question millions of 21st-century mothers grapple with every single day as they parent in our madly kid-centric culture. Contrary to the incessant messaging from everywhere, committing to yourself and your own needs is what makes for a good mother and happy kids. With How to Have a Kid and a Life, popular journalist and Good Morning America parenting expert Erica Souter shares her tips for being a happy, whole person while still being a great, and sometimes just good enough (which is plenty fine), parent. Souter blends her own stories of surviving the seismic challenges of parenthood with testimonials from stay-at-home and working moms; interviews with therapists and researchers; and findings from the latest studies on happiness, self-care, and parenthood. What she delivers is a wonderfully irreverent survival guide to motherhood, featuring:
• Advice on keeping your career on track while parenting
• Tips for handling clueless and unhelpful partners
• Taking back ownership of your body
• Creating a reliable village of support (even with moms you didn’ t think you’ d like)

Meant to be read with a parent, the book addresses questions (“What is ASD?” “Why me?”) and provides strategies for communicating, making and keeping friends, and succeeding in school. Body and brain basics highlight symptom management, exercise, diet, hygiene, relaxation, sleep, and toileting. Emphasis is placed on helping kids handle intense emotions and behaviors and get support from family and their team of helpers when needed. The book includes stories from real kids, fact boxes, helpful checklists, and resources. Sections for parents offer additional information.
