Human Nature in Modern Economics offers a precise definition of the concept of human nature in economics, something that is so far lacking in the theoretical and methodological literature. This book develops tools for the analysis of human nature through the construction of the author's meta-model - based on anthropological and psychological foundations - allowing for comparisons of anthropological assumptions made in economic theories. The model demonstrates that the normative functions of human nature may affect the economic reality. The chapters argue that the concept of human nature determines our thinking about the economy and economics, including fundamental methodologies, methods and theories. Thus, the differences between various economic schools may result from the different assumptions of these schools about human nature. Those evolving views of human nature proceed to explain the development of both orthodox (mainstream) and heterodox economics. The book marks a significant addition to the literature on the history of economic thought, heterodox economics, economic theory and economic methodology. For students, it is a supplement to standard textbooks as it explains the current state of economics, especially in its heterodox branches. It will allow scholars to discover the importance of what they assume about human nature and how it may influence their research process.

1. Business Economics : Meaning, Nature and Scope, 2. Micro and Macro Economics, 3 .Basic Problems of an Economy, 4. Role of Price Mechanism : Market Equilibrium, 5. Large-scale economic change such as the rise of coinage occurred during the Persian-dominated centuries (6th-4th centuries BCE) in the Eastern Mediterranean and ancient Near East. How do the biblical texts of the time respond to such developments? In this study, Peter Altmann lays out foundational economic conceptions from the ancient Near East and earlier biblical traditions in order to show how Persian-period biblical texts build on these traditions to address the challenges of their day. Economic issues are central for how Ezra and Nehemiah approach the topics of temple building and of Judean self-understanding, and economics are also important for other Persian-period texts. Following significant interaction with the material culture and extra-biblical texts, the author devotes special attention to the ascendancy of economics and its theological and identity implications as structuring metaphors for divine action and human community in the Persian period.

According to neoclassical theory, efficient interaction between the profit-maximizing "ideal producer" and the utility-maximizing "ideal consumer" will eventually lead to some sort of social optimum. But is that social optimum the same as human well-being? Human Well-Being and Economic Goals addresses that topic. It brings together more than 75 concise summaries of the most significant writings that consider issues of present and future individual and social welfare, national development, consumption, and equity.

A-level Economics Challenging Drill Questions (Yellowreef)

One of the leading texts in the field, *The Economics of Recreation, Leisure and Tourism* is the ideal introduction to the fundamentals of economics in these industries, helping you to enjoy and pass an economics module as part of tourism, recreation, events or sport management degrees. International in its outlook, it will equip you with vital skills and knowledge for your future career as well as critical skills to help you understand and help tackle crucial challenges facing the world. It is written in a clear and engaging style that assumes no prior knowledge of economics. It applies economic theory to a range of tourism industry issues at the consumer, business, national and international level by using topical examples to give the theory real-world context. This book is richly illustrated with diagrams and contains a range of features such as international case studies showcasing current issues, review questions and extracts from journals to aid understanding and further knowledge, as well as new data and statistics. It concludes with a powerful critique of traditional economics and a set of twenty-one issues that demand action. This sixth edition has been revised and updated to include: recent and time series international economic data to provide a sense of the dynamics of world economies topical analysis to aid decision making for industry, governments and pressure groups a renewed emphasis on environmental and climate change issues new and revised international case studies that demonstrate theoretical principles of economics as applied to the sector a companion website with PowerPoint slides.

Principles of Economics - SBPD Publications

The book discusses leading issues in Islamic economics and finance that continue to remain in a fluid, non-consensual state in the profession. It examines the nature and significance of Islamic economics. The book deals with the mainstream topics including growth, environment, distributive justice, monetary policy, risk treatment, methodology and Basel Accords to rehabilitate them for the Islamic discipline within the framework of scarcity, self-interest and gain maximization. Further, it explores the role of the state in directing the economy toward achieving Islamic goals of development and welfare.
