Making Australia Slightly Better Than Average Again™ is Mark Swivel's soundbite manifesto as he embarks on a bid for the senate in 2019. Swivel argues our political class detached from the rest of us a long time ago and has no real purpose beyond preserving itself. He advocates a new populism that's about making communities worth living in and building a future where government serves us and not the market - where the test is always 'so, tell me how does this bring people together?' An Australia that is Slightly Better Than Average... like the one he grew up in when there was free

university education, a sane housing policy, and we all seemed to be part of a national adventure. "Disruption is everywhere except politics. Let's change that." This is Mark Swivel's message to all Australians in this immensely readable, very funny, yet insightful book. Read it and be inspired. What The Barefoot Investor did for personal finance, Swivel does for politics. - Colleen Ryan, Author and former editor of the Australian Financial Review With humour and insight, Mark Swivel skewers our political life: the dominance of corporatism and consumerism and the abandonment of the public sphere. Our politicians are so enthralled by vested interests, so absorbed in their own ambition they are unable to govern in Australia's long-term interest. Swivel rightly argues we all have a part to play in rebuilding and sustaining

The Vietnamese hilltribes made him a demi-god. The CIA wanted to kill him. This is the remarkable true story of Australian war hero Barry Petersen. As he flew over South East Asia towards Vietnam, Captain Barry Petersen struggled to keep an aura of calm. Inwardly he was incredibly excited. Aged 28, highly trained, with experience in anti-communist guerilla warfare, he was about to embark on the biggest and most important mission of his life. In 1963, Australian Army Captain Barry Petersen was sent to Vietnam. It was one of the most tightly held secrets of the Vietnam War: long before combat troops set foot there and under the command of the CIA, Petersen was ordered to train and lead guerilla squads

of Montagnard tribesmen against the Viet Cong in the remote Central Highlands. Petersen successfully formed a fearsome militia, named 'Tiger Men'. A canny leader, he was courageous in battle, and his bravery saw him awarded the coveted Military Cross, and worshipped by the hill tribes. But his success created enemies, not just within the Viet Cong. Like Marlon Brando's character in 'Apocolyse Now', some in the CIA saw Petersen as having gone native. His refusal, when asked, to turn his Tiger Men into assassins as part of the notorious CIA Phoenix Program only strengthened that belief. The CIA strongly resented anyone who stood in their way. Some in the US intelligence were determined Petersen had to go and he was lucky to make it out of the mountains alive. The Tiger Man of Vietnam reveals the compelling true

*The Tiger Moth is one of the major aviation success stories in the history of British aviation. Developed by Geoffrey de Havilland and flown for the first time on October 26 1931, the biplane became the most important elementary trainer used by Commonwealth forces. More than 1,000 Tiger Moths were delivered before WWII, and subsequently around 4,000 were built in the UK with an extra 2,000 being manufactured in Canada, Australia and New Zealand. Following the end of WWII, pilots could buy and modify a Tiger Moth for recreational use or agricultural crop spraying and use it relatively cheaply.*

The tiger isn't just killing people, it's annihilating them, and a team of men and their dogs must hunt it on foot through the forest in the brutal cold. As the trackers sift through the gruesome remains of the victims, they discover that these attacks aren't random: the tiger is apparently engaged in a vendetta. Injured, starving, and extremely dangerous, the tiger must be found before it strikes again. As he re-creates these extraordinary events, John Vaillant gives

And the dispute between whether to kill or protect sharks cuts to the political core of our nation, yet another divide between the right and the left. There is no denying that shark attacks have been increasing in recent years, and so have our fears. Where do we go from here? How worried should we be? Journalist Callum Denness deep-dives into the history of our relationship with sharks, and circles our fear by talking to activists, marine biologists, politicians, surfers, survivors and those who've lost loved ones. The book maps the geography of the LCC phenomenon, explaining the starkly varying success of budget airlines, and assessing their current social, economic and environmental impacts. The book concludes with insights into the future potential of the LCC phenomenon along with its global ramifications. Beginning with Southwest Airlines in the 1970s, low-cost carriers (LCCs) have democratized air travel around the world, fostering huge increases in airline traffic and transforming the airline industry. At the same time however, the ascent of these budget airlines has exacerbated aviation-related problems such as aircraft noise, airport congestion, greenhouse gas emissions and more. From the author of *What the Body Remembers*, an extraordinary story of love and espionage, cultural tension and displacement, inspired by the life of Noor Inayat Khan (code name “Madeleine”), who worked against the Occupation after the Nazi invasion of France. When Noor Khan’s father, a teacher of mystical Sufism, dies, Noor is forced to bow, along with her mother, sister and brother, to her uncle’s religious literalism and ideas on feminine propriety. While at the Sorbonne, Noor falls in love with Armand, a Jewish musician. Though her uncle forbids her to see him, they continue meeting in secret. When the Germans invade in 1940, Armand persuades Noor to leave him for her own safety. She flees with her family to England, but volunteers to serve in a special
