The tropics is an area of enormous opportunity and potential. The countries situated between the Tropics of Cancer and Capricorn are largely developing in nature. There is huge interest in the types of business investments made in Southeast Asia, Central Africa, and the Amazonian tropical belts. These tropical regions continue to face opportunities and challenges in attracting foreign direct investments as well as the need to complement and/or compete with larger economies external to the tropics. This book provides an empirical assessment of the key sociocultural, economic, environmental, and political factors that influence the business dynamics of organizations operating within the tropics. It will address but is not limited to topics such as attracting businesses to the tropics, facilitating smooth, stable conditions for business operations and sustainability, national institutions, and regulations that shape the way business is done, and the increasing deployment of new technologies and entrepreneurial innovations which are defining the global tropics as a distinct business region. It will offer readers a key focus for developing a deeper understanding of the factors and frameworks that influence and shape business activity in the area. While the primary audience for the book consists of academics and students from the fields of economics (environmental economics, developmental economics), business, international trade, tourism, and area studies, it will also provide a practical resource for government policy analysts wanting to fully appreciate some of the key economic and business issues facing the region.

Many of them have appeared only in foreign magazines while others were printed in limited editions which have gone out of print. In J. L. Carr's deeply charged poetic novel, Tom Birkin, a veteran of the Great War and a broken marriage, arrives in the remote Yorkshire village of Oxgodby where he is to restore a recently discovered medieval mural in the local church. Living in the bell tower, surrounded by the resplendent countryside of high summer, and laboring each day to uncover an anonymous painter's depiction of the apocalypse, Birkin finds that he himself has been restored to a new, and hopeful, attachment to life. But summer ends, and with the work done, Birkin must leave. Now, long after, as he reflects on the passage of time and the power of art, he finds in his memories some consolation for all that has been lost.

Presents the contemporary writer's vision of American life, gleaned from his travels throughout the country during the early 1940's. It was as if we 'd reached the minimum critical point of a mathematical curve. Imagine a parabola. Zero point down, at the bottom of an abyss. That 's how low we sank. The year is 1993. Cuba is at the height of the Special Period, a widespread economic crisis following the collapse of the Soviet bloc. For Julia, a mathematics lecturer who hates teaching, this is Year Zero: the lowest possible point. But a way out appears: the search for a missing document that will prove the telephone was invented in Havana, secure her reputation, and give Cuba a purpose once more. What begins as an investigation into scientific history becomes a tangle of sex, friendship, family legacies, and the intricacies of how people find ways to survive in a country at its lowest ebb.

Miller 's groundbreaking first novel, banned in Britain for almost thirty years.

In 1930 Henry Miller moved from New York to Paris, leaving behind — at least temporarily — his tempestuous marriage to June Smith and a novel that had sprung from his anguish over her love affair with a mysterious woman named Jean Kronski. Begun in 1927, *Crazy Cock* is the story of Tony Bring, a struggling writer whose bourgeois inclinations collide with the disordered bohemianism of his much-beloved wife, Hildred, particularly when her lover, Vanya, comes to live with them in their already cramped Greenwich Village apartment. In a world swirling with violence, sex, and passion, the three struggle with their desires, inching ever nearer to insanity, each unable to break away from this dangerous and consuming love triangle.

Winner of the George Polk Award: Charles Rembar's illuminating account of overturning America's obscenity laws and protecting literature from censorship Up until the 1960s, depending on your state of residence, your copy of Henry Miller's Tropic of Cancer might be seized by the US Postal Service before reaching your mailbox. Selling copies of Cleland's Fanny Hill in your bookstore was considered illegal. Lady Chatterley's Lover by D. H. Lawrence was, according to the American legal system, pornography with no redeeming social value. Today, these novels are celebrated for their literary and historic worth. The End of Obscenity is Charles Rembar's account of successfully arguing the merits of such great works of literature in front of the Supreme Court. As the lead attorney on the case, he—with the support of a few brave publishers—changed the way Americans read and honor books, especially the controversial ones. Filled with insight from lawyers, justices, and

the authors themselves, *The End of Obscenity* is a lively tour de force. Racy testimony and hilarious asides make Rembar's memoir not only a page-turner but also an enlightening look at the American legal system.

The author's quest for spiritual renewal is illuminated in descriptions of his impressions of Greece and its people

Henry Miller's famously banned book is "a matter-of-fact celebration of chucking one's dreary life and following your heart to Paris" (Richard Price). Now hailed as an American classic, *Tropic of Cancer*, Henry Miller's masterpiece, was banned as obscene in this country for twenty-seven years after its first publication in Paris in 1934. Only a historic court ruling that changed American censorship standards, ushering in a new era of freedom and frankness in modern literature, permitted the publication of this first volume of Miller's famed mixture of memoir and fiction, which chronicles with unapologetic gusto the bawdy adventures of a young expatriate writer, his friends, and the characters they meet in Paris in the 1930s. *Tropic of Cancer* is now considered, as Norman Mailer said, "one of the ten or twenty great novels of our century."

Dynamite on the Tropic of Cancer is the radical, explosive retelling of the first decade of the 'Father of Modern China' Dr Sun Yatsen's globally shaped formation as a professional revolutionist, and of the impact of the adult Sun's revolutionary relationship with Hawai i and with his varied communities of supporters there during its own most turbulent political

decade, the 1890s, years in which this remote island nation transformed from native monarchy, via sovereign independent republic, to become the USA's first overseas territory. Drawn from neglected primary sources, *Dynamite* reveals the hitherto untold story of the secret revolutionary alliance forged in Honolulu's backstreets between Sun's Xingzhonghui and the idiosyncratic italophile soldier Robert Wilcox, "Hawaii's Garibaldi" and leader of the Kanaka/Native Hawaiian counterrevolution of January 1895. This failed uprising to restore Hawaii's tragic last Queen, witnessed firsthand by Sun Yatsen, became the archetype upon which ten months later Sun would base his own first attempt at armed insurrection in China: the Canton uprising of 26 October 1895. With an epic sweep across the Pacific's Tropic of Cancer, *Dynamite* is the most important study yet written on the origins of Sun Yatsen's Chinese Revolution and its dynamic interface with Hawaiian history.

Fearless, iconic poet, novelist, and feminist Erica Jong offers a fascinating in-depth appreciation of the controversial life and work of American literary giant Henry Miller. *Henry Miller (Tropic of Cancer)* and *Erica Jong (Fear of Flying)* are true literary soul mates. Both authors have been, in equal measure, lauded for their creative genius and maligned for their frank treatment of human sexuality. So who better than Erica Jong to offer an expert appraisal and appreciation of Henry Miller, the man and his art? At once a critical study, a biography, a memoir of a remarkable friendship, and a celebration of the life and work of the author whom Erica Jong compares to Whitman, *The Devil at Large* explores the peaks and valleys of Miller's storied writing career. It examines his tumultuous relationships—including his doomed marriage to June Mansfield and his lifelong tenuous bond with his mother—and confirms his standing as a creative genius. Jong, a renowned feminist, courageously answers critics who accuse her subject of degrading women in his fiction, suggesting instead that he sought to demystify them by means of the "violent verbal magic of his books." With grace, wit, warmth, and intelligence, Jong brings readers close to the man and his writing. There has never been a more incisive and insightful analysis of this exceptional American master. This ebook features an illustrated biography of Erica Jong including rare photos and never-before-seen documents from the author's personal collection.

"David Foster Wallace meets Gabriel Garcia Marquez" in this novel set in a dystopian Los Angeles from a National Book Award finalist (Publishers Weekly). Irreverently juggling magical realism, film noir, hip hop, and chicanismo, *Tropic of Orange* takes place in a Los Angeles where the homeless, gangsters, infant organ entrepreneurs, and Hollywood collide on a stretch of the Harbor Freeway. Hemmed in by wildfires, it's a symphony conducted from an overpass, grandiose, comic, and as diverse as the city itself—from an author who has received the California Book Award and the Association for Asian American Studies Book Award, among other literary honors. is a novel of dystopia and apocalypse; the mystery concerns the tragic flaws of human nature.” —Library Journal (starred review) “Brilliant . . . An ingenious interpretation of social woes.” —Booklist (starred review)

An engaging invitation to rediscover Henry Miller—and to learn how his anarchist sensibility can help us escape “the air-conditioned nightmare” of the modern world The American writer Henry Miller's critical reputation--if not his popular readership--has been in eclipse at least since Kate Millett's blistering critique in Sexual Politics, her landmark 1970 study of misogyny in literature and art. Even a Miller fan like the acclaimed Scottish writer John Burnside finds Miller's "sex books"—including The Rosy Crucifixion, Tropic of Cancer, and Tropic of Capricorn—"boring and embarrassing." But Burnside says that Miller's notorious image as a "pornographer and woman hater" has hidden his vital, true importance—his anarchist sensibility and the way it shows us how, by fleeing from conformity of all kinds, we may be

able to save ourselves from the "air-conditioned nightmare" of the modern world. Miller wrote that "there is no salvation in becoming adapted to a world which is crazy," and in this short, engaging, and personal book, Burnside shows how Miller teaches us to become less adapted to the world, to resist a life sentence to the prison of social, intellectual, emotional, and material conditioning. Exploring the full range of Miller's work, and giving special attention to *The Air-Conditioned Nightmare* and *The Colossus of Maroussi*, Burnside shows how, with humor and wisdom, Miller illuminates the misunderstood tradition of anarchist thought. Along the way, Burnside reflects on Rimbaud's enormous influence on Miller, as well as on how Rimbaud and Miller have influenced his own writing. An unconventional and appealing account of an unjustly neglected writer, *On Henry Miller* restores to us a figure whose searing criticism of the modern world has never been more relevant.

This book focuses on our emotional responses to cancer by offering a range of perspectives: psychoanalytic, medical, spiritual and religious, as well as literary. Once suppressed, akin to a taboo, the topic of cancer is now very much in the public consciousness. The prevalence of the disease and well-publicised medical advances in its treatment demand it. *Topic of Cancer* begins with Freud's cancer, widely known of but rarely understood in its historic and analytic context. Psychotherapeutic reflections are then offered on our understanding of the adult and adolescent with cancer, and the challenges of sustaining a thoughtful presence in the face of the trauma experienced when a child is diagnosed with cancer, and during treatment. The dilemmas and challenges faced by today's psychotherapist with cancer are explored next and, for the first time in cancer literature, an account of the emotional demands on nurses involved in sensitive, intimate care. With an increasing number of people living longer with cancer, "survivorship" and palliative care are the focus of the chapters that follow.

Banned in America for almost thirty years because of its explicit sexual content, this companion volume to Miller's Tropic of Cancer chronicles his life in 1920s New York City. Famous for its frank portrayal of life in Brooklyn's ethnic neighborhoods and Miller's outrageous sexual exploits, The Tropic of Capricorn is now considered a cornerstone of modern literature.

Please note: This is a companion version & not the original book. Sample Book Insights: #1 I was sent to Paris for a reason I have yet to understand. I have no money, resources, or hopes. I am the happiest man alive. The world around me is dissolving, and I am left with only spots of time. #2 I have lunch with Borowski on Wednesday. His wife, who is a cow, officiates. I do not share Van Norden's opinion of himself. I do not agree that he is a philosopher or a thinker. He is just cunt-struck. #3 I am a sentient being stabbed by the miracle of these waters that reflect a forgotten world. I am suffocated by it. No one can communicate even a fraction of their feelings to me. #4 Irène had a valise instead of a cunt. She wanted fat letters to shove in her valise. She was a liar, and never bought a bed for her King Carol. She wanted extension pricks, self-exploding rockets, and hot boiling oil made of wax and creosote.

Continuing the subversive self-revelation begun in Tropic of Cancer and Tropic of Capricorn, Henry Miller takes readers along a mad, free-associating journey from the damp grime of his Brooklyn youth to the sun-splashed cafes and squalid flats of Paris. With incomparable glee, Miller shifts effortlessly from Virgil to venereal disease, from Rabelais to Roquefort. In this seductive technicolor swirl of Paris and New York, he captures like no one else the blending of people and the cities they inhabit.
