Why are we interested in history at all? Why do we feel the need to distinguish between past and present? This book investigates how the notion of sublime historical experience complicates and challenges existing conceptions of language, truth, and knowledge.

History, the Middle Ages, the Renaissance

A Study of the Forms of Life, Thought and Art in France and the Netherlands in the XIVth and XVth Centuries

Historians have conventionally viewed intellectual and artistic achievement as a seamless progression in a single direction, with the Renaissance, as identified by Jacob Burckhardt, as the root and foundation of modern culture. But in this brilliant new analysis William Bouwsma rethinks the accepted view, arguing that while the Renaissance had a beginning and, unquestionably, a climax, it also had an ending. Examining the careers of some of the greatest figures of the age—Montaigne, Galileo, Janson, Descartes, Hooker, Shakespeare, and Cervantes among many others—Bouwsma perceives in their work a growing sense of doubt and anxiety about the modern world. He considers first those features of modern European culture generally associated with the traditional Renaissance, features which reached their climax in the late sixteenth and early seventeenth centuries. But even as the movements of the Renaissance gathered strength, simultaneous impulses operated in a contrary direction. Bouwsma identifies a growing concern with personal identity, shifts in the interests of major thinkers, a decline in confidence about the future, and a heightening of anxiety. Exploring the fluctuating and sometimes contradictory atmosphere in which Renaissance artists and thinkers operated, Bouwsma shows how the very liberation from old boundaries and modes of expression that characterized the Renaissance became itself increasingly stifling and destructive. By drawing attention to the waning of the Renaissance culture of freedom and creativity, Bouwsma offers a wholly new and intriguing interpretation of the place of the European Renaissance in modern culture.

At the beginning of the period Rome was old and worn out with misgovernment and evil living. But planted in this dying Rome there was the new and vigorous Christian Church which was to draw up into itself all that was best and strongest of the old world. The Germans were rude and uncivilized, but they were strong in mind and body, and possessed some ideas about government, women, and the family which were better than the ideas of the Romans on these subjects.

The Story of the Middle Ages

A study of the forms of life, thought, and art in France and the Netherlands in the XIVth and XVth centuries.

This collection by the distinguished Dutch historian Johan Huizinga (1872-1945) reflects the theme of its key essay, "The Task of Cultural History," throughout its pages. Huizinga's conception of cultural history informs both his essays on historiographic questions and those on such figures as John of Salisbury, Abelard, Joan of Arc, Erasmus, and Grotius. "Here is the first full translation into English of one of the 20th century's few undoubted classics of history." —Washington Post Book World The Autumn of the Middle Ages is Johan Huizinga's classic portrait of life, thought, and art in fourteenth- and fifteenth-century France and the Netherlands. Few who have read this book in English realize that The Waning of the Middle Ages, the only previous translation, is vastly different from the original Dutch, and incompatible will all other European-language translations. For Huizinga, the fourteenth- and fifteenth-century marked not the birth of a dramatically new era in history—the Renaissance—but the fullest, ripest phase of medieval life and thought. However, his work was criticized both at home and in Europe for being "old-fashioned" and "too literary" when The Waning of the Middle Ages was first published in 1919. In the 1924 translation, Fritz Hopman adapted, reduced and altered the Dutch edition—softening Huizinga's passionate arguments, dulling his nuances, and eliminating theoretical passages. He dropped many passages Huizinga had quoted in their original old French. Additionally, chapters were rearranged, all references were dropped, and mistranslations were introduced. This translation corrects such errors, recreating the second Dutch edition which represents Huizinga's thinking at its most important stage. Everything that was dropped or rearranged has been restored. Prose quotations appear in French, with translations preprinted at the bottom of the page, mistranslations have been corrected. "The advantages of the new translation are so many. . . . It is one of the greatest, as well as one of the most enthralling, historical classics of the twentieth century, and everyone will surely want to read it in the form that was obviously intended by the author." —Francis Haskell, New York Review of Books "A once pathbreaking piece of historical interpretation. . . . This new translation will no doubt bring Huizinga and his pioneering work back into the discussion of historical interpretation." —Rosamond McKitterick, New York Times Book Review

Contesting the Middle Ages is a thorough exploration of recent arguments surrounding nine hotly debated topics: the decline and fall of Rome, the Viking invasions, the Crusades, the persecution of minorities, sexuality in the Middle Ages, women within medieval society, intellectual and environmental history, the Black Death, and, lastly, the waning of the Middle Ages. The historiography of the Middle Ages, a term in itself controversial amongst medieval historians, has been continuously debated and rewritten for centuries. In each chapter, John Aberth sets out key historiographical debates in an engaging and informative way, encouraging students to consider the process of writing about history and prompting them to ask questions even of already thoroughly debated subjects, such as why the Roman Empire fell, or what significance the Black Death had both in the late Middle Ages and beyond. Sparking discussion and inspiring examination of the past and its ongoing significance in modern life, Contesting the Middle Ages is essential reading for students of medieval history and historiography.

The Waning Age

The Waning of the Middle Ages: a Study of the Forms of Life, Thought and Art in France and the Netherlands in the Fourteenth and Fifteenth Centuries

History has always been far more engrossed by problems of origins than by those of decline and fall. When studying any period, we are always looking for the promise of what the next is to bring. Ever since Herodotus, and earlier still the questions imposing themselves upon the mind have been concerned with the rise of families, nations, kingdoms, social forms, or ideas. So, in medieval history, we have been searching so diligently for the origins of modern culture, that at times it would seem as though what we call the Middle Ages had been little more than the prelude to the Renaissance. But in history, as in nature, birth and death are equally balanced. The decay of overripe forms of civilisation is as suggestive a spectacle as the growth of new ones. And it occasionally happens that a period in which one had, hitherto, been mainly looking for the coming to birth of new things, suddenly reveals itself as an epoch of fading and decay. The present work deals with the history of the fourteenth and fifteenth centuries regarded as a period of termination, as the close of the Middle Ages. Such a view of them presented itself to the author of this volume, whilst endeavouring to arrive at a genuine understanding of the art of the brothers van Eyck and their contemporaries, that is to say, to grasp its meaning by seeing it in connexion with the entire life of their times. Now the common feature of the various manifestations of civilisation of that epoch proved to be inherent rather in that which links them to the past than in the germs which they contain of the future. The significance, not of the artists alone, but also of theologians, poets, chroniclers, princes, and statesmen, could be best appreciated by considering them, not as the harbingers of a coming culture, but as perfecting and concluding the old.
