

The World That Made New Orleans From Spanish Silver To Congo Square Ned Sublette

How four revolutionary ideas from the Enlightenment shaped today's world This panoramic book tells the story of how revolutionary ideas from the Enlightenment about freedom, equality, evolution, and democracy have reverberated through modern history and shaped the world as we know it today. A testament to the enduring power of ideas, The Shape of the New offers unforgettable portraits of Adam Smith, Thomas Jefferson, Alexander Hamilton, Charles Darwin, and Karl Marx—heirs of the Enlightenment who embodied its highest ideals about progress—and shows how their thoughts, over time and in the hands of their followers and opponents, transformed the very nature of our beliefs, institutions, economies, and politics. Yet these ideas also hold contradictions. They have been used in the service of brutal systems such as slavery and colonialism, been appropriated and twisted by monsters like Stalin and Hitler, and provoked reactions against the Enlightenment's legacy by Islamic Salafists and the Christian Religious Right. The Shape of the New argues that it is impossible to understand the ideological and political conflicts of our own time without familiarizing ourselves with the history and internal tensions of these world-changing ideas. With passion and conviction, it exhorts us to recognize the central importance of these ideas as historical forces and pillars of the Western humanistic tradition. It makes the case that to read the works of the great thinkers is to gain invaluable insights into the ideas that have shaped how we think and what we believe.

What would the world look like if America were to reduce its role as a global leader in order to focus all its energies on solving its problems at home? And is America really in decline? Robert Kagan, New York Times best-selling author and one of the country's most influential strategic thinkers, paints a vivid, alarming picture of what the world might look like if the United States were truly to let its influence wane. Although Kagan asserts that much of the current pessimism is misplaced, he warns that if America were indeed to commit preemptive superpower suicide, the world would see the return of war among rising nations as they jostle for power: the retreat of democracy around the world as Vladimir Putin's Russia and authoritarian China acquire more clout; and the weakening of the global free-market economy, which the United States created and has supported for more than sixty years. We've seen this before - in the breakdown of the Roman Empire and the collapse of the European order in World War I. Potent, incisive, and engaging, The World America Made is a reminder that the American world order is worth preserving, and America dare not decline.

Offers a critical and cultural history of "The New Yorker" from its founding in 1919 through 1987, discussing the evolution of the magazine's content over the years and its role in American cultural life

Understand where we came from. Whether you're an avid student of the Bible or a skeptic of its relevance, The Book That Made Your World will transform your perception of its influence on virtually every facet of Western civilization. Indian philosopher Vishal Mangalwadi reveals the personal motivation that fueled his own study of the Bible and systematically illustrates how its precepts became the framework for societal structure throughout the last millennium. From politics and science, to academia and technology, the Bible's sacred copy became the key that unlocked the Western mind. Through Mangalwadi's wide-ranging and fascinating investigation, you'll discover: What triggered the West's passion for scientific, medical, and technological advancement How the biblical notion of human dignity informs the West's social structure and how it intersects with other worldviews How the Bible created a fertile ground for women to find social and economic empowerment How the Bible has uniquely equipped the West to cultivate compassion, human rights, prosperity, and strong families The role of the Bible in the transformation of education How the modern literary notion of a hero has been shaped by the Bible's archetypal protagonist Journey with Mangalwadi as he examines the origins of a civilization's greatness and the misguided beliefs that threaten to unravel its progress. Learn how the Bible transformed the social, political, and religious institutions that have sustained Western culture for the past millennium, and discover how secular corruption endangers the stability and longevity of Western civilization. Endorsements: "This is an extremely significant piece of work with huge global implications. Vishal brings a timely message." (Ravi Zacharias, author, Walking from East to West and Beyond Opinion) "In polite society, the mere mention of the Bible often introduces a certain measure of anxiety. A serious discussion on the Bible can bring outright contempt. Therefore, it is most refreshing to encounter this engaging and informed assessment of the Bible's profound impact on the modern world. Where Bloom laments the closing of the American mind, Mangalwadi brings a refreshing optimism." (Stanley Mattson, founder and president, C. S. Lewis Foundation) "Vishal Mangalwadi recounts history in very broad strokes, always using his cross-cultural perspectives for highlighting the many benefits of biblical principles in shaping civilization." (George Marsden, professor, University of Notre Dame; author, Fundamentalism and American Culture)

Mark Childress is is an artist, with an ear comparable to Eudora Welty's, which to me is the highest praise one can give. I haven't read a Southern novel since Losing Battles that has given me such pleasure. -- Harper Lee, author of To Kill a Mockingbird The sense of reality with which Childress imbues his characters and their situation is remarkable. He has the true novelist's ability to commit himself entirely to the people and events he envisions, and this is rare: the reader is certain at all points that the author is not playing with the subject, but writing from deep within it. A truly outstanding book is the result. -- James Dickey A World Made of Fire is earthy, adroit, moving -- an excellent novel by a writer of great promise and talent. -- Jesse Hill Ford Mark Childress is a young novelist who has written a memorable story out of the land and people of the Deep South that throughout its length is constantly intruguing with unexpected innovations. The ever-present undercurrent of mystical events will probably startle many readers by arousing and bringing forth unfamiliar emotions. -- Erskine Caldwell A wonderful and powerful novel...Childress's debut in the world of fiction is a cause to be celebrated: he is the real thing. -- Pat Conroy Mark Childress's new-fashioned saga is full of delicate electricity and raw power. -- Barry Hannah This is a damned fine story. There is more here than story, though. This baby resonates. Mark Childress is a writer of almost uncanny stylistic ability and clear vision. His eye for detail is extraordinary. It makes you want to holler Oh yeah! like a guy who's gotten religion at a riverside camp meeting. It's close; it's luxurious in its rightness; it fulfills the central demand of art...to make us see more in what we always thought we were seeing. -- Stephen King A haunting first novel...There is a clear light of genuine story-telling talent shining through it all. -- Library Journal In an impressive debut, Childress has produced a spellbinding tale in the Southern gothic tradition. A writer of poetic acuity, he evokes the atmospher of a small Southern town and brings its inhabitants to life through their colorful, softly cadenced speech. Childress's remarkable command of language -- he uses imagery with sensuous skill -- his sure sense of plot, fueled by mysticism and mystery, and most of all, his beautifully nuanced depiction of Stella's coming of age, will keep readers enthralled. -- Publishers Weekly That rarest of finds, an unsentimental coming-of-age story, A World Made of Fire is also an engrossing mystery. Wrapped in its tale of voodoo and midnight rides is a detailed bestiary of human emotions and behaviors. San Francisco Chronicle Mark Childress's first novel is a complex allegory of pagan magic and Christian retribution... Mr. Childress writes his haunting novel with poetic cadences in brief, intense chapters. He is an author of imagination. Stella's coming of age in grief and loneliness is drawn wth graceful authenticity. -- Valerie Miner, The New York Times Book Review A startlingly original first novel. Not only do a great many marvelous things happen, they do so in a time and place so untapped that Childress is able to claim the territory as his alone. He has marked himself, at the tender age of twenty-six, as a major new fictional voice. -- Bruce van Wyngarden, Saturday Review

The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland, strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear, jeopardising the future that is within their grasp. The Silent Earth Series Book 1 - After the Winter:

"In 2017, as Ben Rhodes was helping former president Barack Obama begin his next chapter, the legacy they worked to build for eight years was being taken apart. To understand what was happening in his own country, Rhodes decided to look outward, at the wider world. Over the next three years, he traveled to dozens of countries, meeting with politicians, dissidents, and activists confronting the same forces that produced the Trump presidency: spreading nationalism, authoritarianism, and disinformation. Along the way, he was spied on by former Mossad operatives and the Chinese government, met with Hong Kong protesters and Russian oppositionists, and found people from Europe to Asia to the United States struggling to reconcile their own identities with the crude nationalism of their leaders--all while pursuing new strategies to fight back. Equal parts memoir and reporting, 'After the Fall' is an ambitious and essential work of discovery. Throughout, Rhodes reflects on how the 2008 financial crisis completed a collapse of public confidence in America, globalization, and democracy itself, opening a door to the wave of strongman leaders who have transformed our world--men like Viktor Orban in Hungary, Vladimir Putin in Russia, and Xi Jinping in China. He wrestles with how peoples' yearning for identity and belonging has been weaponized by nationalists. And he learns from a diverse set of characters--from Obama to rebels to rising politicians--how we can choose a more hopeful story going forward"--Publisher's description.

VISIONARIES ARE THE KEY TO MAKING OUR WORLD A BETTER PLACE! In compelling, concise, easy-to-read chapters, **Visionary: Making a Difference in a World that Needs You** makes the case that ordinary people can create extraordinary change in the world by learning and applying four basic principles distilled from visionaries of our past and present. You'll discover: The major difference between a visionary and a dreamer A step-by-step process for finding how you are best suited to make a difference in the world A step-by-step process for crafting an inspiring vision for you or your organization A step-by-step process for creating a practical roadmap to achieving your vision Four questions you must answer before people will buy-in to your vision Six characteristics of someone who has found their purpose How busy people can still make a difference in the world Filled with practical, actionable strategies and exercises. This book will guide you to a life of meaning, contribution, vision and purpose.

FRIGHTENED MONSTERS. STOLEN TIME. AND ONE SERIOUSLY UNDERESTIMATED DAMSEL. Katie ran from the magical world years ago. She never planned on being dragged back in by a prophesying clamshell. The seers believe she alone can prevent an apocalypse of ruined time and broken worlds. Bran the Crow King believes she can save him from his cannibalistic grandfather. Katie believes they're all nuts. One thing is for certain: she's not waiting around for help. Operation Katie Saves her Own Damn Self is officially on.

A monumental, groundbreaking work, now in paperback, that shows how technological and strategic revolutions have transformed the battlefield Combining gripping narrative history with wide-ranging analysis, War Made New focuses on four "revolutions" in military affairs and describes how inventions ranging from gunpowder to GPS-guided air strikes have remade the field of battle—and shaped the rise and fall of empires. War Made New begins with the Gunpowder Revolution and explains warfare's evolution from ritualistic, drawn-out engagements to much deadlier events, precipitating the rise of the modern nation-state. He next explores the triumph of steel and steam during the Industrial Revolution, showing how it powered the spread of European colonial empires. Moving into the twentieth century and the Second Industrial Revolution, Boot examines three critical clashes of World War II to illustrate how new technology such as the tank, radio, and airplane ushered in terrifying new forms of warfare and the rise of centralized, and even totalitarian, world powers. Finally, Boot focuses on the Gulf War, the invasion of Afghanistan, and the Iraq War—arguing that even as cutting-edge technologies have made America the greatest military power in world history, advanced communications systems have allowed decentralized, "irregular" forces to become an increasingly significant threat.

In the recent past, enormous creative energy has gone into the study of American slavery, with major explorations of the extent to which African culture affected the culture of black Americans and with an almost totally new assessment of slave culture as Afro-American. Accompanying this new awareness of the African values brought into America, however, is an automatic assumption that white traditions influenced black ones. In this view, although the institution of slaver is seen as important, blacks are not generally treated as actors nor is their "divergent culture" seen as having had a wide-ranging effect on whites. Historians working in this area generally assume two social systems in America, one black and one white, and cultural divergence between slaves and masters. It is the thesis of this book that blacks, Africans, and Afro-Americans, deeply influenced white's perceptions, values, and identity, and that although two world views existed, there was a deep symbiotic relatedness that must be explored if we are to understand either or both of them. This exploration raises many questions and suggests many possibilities and probabilities, but it also establishes how thoroughly whites and blacks intermixed within the system of slavery and how extensive was the resulting cultural interaction.

The perfect reality is just a thought away, but it comes at a chilling price. In a near future world, a social network by the name of MINDS gifts its users with the unique ability to communicate directly by thoughts and recreate reality by their deepest fantasies and desires. In the MINDS network, desires are actualized in a spilt of a second and unwanted elements erased from reality. The advanced algorithms of MINDS enable the user to virtually visit any place in the world or in history within seconds, in an utterly realistic three-dimensional reality. Humans can use their mind to determine everything they please - from the weather to the way their friends look like and behave. But the ultimate comfort comes at a price, and the unexpected results reveal the grand plan behind MINDS. What stands behind this magnificent social network, and what are the consequences when the virtual merges with the actual? Netopia follows the heroes of the network in the days before its establishment, through its launch, relationships and love, and the unexpected change it wreaks on the enthusiastic users who had no idea what awaited them the moment they gave up control over their minds. Is the MINDS network a dream come true or a nightmare come to life? Netopia is beyond science fiction: it is a groundbreaking novel that explores the implications of communication technology on human nature and society, the preference of warmth for realistic animal doll pets but coldness towards humans. the novel speaks to the connected and to the disconnected, to the great minds and the Neverminds. Netopia is a gleaming hope and a dark warning. So, where is your mind? Scroll up to grab your copy now.

A bold new critique of the accepted history of figurative painting in the twentieth century

A reevaluation of the master-slave relationship in American history.

Unafraid to speak her mind and famously tenacious in her convictions, Eleanor Roosevelt was still mourning the death of FDR when she was asked by President Truman to lead a controversial commission, under the auspices of the newly formed United Nations, to forge the world ' s first international bill of rights. A World Made New is the dramatic and inspiring story of the remarkable group of men and women from around the world who participated in this historic achievement and gave us the founding document of the modern human rights movement. Spurred on by the horrors of the Second World War and working against the clock in the brief window of hope between the armistice and the Cold War, they grappled together to articulate a new vision of the rights that every man and woman in every country around the world should share, regardless of their culture or religion. A landmark work of narrative history based in part on diaries and letters to which Mary Ann Glendon, an award-winning professor of law at Harvard University, was given exclusive access, A World Made New is the first book devoted to this crucial turning point in Eleanor Roosevelt ' s life, and in world history. Finalist for the Robert F. Kennedy Book Award

Concrete: We use it for our buildings, bridges, dams, and roads. We walk on it, drive on it, and many of us live and work within its walls. But very few of us know what it is. We take for granted this ubiquitous substance, which both literally and figuratively comprises much of modern civilization's constructed environment; yet the story of its creation and development features a cast of fascinating characters and remarkable historical episodes. This book delves into this history, opening readers' eyes at every turn. In a lively narrative peppered with intriguing details, author Robert Corland describes how some of the most famous personalities of history became involved in the development and use of concrete—including King Herod the Great of Judea, the Roman emperor Hadrian, Thomas Edison (who once owned the largest concrete cement plant in the world), and architect Frank Lloyd Wright. Courland points to recent archaeological evidence suggesting that the discovery of concrete directly led to the Neolithic Revolution and the rise of the earliest civilizations. Much later,

the Romans reached extraordinarily high standards for concrete production, showcasing their achievement in iconic buildings like the Coliseum and the Pantheon. Amazingly, with the fall of the Roman Empire, the secrets of concrete manufacturing were lost for over a millennium. The author explains that when concrete was rediscovered in the late eighteenth century it was initially viewed as an interesting novelty or, at best, a specialized building material suitable only for a narrow range of applications. It was only toward the end of the nineteenth century that the use of concrete exploded. During this rapid expansion, industry lobbyists tried to disguise the fact that modern concrete had certain defects and critical shortcomings. It is now recognized that modern concrete, unlike its Roman predecessor, gradually disintegrates with age. Compounding this problem is another distressing fact: the manufacture of concrete cement is a major contributor to global warming. Concrete Planet is filled with incredible stories, fascinating characters, surprising facts, and an array of intriguing insights into the building material that forms the basis of the infrastructure on which we depend.

In this “richly imagined” dystopian vision, mankind must find a way to survive as modern civilization slowly comes apart (O, The Oprah Magazine). When Earth ran dry of oil, the age of the automobile came to an end: electricity flickered out. With deprivation came desperation—and desperation drove humanity backward to a state of existence few could have imagined. In the tiny hamlet of Union Grove, New York, every day is a struggle. For Mayor Robert Earle, it is a battle to keep the citizens united. As the bonds of civilization are torn apart by war, famine, and violence, there are some who aim to carve out a new society: one in which might makes right—a world of tyranny, subjugation, and death. A world Earle must fight against . . . In his shocking nonfiction work, The Long Emergency, social commentator James Howard Kunstler explored the reality of what would happen if the engines stopped running. In World Made by Hand, he offers a stark glimpse of that future in a work of speculative fiction that stands as “an impassioned and invigorating tale whose ultimate message is one of hope, not despair” (San Francisco Chronicle). “Brilliant.” —Alan Cheuse, Chicago Tribune “It frightens without being ridiculously nightmarish, it cautions without being too judgmental, and it offers glimmers of hope we don’t have to read between the lines to comprehend.” —Baltimore City Paper

From the award-winning and bestselling author of Cod comes the dramatic, human story of a simple substance, an element almost as vital as water, that has created fortunes, provoked revolutions, directed economies and enlivened our recipes. Salt is common, easy to obtain and inexpensive. It is the stuff of kitchens and cooking. Yet trade routes were established, alliances built and empires secured – all for something that filled the oceans, bubbled up from springs, formed crusts in lake beds, and thickly veined a large part of the Earth’s rock fairly close to the surface. From pre-history until just a century ago – when the mysteries of salt were revealed by modern chemistry and geology – no one knew that salt was virtually everywhere. Accordingly, it was one of the most sought-after commodities in human history. Even today, salt is a major industry. Canada, Kurlansky tells us, is the world’s sixth largest salt producer, with salt works in Ontario playing a major role in satisfying the Americans’ insatiable demand. As he did in his highly acclaimed Cod, Mark Kurlansky once again illuminates the big picture by focusing on one seemingly modest detail. In the process, the world is revealed as never before.

In the #1 New York Times bestseller, The World Needs Who You Were Made to Be, Joanna Gaines celebrates how creativity and acceptance can come together to make for a bright and beautiful adventure. The book, illustrated by Julianna Swaney, follows a group of children as they each build their very own hot-air balloons. As the kids work together, leaning into their own skills and processes, we discover that the same is true for life—it’s more beautiful and vibrant when our differences are celebrated. Together with Joanna, you and your kids will take a journey of growth and imagination as you learn in full color to: Celebrate every child’s one-of-a-kind strengths and differences Embrace teamwork Share our talents and abilities to make everything more beautiful Lend a helping hand and do our best to show kindness and take care of one another The World Needs Who You Were Made to Be is a vibrant picture book perfect for: Ages 4-8 Grandparents, parents, teachers, and librarians Classroom story times and discussions about diversity and being a good human being Households that enjoy watching Chip and Joanna on Magnolia Network and HGTV’s Fixer Upper With plenty of pink, a bounty of blue, orange and green and yellow too, this vibrant hot-air balloon adventure celebrates every child and teaches kids that we are in this together. “You’re one of a kind, and it’s so clear to see: The world needs who you were made to be.”

NEW YORK TIMES BESTSELLER • REESE’S BOOK CLUB PICK • From a leading voice on racial justice, an eye-opening account of growing up Black, Christian, and female that exposes how white America’s love affair with “diversity” so often falls short of its ideals. “Austin Channing Brown introduces herself as a master memoirist. This book will break open hearts and minds.”—Glennon Doyle, #1 New York Times bestselling author of Untamed Austin Channing Brown’s first encounter with a racialized America came at age seven, when she discovered her parents named her Austin to deceive future employers into thinking she was a white man. Growing up in majority-white schools and churches, Austin writes, “I had to learn what it means to love blackness,” a journey that led to a lifetime spent navigating America’s racial divide as a writer, speaker, and expert helping organizations practice genuine inclusion. In a time when nearly every institution (schools, churches, universities, businesses) claims to value diversity in its mission statement, Austin writes in breathtaking detail about her journey to self-worth and the pitfalls that kill our attempts at racial justice. Her stories bear witness to the complexity of America’s social fabric—from Black Cleveland neighborhoods to private schools in the middle-class suburbs, from prison walls to the boardrooms at majority-white organizations. For readers who have engaged with America’s legacy on race through the writing of Ta-Nehisi Coates and Michael Eric Dyson, I’m Still Here is an illuminating look at how white, middle-class, Evangelicalism has participated in an era of rising racial hostility, inviting the reader to confront apathy, recognize God’s ongoing work in the world, and discover how blackness—if we let it—can save us all.

The World We Made: Alex McKay’s Story from 2050

Maybe you’re a recent college graduate, looking for a successful start to your career. Or an experienced professional, feeling the need to try something new. Either way, a whole host of opportunities await you-but if you really hope to ace that interview and get the job you want, you’ll need the right skills to get ahead. So when you’re navigating the complex twists and turns of today’s changing job market, let I’ll Get That Job! serve as your road map and guide. Featuring advice from real HR professionals, headhunters, and team managers, this essential job-hunting companion will let you know exactly what you need to do to increase your chances, from social media presence to writing a great CV. While shedding light on the many myths and outdated “rules” that may actually bog you down in today’s job-seeking experience, I’ll Get That Job! serves as a source of motivation and encouragement for modern job hunters. After all, with hard work and the right mind-set, it really is possible for you to get that job you’ve always wanted-and become the most successful version of yourself along the way!

The World That Made New OrleansFrom Spanish Silver to Congo SquareChicago Review Press

By the time he is twelve, Frank Levy understands that to attain his wishes, he must depend upon himself. In the young adult edition of Life with an Accent we meet Levy as a happy toddler oblivious to political dangers. Seeking safety, in 1936 his family moves from Germany to the British Mandate of Palestine. Ten years later they emigrate to America to be with grandma. Again, Levy must change languages, cultures, even his name. With every effort to adapt, he sees that the history we live through matters.

Simple prayers of thanksgiving for God’s wonderful world and his creations come easily with this fun book based on the rhyme. The colorful, simple art style is perfect for young children.

Our planet’s future is too often described in terms of doom and despair. However, there is another perspective that is not only positive, but credible, too. The World We Made describes a planet that is green, fair, connected, and collaborative. Based on extensive research, leading environmentalist Jonathon Porritt reveals how we can achieve a genuinely sustainable world by 2050 if we act immediately. Part history, part narrative, The World We Made describes the key events, technological breakthroughs, and lifestyle revolutions that could transform our planet, covering topics as wide-ranging as 3D printing, personal genomics, urban agriculture, and the digital landscape. The book’s innovative ideas are brought to life with futuristic photographs, infographics, and hand-drawn sketches, while an extensive index provides the tools and tips needed to prepare for what’s ahead. The World We Made is essential reading for anyone interested in preserving our planet. All royalties will support the work of Forum for the Future, one of the world’s leading sustainable development non-profits.

Half-Shell Prophecies

The Strange and Fascinating Story of the World’s Most Common Man-Made Material

All Things Made New explores the Christian mysteries in the tradition of St. John the Evangelist, and Mary, the Mother of Jesus, by studying the symbolism, cosmology, and meaning of the Book of Revelation, as well as the prayers and meditations of the Rosary, including the Apostles’ Creed and the Our Father. These reflections lead us step by step through the Cross, and to the Wedding Feast of the Lamb, where all things are made new. "A lucid and thoughtful exposition of what is, by any standards, an extraordinarily dense and difficult book. Caldecott explains that the Apocalypse 'has to be received into the soul'; indeed, it is intensely relevant to our own times. His book is both rich in knowledge and insight, and in the clarity of his writing. Francis Phillips, Catholic Herald "The time may be right for just such a book as this, which takes seriously both the book of Revelation and the richness of the 'Here comes everybody' that is Catholic culture, which has a lively message to address to our bruised and battered world today." - Nicholas King, The Tablet "All Things Made New is a serious and thoughtful work that addresses the most serious of things, the mysteries of faith, which all of us should encounter frequently and grasp ever more deeply. A book that will leave the reader wiser, holier, and both ready to practice the faith and eager to share it." - Fr. C. John McCloskey, National Catholic Register

A simple but challenging children’s activity puzzle book with 50 puzzles that helps to develop good hand-eye co-ordination and improve spelling. Don’t insult your children by giving them easy activity puzzle books. Children want and need to be challenged. Challenges build character. Using a pair of scissors is an excellent way to develop good hand-eye coordination and dexterity.

When the Romans retreated from northern Europe, they left behind lands of barbarians at the very edge of the known world. Yet a thousand years later the countries surrounding the North Sea were at the heart of scientific, mercantile and artistic enlightenments and controlled the first truly global empires. In The Edge of the World, Michael C. Corbett tells the story of the treacherous body of water inspired the saints, spies, fisherman, pirates, traders and marauders who lived beside and journeyed across the North Sea to give birth to our modern world. Hugely enjoyable.' Tom Holland, Guardian 'Pye is a wonderful historian.' Terry Jones 'Astonishing. A treasure chest.' The Times 'A dazzling historical adventure.' Daily Telegraph

Mead’s fifth collection candidly and openly explores the long process that is death. These resonant poems discover what it means to live, die, and come home again. We’re drawn in by sorrow and grief, but also the joys of celebrating a long life and how simple it is to find laughter and light in the quietest and darkest of moments. How the World Was Made is a traditional Cherokee creation story. It takes place during a time when animals did many of the things that people can do. When the earth was young, the animals lived on a rock above it, and the earth was covered with water. The animals needed more room, but where could they find it? This book retells the story of how the earth was created, while teaching the valuable lesson that even the smallest creature can make a big difference. Written in both Cherokee and English so readers can become acquainted with the Cherokee syllabary and language.

The Edge of the World

World of Made and Unmade

Why the Age of Exploration Happened & how it Changed the World

The Understandable Version of the Book of Isaiah!

Being American in the World We Made

All Things Made New

The Shape of the New

Provides a history of how scientists have taken raw materials and turned them into new and usable "stuff," and includes interviews with experts in the field

'A work of remarkable scope' – Guardian FT Best science books of 2018 Primate Change has been adapted into a radio series for the BBC WORLD SERVICE. * This is the road from climate change to primate change. PRIMATE CHANGE is a wide-ranging, polemical look at how and why the human body has changed since humankind first got up on two feet. Spanning the entirety of human history – from primate to transhuman – Vybarr Cregan-Reid’s book investigates where we came from, who we are today and how modern technology will change us beyond recognition. In the last two hundred years, humans have made such a tremendous impact on the world that our geological epoch is about to be declared the ‘Anthropocene’, or the Age of Man. But while we have been busy changing the shape of the world we inhabit, the ways of living that we have been building have, as if under the cover of darkness, been transforming our bodies and altering the expression of our DNA, too. Primate Change beautifully unscrambles the complex architecture of our modern human bodies, built over millions of years and only starting to give up on us now. ‘Our bodies are in a shock. Modern living is as bracing to the human body as jumping through a hole in the ice. Our bodies do not know what century they were born into and they are defending and deforming themselves in response.’

The Book of Isaiah is very Rich with Metaphors and Similes, if you are in Love with them, or not; but, most Poor People are not: beCause the Metaphors are far too "Foggy" for them to Understand, which Means that they must Practice Reading all such Books, just to get a Good Understanding of them. At any rate, this Version of Isaiah is by far the Best in the World, and is Rated as "Extremely Good" by Well-Educated People. Therefore, it is a "must read" Book, if anyone is Interested in Actually Understanding the Bible. Most People are not; but, that is not a Problem: because most People were not Born to be Masters. Indeed, most were Born to be Good Servants of Good Masters, which is Good: because the Masters are like the Head of the Body of Good Government, which Body must have many other Working Parts and Organs, just to Function Correctly as a Body. Therefore, do not let the Hands Despise the Eyes: beCause, what could the Hands Do without Eyes to Guide them, even if the Eyes belong to some other Person, who can See what is Needed. We suggest that Readers of this Inspired Book take their Sweet Time, and read only a few Chapters each Day, and do not attempt to read the entire Book during one Day, even though it will be Tempting to Finish it, quickly, just to Discover those Precious Parts that make it so Famous and Controversial among Religious Scholars, some of whom are very Perplexed by it: because no one can Rightly Deny that God, himself, is Speaking through "Isaiah," who may have been Reincarnated! Indeed, there is the Possibility of it; but, do not let that "Buck you Out of the Saddle," as a Cowboy might say. Remember that this is a Companion Book of: "The New MAGNIFIED Version of The Book of MOORMUN!" (The Story of the White and Dark Indians in the Americas!), Book 040, which is perhaps the Best Modern Book in the whole World! Yes, unlike the Mutilated Bible, the Book of Mormon is much more Understandable, being "a New Revelation from God," you might say; but, it is nothing quite as Enlightening as the New MAGNIFIED Version, which most Definitely contains New Revelations from the Supreme Ruler of this Heaven and Earth. Therefore, do not let the Sun Set on another Day of Deprivation; but, PLEASE, for your own Sake, Educate yourself with all such Good Books: beCause that is True Wisdom on your part, which will make you Glad that you did. Guaranteed!

Getting money,paying bills,finding your prince charming, finding your happiness it looked so easy when you were young.You thought you had it all figured out. Little did you know life throws you curve balls. And you thought grownups had it easy so did these ladies. Follow their journies while getting lost in the grownup world.

Let’s paint a big rainbow to put on display. When people pass by it and see it, they’ll say . . . 'All rainstorms must end, and this rainstorm will too.' And they’ll feel a bit happier, all thanks to you. Light can’t shine without dark. Rainbows can’t colour the sky without rain. And the world is always full of hope and possibility, even when we feel lost and alone. Inspired by the rainbows that children across the world have been creating and displaying in their windows, The World Made a Rainbow is a beautiful story with a hopeful message of staying connected to the people we love, and a proportion of proceeds will be donated to a leading children’s charity. Bestselling author Michelle Robinson was desperate to find a way to help small children navigate their way through the complex emotions caused by the 2020 lockdown. She has written a story that matters now, but will last for ever. With charming illustrations from new talent Emily Hamilton, The World Made a Rainbow will reassure, uplift and is the perfect reminder of fun, hope and togetherness. This audio-enabled edition comes with a gorgeous reading by Sarah Ovens, along with music and sound effects.

The Book that Made Your World

How the World is Made

How the world we made is remaking us

A World History

A World Made New

Being Grown Up Was Easy

What Is the World Made Of?

Read and find out about the three states of matter—solid, liquid, and gas—in this colorfully illustrated nonfiction picture book. Can you make an ice cube disappear? Put it on a hot sidewalk. It melts into water and then vanishes! The ice cube changes from solid to liquid to gas. This Level 2 Let's-Read-and-Find-Out picture book is a fascinating exploration of the three states of matter. This clear and appealing science book for early elementary age kids, both at home and in the classroom, uses simple, fun diagrams to explain the difference between solids, liquids, and gases. This book also includes a find out more section with experiments designed to encourage further exploration and introduce record keeping. This is a Level 2 Let's-Read-and-Find-Out, which means the book explores more challenging concepts for children in the primary grades. The 100+ titles in this leading nonfiction series are: hands-on and visual acclaimed and trusted great for classrooms Top 10 reasons to love LRFÖs: Entertain and educate at the same time Have appealing, child-centered topics Developmentally appropriate for emerging readers Focused; answering questions instead of using survey approach Employ engaging picture book quality illustrations Use simple charts and graphics to improve visual literacy skills Feature hands-on activities to engage young scientists Meet national science education standards Written/illustrated by award-winning authors/illustrators & vetted by an expert in the field Over 130 titles in print, meeting a wide range of kids' scientific interests Books in this series support the Common Core Learning Standards, Next Generation Science Standards, and the Science, Technology, Engineering, and Math (STEM) standards. Let's-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.

The Final Book In The Divinity Saga The Earth is breaking open. The wall between the Spirit and Human realm has begun to shatter, allowing darkness to seep in and converge like an epidemic. The End Has Begun... Even after setting everything in motion by attacking Morning Star first, Cam`ael finally has everything that he's ever wanted in his existence; Starling's love and a family. Cam`ael's happiness is short-lived when he's finally given the harsh and inexplicable truth about why Starling has always been such a unique Chosen. A Fiery Will... Shortly after giving birth, Starling begins to realize what must be done in order to save the world and the future of their children. But having made the the promise to Cam`ael of never sacrificing herself for him, how can she risk it? While the Elders and other warriors see her as a traitor, her friends begin to see her as something more. In every battle and every war there will be sacrifices and betrayals, but if darkness prevails- light will cease to exist.

Galileo described the universe as a large book written in the language of mathematics, which can only be read by those with knowledge of its characters triangles, circles and other geometrical figures. In How the World Is Made John Michell explains how ancient peoples who grasped the timeless principles of sacred geometry were able to create flourishing societies. His more than 300 colour illustrations reveal the secret code within these geometrical figures and how they express the spiritual meanings in the key numbers of 1 through 12. He identifies the various regular shapes and shows their constructions; their natural symbolism; their meetings, matings and ways of breeding; and their functions within the universal order. In the process, Michell helps us see the world in a new light. Disparate shapes and their corresponding numbers are woven together, resolving themselves into an all-inclusive world image that pattern in the heavens, as Socrates called it, which anyone can find and establish within themselves.

STRONGNamed one of the Top 10 Books of 2008 by The Times-Picayune. STRONGWinner of the 2009 Humanities Book of the Year award from the Louisiana Endowment for the Humanities.STRONG STRONGAwarded the New Orleans Gulf South Booksellers Association Book of the Year Award for 2008. New Orleans is the most elusive of American cities. The product of the centuries-long struggle among three mighty empires--France, Spain, and England--and among their respective American colonies and enslaved African peoples, it has always seemed like a foreign port to most Americans, baffled as they are by its complex cultural inheritance. The World That Made New Orleans offers a new perspective on this insufficiently understood city by telling the remarkable story of New Orleans's first century--a tale of imperial war, religious conflict, the search for treasure, the spread of slavery, the Cuban connection, the cruel aristocracy of sugar, and the very different revolutions that created the United States and Haiti. It demonstrates that New Orleans already had its own distinct personality at the time of Louisiana's statehood in 1812. By then, important roots of American music were firmly planted in its urban swamp--especially in the dances at Congo Square, where enslaved Africans and African Americans appeared en masse on Sundays to, as an 1819 visitor to the city put it, &"rock the city.&" This book is a logical continuation of Ned Sublette's previous volume, Cuba and Its Music: From the First Drums to the Mambo, which was highly praised for its synthesis of musical, cultural, and political history. Just as that book has become a standard resource on Cuba, so too will The World That Made New Orleans long remain essential for understanding the beautiful and tragic story of this most American of cities.

With the help of text based on primary sources, full-color artwork, custom maps, and time lines, a detailed account of the charting of the New World outlines the causes and consequences of this defining age of exploration.
