Each essay in this book is part detective story, part philosophical meditation, presenting readers with a conundrum, and investigates the relationship between photographs and the real world they supposedly record.

A huge bestseller in Europe, Frederic Lenoir's *Happiness* is an exciting journey that examines how history's greatest philosophers and religious figures have answered life's most

fundamental question: What is happiness and how do I achieve it? From the ancient Greeks on—from Aristotle, Plato, and Chuang Tzu to the Buddha, Jesus, and Muhammad; from Voltaire, Spinoza, and Schopenhauer to Kant, Freud, and even modern neuroscientists—Lenoir considers the idea that true and lasting happiness is indeed possible. In clear language, Lenoir concisely surveys what the greatest thinkers of all time have had to say on the subject, and, with charming prose, raises provocative questions: · Do we have a duty to be happy? · Is there a connection between individual and collective happiness? · Is happiness contagious? · Is there a difference between pleasure and happiness? · Can unhappiness and happiness coexist? · Does our happiness depend on our luck? Understanding how civilization's best minds have answered those questions, Lenoir suggests, not only makes for a fascinating reading experience, but also provides a way for us to see us how happiness, that most elusive of feelings, is attainable in our own lives.

"Into the maelstrom of unprecedented contemporary debates about immigrants in the United States, this perfectly timed book gives us a portrait of what the new immigrant experience in America is really like. Written as a "guide" for the newly arrived, and providing "practical information and advice," Roya Hakakian, an immigrant herself, reveals what those who settle here love about the country, what they miss about their homes, the cruelty of some Americans, and the unceasing generosity of others. She captures the texture of life in a new place in all its complexity, laying bare both its beauty and its darkness as she discusses race, sex, love, death, consumerism, and what it is like to be from a country that is in America's crosshairs. Her tenderly perceptive and surprisingly humorous account invites us to see ourselves as we appear to others, making it possible for us to rediscover our many American gifts through the perspective of the outsider"--

An engaging and illuminating exploration of grief—and why, despite its intense pain, it can also help us grow Experiencing grief at the death of a person we love or who matters to us—as universal as it is painful—is central to the human condition. Surprisingly, however, philosophers have rarely examined grief in any depth. In Grief, Michael Cholbi presents a groundbreaking philosophical exploration of this complex emotional event, offering valuable new insights about what grief is, whom we grieve,

and how grief can ultimately lead us to a richer self-understanding and a fuller realization of our humanity. Drawing on psychology, social science, and literature as well as philosophy, Cholbi explains that we grieve for the loss of those in whom our identities are invested, including people we don't know personally but cherish anyway, such as public figures. Their deaths not only deprive us of worthwhile experiences; they also disrupt our commitments and values. Yet grief is something we should embrace rather than avoid, an important part of a good and meaningful life. The key to understanding this paradox, Cholbi says, is that grief offers us a unique and powerful opportunity to grow in self-knowledge by fashioning a new identity. Although grief can be tumultuous and disorienting, it also reflects our distinctly human capacity to rationally adapt as the relationships we depend on evolve. An original account of how grieving works and why it is so important, Grief shows how the pain of this experience gives us a chance to deepen our relationships with others and ourselves.

Now what? No one tells you how to navigate your first day in a new role. No one tells you how to take ownership, manage expectations, or handle workplace politics. No one tells you how to get promoted. The answers to these professional unknowns lie in the unspoken rules—the certain ways of doing things that managers expect but don't explain

and that top performers do but don't realize. The problem is, these rules aren't taught in school. Instead, they get passed down over dinner or from mentor to mentee, making for an unlevel playing field, with the insiders getting ahead and the outsiders stumbling along through trial and error. Until now. In this practical guide, Gorick Ng, a first-generation college student and Harvard career adviser, demystifies the unspoken rules of work. Ng distills the wisdom he has gathered from over five hundred interviews with professionals across industries and job types about the biggest mistakes people make at work. Loaded with frameworks, checklists, and talking points, the book provides concrete strategies you can apply immediately to your own situation and will help you navigate inevitable questions, such as: How do I manage my time in the face of conflicting priorities? How do I build relationships when I'm working remotely? How do I ask for help without looking incompetent or lazy? The Unspoken Rules is the only book you need to perform your best, stand out from your peers, and set yourself up for a fulfilling career.
