A facsimile edition of Bradshaw's fascinating guide to Europe's rail network. Bradshaw's descriptive railway handbook of Europe was originally published in 1913 and was the inspiration behind Michael Portillo's BBC television series 'Great Continental Railway Journeys'. It is divided into three sections: timetables for services covering the continent; short guides to the best places to see and to stay in each city; and a wealth of advertisements and ephemeral materials concerning hotels, restaurants and services that might be required by the early twentieth century rail traveller. This beautifully illustrated facsimile edition offers a fascinating glimpse of Europe and of a transport network that was shortly devastated by the greatest war the world had ever seen.

This year's winner of the Yale Series of Younger Poets competition is

Davis McCombs's Ultima Thule, which was acclaimed as "a book of exploration, of searching regard.... a grave, attentive holding of a light" by the contest judge, the distinguished poet W. S. Merwin. The poems are set above and below the Cave Country of south central Kentucky, where McCombs lives and which is home to thousands of caves. The book is framed by two sonnet sequences, the first about a slave guide and explorer at Mammoth Cave in the mid-1800s and the second about McCombs's experiences as a guide and park ranger there in the 1990s. Other poems deal with Mammoth Cave's four- thousand-year human history and the thrills of crawling into tight, rarely visited passageways to see what lies beyond. Often the poems search for oblique angles into personal experience, and the caves and the landscape they create form a personal geology.

This book highlights a set of selected, revised and extended papers from the 7th International Conference on Simulation and Modeling Methodologies, Technologies and Applications (SIMULTECH 2017), held in Madrid, Spain, on July 26 to 28, 2017. The papers showcased here represent the very best papers from the Conference, and report on a broad range of new and innovative solutions.

This is the first thorough English commentary on the geographical books of Pliny the Elder, written in the AD 70s. Pliny's account is the longest in Latin, and represents the geographical knowledge of that era, when the Roman Empire was the dominant force in the Mediterranean world. The work serves both cultural and ideological functions: much of it is topographical, but it also demonstrates the political need to express a geographical basis for the importance of the Roman state. In five books, Pliny covers the entire world as it was known in his era and includes some of the first information on the extremities of the inhabited region, including Scandinavia and the Baltic, eastern Asia, and sub-Saharan Africa. The commentary provides a detailed analysis of all the points Pliny raises: his sources, toponyms, and understanding of the place of the earth in the cosmos.

A legend, a land once seen and then lost forever, Thule was a place beyond the edge of the maps, a mystery for thousands of years. And to the Nazis, Thule was an icy Eden, birthplace of Nordic "purity." In this exquisitely written narrative, Joanna Kavenna wanders in search of Thule, to Shetland, Iceland, Norway, Estonia, Greenland, and Svalbard, unearthing the philosophers, poets, and explorers who claimed Thule for themselves, from Richard Francis Burton to Norwegian explorer Fridtjof Nansen. Marked by breathtaking snowscapes, haunting literature, and the cold specter of past tragedies, this is a wondrous blend of travel writing and detective work that is impossible to set down. REVIEW: Thule, real or not, is ripe and beguiling material for a literary and geographic adventurer, and Kavenna is formidable on both fronts. . . . Highly cerebral, erudite, refreshing. During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. The Bluegrass State of Kentucky, which was primarily a rural state in the 1930's when this WPA Guide was published, features Louisville as the only major city. Yet this does not limit the material in the guide by any means, as it also includes essays on Daniel Boone, bluegrass music, and old Southern American culture.

Where did "modern" civilization begin? What lies beneath the waves? Do myths describe interstellar impact? How'd they lift that stone? Was the Ark of the Covenant a mechanical device? Were there survivors of an Atlantean catastrophe? Who really discovered the "New" World? "Hidden history" continues to fascinate an ever wider audience. In this massive compendium, editor Preston Peet brings together an allstar cast of contributors to question established wisdom about the history of the world and its civilizations. Peet and anthology contributors guide us through exciting archeological adventures and treasure hunts, ancient mysteries, lost or rediscovered technologies, and assorted "Fortean," using serious scientific studies and reports, scholarly research, and some plain old fringe material, as what is considered "fringe" today is often hard science tomorrow. Contributors include: Graham Hancock (Fingerprints of the Gods and Underworld), David Hatcher Childress (Lost Cities and Civilizations series), Colin Wilson (From Atlantis to the Sphinx), Michael Cremo

(Forbidden Archeology), William Corliss (Ancient Infrastructures), Robert Schoch (Voyages of the Pyramid Builders), John Anthony West (Serpent in the Sky), Michael Arbuthnot (Team Atlantis), Erich Von Daniken (Chariots of the Gods), and many more.

Mercenaries have been active in battle from the beginning of military history and, as private armies and military support firms, they are a major component of warfare today. Security, military advice, training, logistics support, policing, technological expertise, intelligence, transportation—all are outsourced to a greater or lesser degree in the U.S. military. However, privatization is not a uniquely American phenomenon. Countries as diverse as Saudi Arabia and Australia rely on privatization in one form or another.

Historically, heads of state, politicians, and other administrators have justified use of mercenaries on the basis of their effectiveness, and cost-savings. These reasons and others continue to serve as rationales for use of private military companies in military strategy. **Mercenaries: A Guide to Private Armies and Private Military Companies** provides a comprehensive survey and guide to mercenary forces, entrepreneurs, and corporations active on the international military scene today, including a concise history of mercenaries and private armies on land, sea, and in the air. Narrative chapters are amply supplemented by sidebars including biographies of major figures, key statistics, historical and current documents, contracts, and legislation on private armies and outsourced military services. Each chapter includes a bibliography of books, journal articles, and web sites, and a general bibliography concludes the entire work.

A Trainspotter's Guide to Other Earths

Public interest in Adolf Hitler and all aspects of the Third Reich continues to grow as new generations ponder the moral questions surrounding Nazi Germany and its historical legacy. One aspect of Nazism that has not received sufficient attention from historians of the Third Reich is the doctrine's origins in the Thule Society and its covert activities. A Munich occult group with a political agenda, the Thule Society was led by Rudolf von Sebottendorff, a German commoner who had been adopted by nobility during a sojourn in the Ottoman Empire. After returning to Europe, Sebottendorff embraced a form of theosophy that stressed the racial superiority of Aryans. The Thule Society attempted to establish an anti-Semitic, working-class front for disseminating its esoteric ideas and founded the German Workers' Party, which Hitler would later transform into the National Socialist German Workers' (Nazi) Party. Several of the society's members eventually assumed prestigious posts in the Third Reich. David Luhrssen has written the first comprehensive study of the society's activities, its cultural roots, and its postwar ramifications in a historical-critical context. Both general readers and academics concerned with European cultural and intellectual history will find that *Hammer of the Gods* opens new perspectives on nineteenth- and twentieth-century Europe.

The Arctic is ruled by ice. For Inuit, it is a highway, a hunting ground, and the platform on which life is lived. While the international community argues about sovereignty, security, and resource development at the top of the world, the Inuit remind us that they are the original inhabitants.

this magnificent place - and that it is undergoing a dangerous transformation. The Arctic ice is melting at an alarming rate and Inuit have become the direct witnesses and messengers of climate change. Through an examination of Inuit history and culture, alongside the experiences of newcomers to the Arctic seeking land, wealth, adventure, and power, *Our Ice Is Vanishing* describes the legacies of exploration, intervention, and resilience. Combining scientific and legal information with political and individual perspectives, Shelley Wright follows the history of the Canadian presence in the Arctic and shares her own journey in recollections and photographs presenting the far North as few people have seen it. Climate change is redrawing the boundaries of what Inuit and non-Inuit have learned to expect from our world. *Our Ice Is Vanishing* demonstrates that we must engage with the knowledge of the Inuit in order to understand and negotiate issues of climate change and sovereignty claims in the region.

Built in 1610 during the reign of James I and remodeled in 1637–39 by the future first Earl of Dysart, Ham House and its gardens have endured through centuries of English history while remaining representative of the styles and culture of the original inhabitants. It is one of the places where *Caroline décor*—as developed by British architect Inigo Jones and familiar to Peter Paul Rubens and Anthony van Dyck—can still be appreciated. To mark the 400th anniversary of one of the most famous houses in Europe, eighteen internationally recognized scholars join National Trust curators in documenting the history of Ham House and its collections. The new discoveries, reattributions, and revelations of the contributors are accompanied by specially commissioned photography of the house and its contents. An appendix includes complete transcriptions of house inventories for the 17th, 18th, and 19th centuries, published here for the first time.

DIV This landmark book looks at what it means to be a multiracial couple in the United States today. According to *Our Hearts* begins with a look back at a 1925 case in which a two-month marriage ends with a man suing his wife for misrepresentation of her race, and shows how our society has yet to come to terms with interracial marriage. Angela Onwuachi-Willig examines the issue by drawing from a variety of sources, including her own experiences. She argues that housing law, family law, and employment law fail, in important ways, to protect multiracial couples. In a society in which marriage is used to give, withhold, and take away status—in the workplace and elsewhere—she says interracial couples are at a disadvantage, which is only exacerbated by current law. /div
