Easy to pop into your handbag or pocket, The Banting Pocket Guide is set to kick-start your new Banting lifestyle!

'I am obsessed with The Pioppi Diet . . . I feel leaner, energised, definitely less bloated and more healthy. I genuinely feel like this is no longer a diet plan, it's just the way I eat' SARA COX _____ We are not being given the truth about our health . . . We're told to avoid saturated fats, we're marketed health food that is laden with sugar and we're encouraged to pound out miles at the gym. However, our chances of getting obese are increasing - raising our risk of Type-2 diabetes, cancer, dementia and heart disease. Yet in the tiny Italian village of Pioppi, life is as simple as it is long and healthy. There is no gym, no supermarket, the food is delicious and they enjoy a glass of wine every evening. Now cardiologist Dr Aseem Malhotra - a world-leading obesity expert and Britain's number one anti-sugar campaigner - and acclaimed filmmaker Donal O'Neill combine the wisdom of this remarkably long lived population with decades of nutrition and medical research to cut through long-standing dietary myths and create this easy-to-follow lifestyle plan. Indulge in delicious food for a happier, healthier and longer life . . .

- A creamy crab and ricotta omelette with sliced avocado
- Grilled halloumi and kale salad with tahini yoghurt dressing
- Steak burger with mature cheddar, tomato and avocado
- Cauliflower steaks and crumbled feta, za'atar and chilli
- A one-dish roasted aubergine with feta, herbs and yoghurt dressing _____

This isn't a diet or lifestyle, which requires saying 'no' to the things you love, or exercising for hours upon end. In just three weeks, The Pioppi Diet will help you make simple, achievable and long-lasting changes to how you eat, sleep and move - changes that all of us, no matter how busy we are, can make. 'A must have for every household and a must read for every medical student and doctor' Professor Dame Sue Bailey, the Chair of the Academy of Medical Royal Colleges 'Revolutionary' Richard Thompson, former physician to HRH Queen Elizabeth 'This book has the power to make millions of people healthier and happier.' Andy Burnham, former Secretary of State for Health As heard on . . .

This second edition of Food & Fitness: A Dictionary of Diet & Exercise provides more than 1,800 entries on all matters relating to diet and exercise. Subject areas covered include diet methods, food supplements, exercise, sports injuries, anatomy, energy-related terms, exercises for improving strength, flexibility, stamina, weight control, training methods and principles, calorie requirements of different activities, and other related topics. For this update all entries have been reviewed and updated where necessary, and 20,000 new and revised words have been added, alongside web links to relevant online resources and images. Focus areas include computer and satellite technology, DNA technology, food and drink labelling, and the psychological aspects of dieting and exercising, and new entries cover topics such as accelerometry, drink labelling, exercise tracking, mindfulness, national diet and nutrition survey, and spontaneous activity expenditure. A good diet and regular exercise are the key components of a healthy lifestyle. Food & Fitness gives the reader a wealth of information which will help them to evaluate claims made about different diets and types of exercise, and to select the combination most suited to their needs.

Boost your metabolism and burn 100-500 more calories per day by putting your body into fat burning mode with a new science-backed update to this proven diet. The New Keto-Friendly South Beach Diet combines the good fats and healthy carbs of the world-famous heart-healthy program with the advanced nutrition science of keto-all in a doctor-approved plan that is easier than strict keto diets. The original South Beach Diet defined the cutting edge of healthy weight loss. Now the creator of the classic plan combines his signature diet with the latest, most cutting-edge advances in healthy eating

that are the basis for the ketogenic diet. With a new emphasis on good carbs, healthy fats, and quality proteins, The New Keto-Friendly South Beach Diet takes the powerful fundamentals of the original South Beach Diet and adds the fat-burning principles of keto. Dr. Arthur Agatston cuts through the confusion around keto and low carb diets and gives readers a step-by-step 28-day eating plan that increases satisfaction, decreases appetite, and makes it easy to lose weight and keep it off. He also explains why strict ketosis is not necessary to achieve results; the effectiveness of intermittent fasting; and the relationship between yo-yo-dieting and sugar addiction. This plan offers the benefits of keto and low carb without the pitfalls. As this new book reveals, you can boost your metabolism and put your body safely into fat-burning mode with a diet that's more flexible and more sustainable than traditional keto. And that's not all: in addition to long-term weight loss, the South Beach Keto-Friendly plan can boost mental sharpness, reduce inflammation and pain, increase your energy, and improve diabetes and heart health. Includes around 100 recipes, full-color photos, and an easy-to-follow 28-day meal plan.

You won't believe how easy and tasty it is to live a LCHF lifestyle!

From the national bestselling author of Racing Weight, Matt Fitzgerald exposes the irrationality, half-truths, and downright impossibility of a "single right way" to eat, and reveals how to develop rational, healthy eating habits. From "The Four Hour Body," to "Atkins," there are diet cults to match seemingly any mood and personality type. Everywhere we turn, someone is preaching the "One True Way" to eat for maximum health. Paleo Diet advocates tell us that all foods less than 12,000 years old are the enemy. Low-carb gurus demonize carbs, then there are the low-fat prophets. But they agree on one thing: there is only one true way to eat for maximum health. The first clue that that is a fallacy is the sheer variety of diets advocated. Indeed, while all of these competing views claim to be backed by "science," a good look at actual nutritional science itself suggests that it is impossible to identify a single best way to eat. Fitzgerald advocates an agnostic, rational approach to eating habits, based on one's own habits, lifestyle, and genetics/body type. Many professional athletes already practice this "Good Enough" diet, and now we can too and ditch the brainwashing of these diet cults for good.

#1 NEW YORK TIMES BESTSELLER • The game-changing author of Tribe of Mentors teaches you how to reach your peak physical potential with minimum effort. "A practical crash course in how to reinvent yourself."—Kevin Kelly, Wired Is it possible to reach your genetic potential in 6 months? Sleep 2 hours per day and perform better than on 8 hours? Lose more fat than a marathoner by bingeing? Indeed, and much more. The 4-Hour Body is the result of an obsessive quest, spanning more than a decade, to hack the human body using data science. It contains the collective wisdom of hundreds of elite athletes, dozens of MDs, and thousands of hours of jaw-dropping personal experimentation. From Olympic training centers to black-market laboratories, from Silicon Valley to South Africa, Tim Ferriss fixated on one life-changing question: For all things physical, what are the tiniest changes that produce the biggest results? Thousands of tests later, this book contains the answers for both men and women. It's the wisdom Tim used to gain 34 pounds of muscle in 28 days, without steroids, and in four hours of total gym time. From the gym to the bedroom, it's all here, and it all works. You will learn (in less than 30 minutes each): • How to lose those last 5-10 pounds (or 100+ pounds) with odd combinations of food and safe chemical cocktails • How to prevent fat gain while bingeing over the weekend or the holidays • How to sleep 2 hours per day and feel fully rested • How to produce 15-minute female orgasms • How to triple testosterone and double sperm count • How to go from running 5 kilometers to 50 kilometers in 12 weeks • How to reverse "permanent" injuries • How to pay for a beach vacation with one hospital visit And that's just the tip of the iceberg. There are more than 50 topics covered, all with real-world experiments, many including more than 200 test subjects. You don't need better genetics or more exercise. You need immediate results that compel you to continue. That's exactly what The 4-Hour Body delivers.

A Fat Lot of Good

Your body thrives on two fuels - discover how to boost your energy and get leaner and healthier by alternating fats and carbs

Lore of Running

The Serious Problem of Overhydration in Endurance Sports

This work is an examination of what makes us fat. In his book *Good Calories, Bad Calories*, the author, an acclaimed science writer argues that certain kinds of carbohydrates, not fats and not simply excess calories, have led to our current obesity epidemic. Now he brings that message to a wider, nonscientific audience. With fresh evidence for his claim, this book makes his critical argument newly accessible. He reveals the bad nutritional science of the last century, none more damaging than the "calories-in, calories-out" model of why we get fat, the good science that has been ignored, especially regarding insulin's regulation of our fat tissue. He also answers key questions: Why are some people thin and others fat? What roles do exercise and genetics play in our weight? What foods should we eat or avoid? Concluding with an easy-to-follow diet, this book is one key to understanding an international epidemic and a guide to improving our own health.

?? 55% OFF for Bookstores! Retail Price Discounted for a Few More Days! If You are Looking for a Complete Guide for lose weight with taste and without giving up or get rid of obesity Then Your Customers Never Stop to Use This Awesome Book! Obesity is slowly becoming one of the most serious issues that occurred in Western societies. It is usually favored by lack of activity, even stress of lockdowns for Virus, but we can all agree that the food we eat is making us quickly gain weight. Perhaps you are struggling to lose some weight. Perhaps you have an active lifestyle with frequent visits to the gym but still not having the results you expect. In most cases, nutrition is to blame because we stuff ourselves with plenty of high-calorie and low-nutrient foods. Everything was a lot more natural back then, and you didn't have to eat massive amounts to get satisfied. This is the sad truth! In this complete guide you can learn: ? What is Sirtfood Diet? ? What is the Skinny Gene? ? How to Follow the Sirtfood diet ? The phases of the Sirtfood diet in your body ? 35 Quick and Easy Recipes for: Breakfast, Lunch, Dinner and Snacks ? So what are you waiting for? Buy it NOW and Let Your Customers Get Addicted to This Amazing Book!

The breakthrough 3-step program to conquer type 2 diabetes with little to no medication. If you've been diagnosed with prediabetes or type 2 diabetes, it's easy to think, "How did this happen? I watched what I ate. If only I had tried harder, eaten fewer calories and burned more." But you're not alone, and it's not your fault. Many traditional diets can actually promote insulin resistance over time because they don't take into account your different metabolism. You may be one of the millions who have Metabolism B (metabolic syndrome), an inherited condition that can cause your body to overreact to carbohydrate foods, release excess insulin, and gain body fat--and eventually develop type 2 diabetes. The good news is that you can take control of your diabetes, starting today. When registered dietician Diane Kress herself developed this condition over a decade ago--despite following the ADA-recommended dietary guidelines--she realized that the "status quo" nutrition plans just don't work for everyone. In *The Diabetes Miracle*, she identifies the reason why. Now, she shares the groundbreaking 3-step program that she has created for the prevention and management of this progressive, potentially fatal condition. It's the miracle diet and lifestyle plan that thousands of her patients have been successful with--and that Kress personally adheres to today, controlling her diabetes without medication. Now you can get the facts and eat to treat the root cause of type 2 diabetes. With *The Diabetes Miracle*, you can expect to: Correct your body's insulin imbalance naturally and stop the progression from Metabolism B to prediabetes to diabetes "Rest, reset, and retrain" your pancreas to process carbs and react more normally to blood glucose changes Lose weight and keep it off--especially the love handles and excess back fat Get the best blood sugar readings you have experienced since your diagnosis on the least amount of medication Have more energy, sleep great, look younger, and feel healthier Gain control of type 2 diabetes on an easy, livable program This diabetes bible provides clear details about the disease itself, the newest parameters for diagnosis, and preventing complications. Kress also gives you the most up-to-date information on blood glucose testing, medications, the use of insulin, and tricks of the trade for great blood sugar control. With helpful Q&A throughout and a fresh, compassionate approach, *The Diabetes Miracle* takes the frustration out of living with type 2 diabetes so that you can take control...permanently. Get ready for better health and a brand new lease on life!

Tim Noakes is one of the world's leading authorities on the science behind sport and a successful sportsman in his own right. Through a lifetime of research, he has developed key scientific concepts in sport that have not only redefined the way elite athletes and teams approach their professions, but challenged conventional global thinking in these areas. In this new and updated edition of *Challenging Beliefs*, Noakes shares his views on everything from the myths perpetuated by the sports-drink industry to the prevalence of banned substances, the need to make rugby a safer sport and the benefits of a high-protein, low-carb diet. The teams and athletes with whom Noakes has worked make fascinating backdrops to these topics, highlighting the importance of science in sport in human terms. In providing an intimate look at the golden threads running through Noakes's life and career, this remarkable book reveals the landmark theories and principles generated by one of the greatest minds in the history of sports science.

The Official Low-carbohydrate Nutrition Guide for Endurance and Performance

Abel James, the ABC star and creator of the #1 Fat-Burning Man Show, shares his revolutionary weight-loss program in *The Wild Diet* - now a New York Times Bestseller! Can you really lose 20 pounds in 40 days while enjoying real butter, juicy burgers, chicken parmesan, chocolate, and even cheesecake? The answer might surprise you. By focusing on simple, fresh ingredients and nutrient-dense meals, *The Wild Diet* programs your body to burn fat as its main fuel source. Eating Wild, thousands of people across the world have dropped 20, 60, or even more than 100+ pounds without hunger... and often with minimal exercise. In *The Wild Diet*, you'll find that we are not meant to starve ourselves, count calories, or avoid delicious food. We're wired to eat luxuriously and live well without getting fat. If you think that you're stuck with the genes you inherited and there's nothing you can do about it, read closely. *The Wild Diet* paints a different picture, one in which we have the power to influence our genetic expression by taking control of the quality of food we eat, the way we move, and the environment around us. We once had access to an immense variety of fresh seasonal foods from small, local sources. Now we have access to few varieties of processed foods from a massive industrial system often thousands of miles from where we live. The secret to great health simply getting back to our wild roots and enjoying real, Wild foods grown on a farm and not in a factory. By prioritizing foods found in the natural world, rich in fiber and nutrients, your body will burn fat instead of sugar for energy. When you reduce your consumption of processed grains, sugars and other simple carbohydrates in favor of healthy plants and animals, you will be shocked by how quickly you can reverse the damage of decades of poor eating. *The Wild Diet* proves that it's possible to get in best shape of your life while eating delicious foods like chicken parmesan, bacon cheeseburgers, and even chocolate pudding. If you want to know how to burn more fat by indulging in incredible meals and exercising less, it's time to treat yourself to *The Wild Diet*.

Let me guess... You've tried every diet under the sun. You've lost weight and put it back on. The more you diet, the more you crave food. You have almost given up hope of being and staying slim. You need to *Stop Counting Calories & Start Losing Weight!* *Stop Counting Calories & Start Losing Weight* is the definitive guide to *The Harcombe Diet*. This book covers each of the three phases of *The Harcombe Diet* in detail, with meal plans for each phase - for omnivores and vegetarians - and the recipes to accompany these plans. In this book, Zoe Harcombe shows how calorie counting leads to three extremely common medical conditions, which cause overeating and weight gain. *The Harcombe Diet* will help you to lose weight and keep it off through eating better, not less. Weight loss in the first five days is typically 7lb. *Stop Counting Calories & Start Losing Weight: The Harcombe Diet* has the ultimate Question & Answer section, with over 100 Q&As covering Avocados to Xylitol with Natural Live Yoghurt, Nuts and Soya in-between. *The Harcombe Diet* has changed the lives of tens of thousands of people, freeing them from yo-yo dieting and returning them to great health. Let it do the same for you too.

Letter on Corpulence, Addressed to the Public is a brochure that encourages reducing carbohydrate consumption as a means to weight loss. The booklet contains the essential blueprint for the diet he followed.

"Diabetes used to be rare and clear. One boy in the school had Type 1 and a friend of a friend's granny had Type 2. We now see adults being diagnosed with Type 1 and children developing Type 2. There are over 400 million diabetics world-wide - four times as many as in 1980. The vast majority of these have Type 2 - sometimes judged as a 'lifestyle' disease. The traditional view of diabetes is that it is a "chronic and progressive" condition and that nothing can be done about it. Serious complications include loss of eyesight, amputations and death. This book has gathered together some of the finest minds working in the field of diabetes and diet. The result is a collection of chapters by thought leaders, academics and doctors addressing the big issues. What is diabetes? What are the different types? What causes it? Who gets it? Why do we eat so much carbohydrate? Why do diabetics die of heart disease? Why do athletes commonly get Type 2 diabetes? The writers in this book approach diabetes from many different angles, but they all share one common belief: Diabetes does not need to be "chronic and progressive." Both Type 1 and Type 2 can be substantially alleviated and the latter can be 'put into remission.' Let us tell you how..."--Page 4 of cover.

'Scientists labelled fat the enemy . . . they were wrong.' Time magazine We've been told for years that eating fat is bad for cause of high blood pressure, heart disease and obesity. The Real Meal Revolution debunks this lie and shows us the way to health through eating what human beings are meant to eat. This book will radically transform your life by showing you clearly to take control of not just your weight, but your overall health, too - through what you eat. And you can eat meat, seafood, nuts . . . often the first things to be prohibited or severely restricted on most diets. This is Banting, or Low-Carb, High-Fat new generation, solidly underpinned by years of scientific research and by now incontrovertible evidence. This extraordinary phenomenal bestseller, overturns the conventional dietary wisdom of recent decades that placed carbohydrates at the base of the healthy-eating pyramid and that has led directly to a worldwide epidemic of obesity and diabetes. Both a startling revelation to humanity itself, it offers a truly revolutionary approach to healthy eating that explodes the myth, among others, that carbohydrates This is emphatically not just another unsustainable, quick-fix diet or a fad waiting to be forgotten, but a long-delayed return to what human beings are supposed to eat. The Real Meal Revolution is an ebook which maintains the design of the book, and as a result is correctly on some basic reading devices.

Move from carb confusion to carb confidence! Overwhelmed by the avalanche of information out there about diets and how spending time and money following complicated and expensive plans and protocols that don't deliver the results you want? Is a ketogenic diet be best for you? But what if you can't imagine life without fruit or bread? Why won't someone just make a simple? They have! Eric Westman, MD, has over twenty years of experience as an internal medicine doctor and obesity medicine. He's helped patients at his Keto Medicine Clinic at Duke University lose over 26,000 pounds and reverse conditions like type 2 PCOS, high blood pressure, and more. In End Your Carb Confusion, he shares his time-tested and science-backed strategy. If you've spent years doing "all the right things" but you're still dealing with excess weight, diabetes, heartburn, joint pain, fatty liver problems, or other issues, End Your Carb Confusion is the GPS you need to help you navigate your way from frustrated and overwhelmed to empowered and successful. Find the level of carbohydrate intake that's right for you now, and then learn how to switch to a lower-carb diet when the time is right. Dr. Westman gives you the information you need to start reclaiming your health to cut through the confusing scientific gobbledegook, only exactly what you need to understand how you got to where you are (hint—it's not more important, how to get to where you want to be. You shouldn't need a PhD, a private chef, and a million dollars to lose weight and be healthy. The simple, straightforward plan laid out in End Your Carb Confusion fits into any lifestyle, whether you shop at a discount chain and will help you reach your goals whether you prefer gourmet meals or fast food. No matter where you're at, End Your Carb Confusion can lead you to your destination—a renewed body, mind, and spirit.

Stop Counting Calories and Start Losing Weight

The Eat Right Revolution

The weight-loss book for women that will change the way you look and feel about yourself. Lose belly fat, stop yo-yo dieting and overcome emotional eating! Are you a woman who has had a lifelong struggle with your weight and tried many different diets unsuccessfully? Do you struggle with yo-yo dieting and emotional eating and do not want a programme that is too restrictive or hard to follow? Do you suffer from type 2 diabetes or are you insulin resistant? If you answered yes to any of these questions, then Your 12-Week Body and Mind Transformation is for you! This is not a diet book. Instead, this hands-on, practical guide offers a permanent lifestyle change that will help you correct your eating habits by changing your mindset to achieve the results you want. Spread over 12 weeks, the easy-to-follow programme will teach you how to embark on a life-changing journey one step, and one day, at a time. Each week features a healthy, nourishing and delicious meal plan that is low in sugar, quick and easy to prepare, and suitable for the whole family to enjoy. The book is also full of practical tips, advice and weekly homework tasks to help you identify what is holding you back mentally and emotionally. Shopping and swap-out lists are included too, as are weekly exercises that are easy to do at home, with links to online video demonstrations. With its focus on a low sugar intake and intermittent fasting, which has proven to be the best and most effective method to boost weight loss, improve the immune system and rebalance hormones, Your 12-Week Body and Mind Transformation will help you overcome emotional eating and forever put a stop to yo-yo dieting.

Real-life advice and guidelines to take the guesswork and the fear out of fasting. Fasting is emerging as one of the most exciting medical advancements in recent memory. Its list of benefits extends far beyond weight loss and includes improved cardiovascular health, lower blood pressure, protection against cancer and better

cognitive function. While many of us may be able to handle the physical effects of fasting, the mental and social challenges are often daunting. There are so many opportunities to eat during the day, and sometimes it's rude not to participate in meals. What do you do with the time you used to spend eating? How do you navigate social situations while fasting? How can a food addict mentally prepare for a fast? Life in the Fasting Lane fills all of these gaps, and more, by bringing together three leading voices in the fasting community to provide a book written for both the body and the mind, helping people cope with all aspects - physical, social, emotional, medical - of fasting. It blends cutting-edge medical and scientific information about fasting with the perspective of a patient who has battled obesity the majority of her adult life.

"The 17 Day Diet offers a lifetime plan for shedding pounds fast in a safe and lasting way with a diverse list of foods recommended in every phase and healthy recipes that will help readers lose weight fast, and keep it off."--Provided by publisher.

"Drink as much as you can, even before you feel thirsty." That's been the mantra to athletes and coaches for the past three decades, and bottled water and sports drinks have flourished into billion-dollar industries in the same short time. The problem is that an overhydrated athlete is at a performance disadvantage and at risk of exercise-associated hyponatremia (EAH)--a potentially fatal condition. Dr. Tim Noakes takes you inside the science of athlete hydration for a fascinating look at the human body's need for water and how it uses the liquids it ingests. He also chronicles the shaky research that reported findings contrary to results in nearly all of Noakes' extensive and since-confirmed studies. In *Waterlogged*, Noakes sets the record straight, exposing the myths surrounding dehydration and presenting up-to-date hydration guidelines for endurance sport and prolonged training activities. Enough with oversold sports drinks and obsessing over water consumption before, during, and after every workout, he says. Time for the facts—and the prevention of any more needless fatalities.

Diabetes Unpacked

The Real Meal Revolution 2.0

The Real Meal Revolution

The Radical, Sustainable Approach to Healthy Eating

The Low-carb Athlete

The Hybrid Diet

In December 2010, Professor Tim Noakes was introduced to a way of eating that was contrary to everything he had been taught and was accepted as conventional nutrition "wisdom". Having observed the benefits of the low-carb, high-fat lifestyle first-hand, and after thorough and intensive research, Noakes enthusiastically revealed his findings to the South African public in 2012. The backlash from his colleagues in the medical establishment was as swift as it was brutal, and culminated in a misconduct inquiry launched by the Health Professions Council of South Africa. The subsequent hearing lasted well over a year, but Noakes ultimately triumphed, being found not guilty of unprofessional conduct in April 2017. In *Lore of Nutrition*, he explains the science behind the low-carb, high-fat/Banting diet, and why he champions this lifestyle despite the constant persecution and efforts to silence him. He also discusses at length what he has come to see as a medical and scientific code of silence that discourages anyone in the profession from speaking out against the current dietary guidelines. Leading food, health and medical journalist Marika Sboros, who attended every day of the HPCSA hearing, provides the fascinating backstory to the inquiry, which often reads like a spy novel. *Lore of Nutrition* is an eye-opener and a must-read for anyone who cares about their health.

Based on new research in exercise physiology, author and running expert Matt Fitzgerald introduces a first-of-its-kind training strategy that he's named "Brain Training." Runners of all ages, backgrounds, and skill levels can learn to maximize their performance by supplying the brain with the right feedback. Based on Fitzgerald's eight-point brain training system, this book will help runners: - Resist running fatigue - Use cross-training as brain training - Master the art of pacing - Learn to run "in the zone" - Outsmart injuries - Fuel the brain for maximum performance Packed with cutting-edge research, real-world examples, and the wisdom of the world's top distance runners, *Brain Training for Runners* offers easily applied advice and delivers practical results for a better overall running experience.

The Pioneering Program to Lose Weight and Prevent Disease

A radically different, practical and doable way to achieve a healthy weight and substantially reduce your risk of diseases such as diabetes, heart disease, cancer and dementia. 'If you follow the advice here, you will improve your health, lose weight, avoid diabetes and reduce your risk of cancer and Alzheimer's. What more could you ask?' Dr Malcolm Kendrick, GP and author of The Great Cholesterol Con 'A highly readable, smart and well-reasoned book based on the latest generation of rigorous science' Nina Teicholz, author of The Big Fat Surprise, and Adjunct Professor, New York University Recent research has shown that a diet that is very low in carbs and high in good fats is effective for weight loss, can counteract many diseases and also help athletic performance and endurance. The drawback is that it is difficult to stick to - because most people love carbs. But, as The Hybrid Diet demonstrates, we don't need to choose. The human body has been designed through millions of years of evolution to burn two different sources of fuel - glucose (which comes from the carbohydrates in fruit and vegetables) and ketones (which are made in the body from fat) - and to switch between them when food is scarce. The point of The Hybrid Diet is to show you how to make the best use of both options when you need them, and how best to switch between them. In their quest to discover the perfect diet, leading health journalist Jerome Burne and nutrition expert Patrick Holford have examined the latest cutting-edge science and have put together a plan that is sound, simple and delicious - one that is based on how your body works best. No More Carb Loading! So you're gearing up for a killer exercise session, or a big event like a marathon or a triathlon, and you want to avoid all the carbo-loading that's so prevalent amongst endurance athletes. You're interested in fueling your body for the combination of ideal health and performance, and you're ready for weight loss, longevity, health, and breaking your sugar addiction. But is that even possible? Can you really escape the pasta binges and gastrointestinal distress that often accompanies an over reliance on sugar? Can you really be a low-carb endurance athlete? Enhanced Performance Without Expensive Supplements Maybe you know it's possible, but did you also know that there are certain supplements no low carb athlete should be training without? You're probably worried that you'll need to shell out big bucks for obscure supplements, right? Pine pollen? Ant protein? Thankfully, you just need some tried and true favorites that have proved the test of time. The number one supplement for low-carb athletes? It's likely to be sitting on your kitchen table right now. And there's another one that 70% of the population is deficient in...don't let that be you, especially when deficiency can lead to fatigue and muscle cramps. Edge Out the Competition with Superior Nutrition As an Ironman triathlete who eats low-carb, author Ben Greenfield walks his talk. He's developed a detailed system that will put you nutritionally ahead of 99% of your competitors. From training days, to race week, to the day of the race itself, you'll learn exactly what you need to be eating and when for best performance and best health. The Low Carb Athlete is the go-to resource for low carb athletes and those wishing to switch up their diet protocol from the old school carb-based diets of yesterday.

The pandemic proved that it is one thing to sit around waiting for scientists to develop a vaccine against a new virus, but it is quite another for doctors and dietitians to tell people to ignore a weapon already close at hand, in their kitchens, that can protect them from the worst effects of COVID-19 infection. That weapon is a low-carb, high-fat diet ... It took a viral pandemic to reinvigorate the evidence that a low-carb, high-fat (LCHF) diet may be a 'vaccine' against ill health and premature death. The Eat Right Revolution exposes the real pandemic we should all worry about - not another coronavirus, but a diet-related medical condition that threatens people's life expectancy and well-being globally. The Eat Right Revolution sets out a quick, safe, cheap and effective investment you can make for lifelong health in body and mind. It exposes the root causes of chronic, life-threatening comorbidities, such as obesity, type-2 diabetes, heart disease and more, and explains why LCHF and ketogenic diets can be safer, more effective solutions than drugs to beat these diseases. With recipes, food lists and meal plans, as well as updated, personalised do's and don'ts on the right LCHF approach for each individual, this book is an essential guide to living a longer, stronger, healthier life.

The all-new international bestseller! Think you know the Atkins Diet? Think again. This completely updated, easier-than-ever version of the scientifically-proven Atkins diet has helped millions of people around the world lose weight—and maintain that weight loss for life. The New Atkins is... Powerful: Learn how to eat the wholesome foods that will turn your body into an amazing fat-burning machine. Easy: The updated and simplified program was created with you and your goals in mind. The upgrade to the radical, sustainable approach to healthy eating that has taken the world by storm. The ketogenic diet, which is very high in fats and low in carbohydrates, was first developed almost 80 years ago. It makes the body burn fat for energy instead of glucose. When carefully monitored by a medical team familiar with its use, the diet helps two out of three children who are tried on it and may prevent seizures completely in one out of three. It is a strict diet, and takes a strong commitment from the whole family. The ketogenic diet is not a do-it-yourself diet. It is a serious form of treatment that, like other therapies for epilepsy, has some side effects that have to be watched for. The Keto Cookbook is a cookbook for those using the diet to treat epilepsy and other neurologic conditions. The ketogenic diet is extremely strict- where one extra bite of food can have serious repercussions on a child's health - and thus hard to maintain. The Keto Cookbook contains 96 recipes grouped by breakfast and brunch, appetizers & snacks, lunch, dinner, and sweets and treats. The book includes a 16-page color insert illustrating each recipe. Since many children start on the Keto Diet before they can speak, the pictures of the meal and snack options will allow children to choose what they want. And help to overcome food refusal due to lack of variety of foods and/or child's loss of control over food options. It will also address common eating personalities such as "grazers", children with texture aversions, the sweet tooth, unpredictable-eaters and adventurous-eaters. There will be options for all. Most parents of children on the ketogenic diet are busy and do not have the time or resources to experiment with different foods and preparation methods, so this book provides them with options that have already been tested and are both kid- and Registered Dietician- approved. There will be symbols on the recipes to indicate which food personality for which they are most appropriate. Or how long they take. For example, a recipe for cookies would have a symbol indicating that a "sweet-tooth" child may like this recipe. Allergy information will also be available for the top eight most common children's allergens. The book will also provide tips for "keto-proofing" your life, from the kitchen, to the car, to the classroom. Sample shopping lists and vacation guidelines will also help families prepare for the unexpected. It will include sample letters for getting through airport security, guidelines for visits to the hospital and outpatient procedures, and ways to prevent accidental "breaking" of the ketogenic diet. Special Features of The Keto Cookbook include 96 kid and dietician tested and approved recipes for the keto diet presented in full color. Recipes will be coded by symbol to indicate personality type and cooking times. Allergy information for the eight most common allergens. Practical suggestions to help people "keto-proof" their life, from the kitchen, to the car, to the classroom. Four sample shopping list and vacation guidelines will help families prepare for the unexpected.

'I am almost two weeks into Restoration and I am feeling great. Went for a blood pressure check and my readings have dropped since I started the program. My GP is thinking that if I keep going the way I am that I will be able to come off the medication really soon which is fantastic.' Maxine, Launceston, Australia 'Halfway through week three of Restoration and weighed myself today!! I dropped 5.6 kgs so far. I can't tell you how elated I am. By this time next week if I stick to the plan and my daily walking target I could be in double digits instead of triple digits, that is such a big deal to me!' Michael Markoulides, United Kingdom 'At the time that I started with the Banting, I weighed 70.3 kg. My goal is to weigh 55 kg. After 13 weeks of strict Banting (and a little cheating) I have lost a total of 11.6 kg. So I am almost there.' Monique Pretorius, Rustenburg, South Africa 'I love this program EVEN MORE! I am not craving and feel full for a long time. I'm in week two [of Restoration] and I have to say Jonno's recipes are fantastic. I'm down four pounds.' Shari Kuntz, Kansas, United States 'I'm doing so well, I've lost 3 kg for the past three weeks [in Restoration] and 7 cm from my waistline.' Nthabiseng Mogosoane, South Africa The original book, The Real Meal Revolution, promoting a diet low in carbohydrates and unafraid of healthy fats has sold hundreds of thousands of copies all over the world, inspiring a profound and widespread change in eating habits and improved health for thousands. The Real Meal Revolution 2.0 provides the distillation of three years of data analysis from 120,000 online users and thousands of success stories, combined with the latest nutritional science and behavioural research. The result is a cutting-edge, four-phase approach that isn't simply about losing weight - it's about being healthy, happy and absolutely awesome! · Achieve your awesome weight quickly and without compromise · Save money by avoiding expensive supplements and medication · Conquer the weight-loss plateau and other pitfalls of dieting · Discover non-food related weight-loss techniques to make part of your daily routine · Enjoy supposedly taboo foods while maintaining a healthy lifestyle If you want sustainable weight loss (without cravings or side effects), boundless energy, improved blood readings, bulletproof gut health, increased mental focus, enhanced athletic performance and better sleep, then The Real Meal Revolution 2.0 is for you. www.realmealrevolution.com

A pioneering husband-and-wife doctor team shows readers how their groundbreaking, protein-rich eating plan can succeed where low-fat diets fail, helping take off weight and achieve optimal health naturally, without counting fat. Reprint.

A paradigm-shifting diet book that explains why one-size-fits-all diets don't work and helps readers customize their diet to lose weight and improve health. There are certain things we take as universal truths when it comes to dieting and health: kale is good; ice cream is bad. Until now. When Drs. Segal and Elinav published their groundbreaking research on personalized nutrition, it created a media frenzy. They had proved that individuals react differently to the same foods-a food that might be healthy for one person is unhealthy for another. In one stroke, they made all universal diet programs obsolete. The Personalized Diet helps readers understand the fascinating science behind their work, gives them the tools to create an individualized diet and lifestyle plan (based on their reactions to favorite foods) and puts them on the path to losing weight, feeling good, and preventing disease by eating in the way that's right for them.

Death by Food Pyramid

Like most doctors, Peter Brukner was trained to believe that drugs and surgery are the answers to all medical problems - including the epidemics of obesity, diabetes and other 'modern illnesses' that are threatening our healthcare system and the life expectancy of future generations. For years he was dismissive of any 'alternative' diets or lifestyle changes. But that all changed when, facing the double threat of obesity and diabetes himself, his research led to a shocking realisation that overturned a lot of the medical 'truth' he'd taken for granted: our dietary guidelines and food pyramid have no scientific basis. So he switched to a low-carb, healthy fat lifestyle - and dropped 13 kilos, lowered his insulin levels and drastically improved his liver function in just three months. In *A Fat Lot of Good* Dr Brukner busts the dietary myths we've been living by for decades and gives you all the information you need, in as simple a way as possible, to live a longer, healthier and - most importantly - more enjoyable life. *A Fat Lot of Good* features:

- The real reasons why we're all getting fatter and less healthy
- The lowdown on carbs, fats and proteins: what they do, which we actually need and how much
- What you need to know about insulin, inflammation and the gut microbiome
- Dr Brukner's Five Golden Rules for a healthy lifestyle
- Tips on reading food labels, making smart choices when eating out and buying real food on a budget
- Advice on how to get the right levels of exercise, sleep and sun to boost your health
- A selection of simple low-carb, healthy fat recipes to get you started

Packed full of the latest research and countless practical tips, *A Fat Lot of Good* is the complete toolkit for building the healthy lifestyle that's right for you. All author proceeds donated to SugarByHalf.

The Real Meal Revolution: Low Carb Cooking is the go-to resource for anyone who wants to cook better low-carb foods right now and for many years to come. It is a book that will teach you the fundamentals behind making any dish delicious by honing in on classic flavour combinations, basic cooking techniques and affordable, readily accessible ingredients.
