The Girl from Everywhere, the first of two books, blends fantasy, history, and a modern sensibility. Its sparkling wit, breathless adventure, multicultural cast, and enchanting romance will dazzle readers of Sabaa Tahir and Leigh Bardugo. Modern-day New York City, nineteenth-century Hawaii, other lands seen only in myth and legend—Nix has been to them all. But when her father gambles with her very existence, it all may be about to end. Rae Carson meets Outlander in this epic debut fantasy. If there is a map, Nix's father can sail his ship, The Temptation, to any place and any time. But now that he's uncovered the one map he's always sought—1868 Honolulu, the year before Nix's mother died in childbirth—Nix's life, her entire existence, is at stake. No one knows what will happen if her father changes the past. It could erase Nix's future, her dreams, her adventures . . . her connection with the charming Persian thief, Kash, who's been part of their crew for two years.

His wife and aide, Lieutenant Meg Fenton, is frantic, and waits for him-in 2018. admiral. Admiral Raymond Spruance is commanding officer of Carrier Task Force 16. After hearing about Harry's wild claims, Spruance orders him brought to his flagship, the USS Enterprise. After Harry tells him about time travel, Spruance is convinced the man is insane. But after speaking to him at length, Spruance is amazed at Harry's knowledge of naval tactics and strategy. He calls Harry's bluff and orders him to stay aboard the Enterprise for her upcoming engagement at the Battle of Midway. By the end of the battle, Spruance thinks of Harry Fenton as a friend, and even calls him "admiral." Now Harry needs to figure out how to travel back to 2018, to his carrier command, but most importantly, to the love of his life, Lieutenant Meg.

A beautifully packaged edition of one of García Márquez's most beloved novels, with never-before-seen color illustrations by the Chilean artist Luisa Rivera and an interior design created by the author's son, Gonzalo García Barcha. In their youth, Florentino Ariza and Fermina Daza fall passionately in love. When Fermina eventually chooses to marry a wealthy, well-born doctor, Florentino is devastated, but he is a romantic. As he rises in his business career he whiles away the years in 622 affairs—yet he reserves his heart for Fermina. Her husband dies at last, and Florentino purposefully attends the funeral. Fifty years, nine months, and four days after he first declared his love for Fermina, he will do so again.

The dramatic human story of an epic scientific quest and of one man's forty-year obsession to find a solution to the thorniest scientific dilemma of the day--"the longitude problem." Anyone alive in the eighteenth century would have known that "the longitude problem" was the thorniest scientific dilemma of the day-and had been for centuries. Lacking the ability to measure their longitude, sailors throughout the great ages of exploration had been literally lost

at sea as soon as they lost sight of land. Thousands of lives and the increasing fortunes of nations hung on a resolution. One man, John Harrison, in complete opposition to the scientific community, dared to imagine a mechanical solution—a clock that would keep precise time at sea, something no clock had ever been able to do on land. Longitude is the dramatic human story of an epic scientific quest and of Harrison's forty-year obsession with building his perfect timekeeper, known today as the chronometer. Full of heroism and chicanery, it is also a fascinating brief history of astronomy, navigation, and clockmaking, and opens a new window on our world.

With his novel *City of Fire*, Robert Ellis debuted a dynamic new character in Los Angeles detective Lena Gamble, but also captured a vivid picture of the city of Los Angeles. Readers and critics made *City of Fire* an instant phenomenon, as the book became a Los Angeles Times bestseller and was named a top summer read by *People* magazine, *USA Today*, and *The New York Times*. Now Lena Gamble is a cop held in disgrace by department higher-ups for the explosive way the Romeo case played out, though she's still hailed as a hero by her colleagues for

catching the killer. For her punishment, she hasn't handled a real murder investigation in eight months. When the chief finally tosses her a case, she's thrilled until she gets a look at the scene and realizes he's probably setting her up to be exiled once and for all: The victim is unidentified, and there are no witnesses, and no leads. Just the body, chopped into pieces and dropped in a Dumpster—gruesome enough to ensure that once again the media will be following Lena's every move. Robert Ellis delivers another high-speed, commercial, powerful read, featuring one of the most engaging and vibrant police characters on the shelf today.

which is one of the planets of the solar system of the star Zumm. Three of the planets of Zumm have intelligent life in spite of the differing surface temperatures of the three planets. There are of course many stars in this sector of the galaxy and because of the huge distances separating various planets concerned communication between them is somewhat sporadic.

Ancient myths told of a place called Earth, but the modern world knew it was nonsense. Science knew the Ship was all the Universe, and as long as the sacred Converter was fed, lights would glow and air would flow through the miles of metal corridors. Hugh never questioned these truths until a despised mutie showed him the Control Room and he learned the true nature of the Ship and its mission.

After escaping the dangers of the rogue loader bots and fighting for control of their own cybernetic enhancements, the kid crew finds itself in an even bigger mess. The ship's systems seem determined to destroy them. If they cannot regain control, the crew faces the possibility of being burned, drowned, or ejected into deep space! Luckily the kids have an ally, an AI named Ship, willing to help them dodge the forest fires, survive the floods, and escape the space vacuum, all while they search to unravel the mystery of what is happening to the Scorpio!

A Sea of Fear You're Five-Star Admiral Harry Fenton, who President Blake calls the greatest fighting admiral in American history. Along with your Navy Commander wife, Meg, you lead your carrier strike group against the worst enemy the country has faced since World War II, a small nation that is intent on destroying the world's shipping industry. The seas of the world have become scenes of plunder and pillage, not to mention mass murder. The president has convinced you to come out of retirement and put an end to the looming crisis. He promotes you to Fleet Admiral, the highest-ranking officer since Admiral Chester Nimitz. You and Meg were having a pleasant retirement, running a world class resort that you bought in Rhode Island. But when the president pleads you to "Give 'em

Hell, Harry," you know that you can't ignore his call to duty. As people who have time traveled in the past, you come up with an idea to travel three years into the future. With President Blake's blessing, you and Meg lead a group of officers into the future. What you find is horrifying, an America taken over by a totalitarian dictator. You return to the past and report your findings. President Blake, hearing your terrifying story, convinces you that you have an even bigger call to duty, the greatest challenge of your life. You take on the challenge for one reason—Meg will be at your side. As in the first two books of the Harry and Meg Series, *The Maltese Incident* and *The Violent Sea*, *A Sea of Fear* is a sweet romance between two of literature's most exciting and likeable characters, Harry and Meg Fenton. *A Sea of Fear* is a story of war, politics, time travel, and love.

For Althea's young nephew, wrenched from his religious studies and forced to serve aboard the ship, the *Vivacia* is a life sentence. But the fate of the

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY MARIE CLAIRE Everything changes in a single moment for Dawn Edelstein. She’s on a plane when the flight attendant makes an announcement: Prepare for a crash landing. She braces herself as thoughts flash through her mind. The shocking thing is, the thoughts are not of her husband but of a man she last saw fifteen years ago: Wyatt Armstrong. Dawn, miraculously, survives the crash, but so do all the doubts that have suddenly been raised. She has led a good

life. Back in Boston, there is her husband, Brian, their beloved daughter, and her work as a death doula, in which she helps ease the transition between life and death for her clients. But somewhere in Egypt is Wyatt Armstrong, who works as an archaeologist unearthing ancient burial sites, a career Dawn once studied for but was forced to abandon when life suddenly intervened. And now, when it seems that fate is offering her second chances, she is not as sure of the choice she once made. After the crash landing, the airline ensures that the survivors are seen by a doctor, then offers transportation to wherever they want to go. The obvious destination is to fly home, but she could take another path: return to the archaeological site she left years before, reconnect with Wyatt and their unresolved history, and maybe even complete her research on The Book of Two Ways—the first known map of the afterlife. As the story unfolds, Dawn’s two possible futures unspool side by side, as do the secrets and doubts long buried with them. Dawn must confront the questions she’s never truly asked: What does a life well lived look like? When we leave this earth, what do we leave behind? Do we make choices . . . or do our choices make us? As two skilled detectives, you and Bob instantly get into the problem and resolve to find out what is going on, and who is causing it. The news programs ignore the seriousness of the issue and report the quarantine as if it's just a question of a change in weather. You don't recognize any of the TV reporters. To your horror, you soon discover that the quarantine is only part of the problem. It's part of a vast conspiracy, a conspiracy that involves a secretive organization from Utah, inappropriately named The Committee of Freedom. Turning upside down everything you know about law enforcement and investigation, you and Bob find out that the conspiracy is known as The Long Island Project, a sinister program that includes not only the quarantine of Long Island, but mind control and time travel. After nearly two years separated, she is excited to be related that for once, time is on their side, and she immediately says yes when Atlas asks her on a date. But her excitement is quickly hampered by the knowledge that, though they are no longer married, Ryle is still very much a part of her life—and Atlas Corrigan is the one man he will hate being in his ex-wife and daughter's life. Driven by a passion for travel and history and a love of ships and the sea, former Monty Python stalwart and beloved television globe-trotter Michael Palin explores the world of HMS Erebus, last seen on an ill-fated voyage to chart the Northwest Passage. Michael Palin brings the fascinating story of the Erebus and its occupants to life, from its construction as a bomb vessel in 1826 through the flagship years of James Clark Ross's Antarctic expedition and finally to Sir John Franklin's quest for the holy grail of navigation—a route through the Northwest Passage where the ship disappeared into the depths of the sea for more than 150 years. It was rediscovered under the arctic waters in 2014. Palin travels across the world—from Tasmania to the Falkland Islands and the Canadian Arctic—to offer a firsthand account of the terrain and conditions that would have confronted the Erebus and her doomed final crew. Delving into the research, he

describes the intertwined careers of the two men who shared the ship's journeys: Ross, the organizational genius who mapped much of the Antarctic coastline and oversaw some of the earliest scientific experiments to be conducted there; and Franklin, who, at the age of sixty and after a checkered career, commanded the ship on its last disastrous venture. Expertly researched and illustrated with maps, photographs, paintings, and engravings, *Erebus* is an evocative account of two journeys: one successful and forgotten, the other tragic yet unforgettable.

Soldier boys emerged from the darkness. Guns gleamed dully. Bullet bandoliers and scars draped their bare chests. Ugly brands scored their faces. She knew why these soldier boys had come, she knew what they sought, and she knew, too, that if they found it, her best friend would surely die. In a dark future America where violence, terror, and grief touch everyone, young refugees Ma and Mouse have managed to leave behind the war-torn lands of the Drowned Cities by escaping into the jungle outskirts. But when they discover a wounded half-man--a bioengineered war bot named Tool--who is being hunted by a vengeful band of soldiers, their fragile existence quickly collapses. One is taken prisoner by merciless soldier boys, and the other is faced with an impossible decision: Risk everything to save a friend, or flee to a place where freedom might finally be possible. This thrilling companion to Paolo Bacigalupi's highly acclaimed *Ship Breaker* is a haunting and powerful story of loyalty, survival, and heart-pounding adventure.

H. G. Wells wasn't the only nineteenth-century writer to dream of a time machine. The Spanish playwright Enrique Gaspar published *El anacronópete*—"He who flies against time"—eight years before Wells's influential work appeared. After being rescued as infants from a sinking ocean liner in 1914, Marian and Jamie Graves are raised by their dissolute uncle in Missoula, Montana. There--after encountering a pair of barnstorming pilots passing through town in beat-up biplanes--Marian commences her lifelong love affair with flight. At fourteen she drops out of school and finds an unexpected and dangerous patron in a wealthy bootlegger who provides a plane and subsidizes her lessons, an arrangement that will haunt her for the rest of her life, even as it allows her to fulfill her destiny: circumnavigating the globe by flying over the North and South Poles. A century later, Hadley Baxter is cast to play Marian in a film that centers on Marian's disappearance in Antarctica. Vibrant, canny, disgusted with the claustrophobia of Hollywood, Hadley is eager to redefine herself after a romantic film franchise has imprisoned her in the grip of cult celebrity. Her immersion into the character of Marian unfolds, thrillingly, alongside Marian's own story, as the two women's fates--and their hunger for self-determination in vastly different geographies and times--collide. Epic and emotional, meticulously researched and gloriously told, Great Circle is a monumental work of art, and a tremendous leap forward for the prodigiously gifted Maggie Shipstead.
