Studies of the English  
gentleman have tended  
to focus mainly on the  
nineteenth century,  
encouraging the implicit  
assumption that this  
influential literary trope

has less resonance for twentieth-century literature and culture. Christine Berberich challenges this notion by showing that the English gentleman has proven to be a remarkably adaptable and relevant ideal that continues to influence not only literature but other forms of representation, including the media and

advertising industries. Focusing on Siegfried Sassoon, Anthony Powell, Evelyn Waugh and Kazuo Ishiguro, whose presentations of the gentlemanly ideal are analysed in their specific cultural, historical, and sociological contexts, Berberich pays particular attention to the role of nostalgia and

its relationship to 'Englishness'. Though 'Englishness' and by extension the English gentleman continue to be linked to depictions of England as the green and pleasant land of imagined bygone days, Berberich counterbalances this perception by showing that the figure of the English gentleman is the

medium through which these authors and many of their contemporaries critique the shifting mores of contemporary society. Twentieth-century depictions of the gentleman thus have much to tell us about rapidly changing conceptions of national, class, and gender identity.
