

Towards An International Criminal Procedure Oxford

"Volume 3 of the International Criminal Law Practitioner Library completes the review of international criminal law begun in Volumes 1 and 2, which analyse the forms of responsibility and the elements of the core crimes. This volume reviews the procedural law and practices of the international criminal tribunals from investigation to trial, appeal, and punishment, and examines the framework within which the substantive law operates. The authors present a critical study of those procedures that are essential to effective investigations and fair trials, and explore how the ICC, ICTY, and ICTR - as well as the SCSL and other internationalised tribunals, where relevant - have shaped the evolution of international criminal procedure in order to meet new challenges and changing circumstances. The key jurisprudence and rule amendments up to 1 December 2009 have been surveyed, making this a highly relevant and timely work"--

This book examines how the functioning of the International Criminal Court has become a forum of convergence between the common law and civil law criminal justice systems. Four countries were selected as primary examples of these two legal traditions: the United States, England and Wales, Germany and Poland. The first layer of analysis focuses on selected elements of the model of accusation that are crucial to the model adopted by the ICC. These are: development of the notion of the prosecutor's independence in view of their ties to the countries and the Security Council; the nature and limits of the prosecutor's discretionary powers to initiate proceedings before the ICC; the reasons behind the prosecutor's choice of both defendants and charges; the role the prosecutor plays in the procedure of disclosure of evidence and consensual termination of proceedings; and the determinants of the model of accusation used during trial and appeal proceedings. The second layer of the book consists in an analysis of the motives behind applying particular solutions to create the model of accusation before the ICC. It also shows how the model of accusation gradually evolved in proceedings before the military and ad hoc tribunals: ICTY and ICTR. Moreover, the question of compatibility of procedural institutions is addressed: In what ways does adopting a certain element of criminal procedure, e.g. discretionary powers of the prosecutor to initiate criminal proceedings, influence the remaining procedural elements, e.g. the existence of the dossier of a case or the powers of a judge to change the legal classification of the criminal behavior appearing in the indictment? "The ambitious aim of the work is to create a guiding framework for international criminal procedural law and practices in the future. As explained by the working groups, the overarching objective of the project is to assist the challenge of delivering fair but also effective trials". -- FOREWORD.

An Introduction to International Criminal Law and Procedure Cambridge University Press

Presents theories, practices and critiques alongside each other to engage students, scholars and professionals from multiple fields. This title is also available as Open Access on Cambridge Core.

Drawing on the critical legal tradition, the collection of international scholars gathered in this volume analyse the complicities and limitations of International Criminal Law. This area of law has recently experienced a significant surge in scholarship and public debate; individual criminal accountability is now firmly entrenched in both international law and the international consciousness as a necessary mechanism of responsibility. Critical Approaches to International Criminal Law: An Introduction shifts the debate towards that which has so far been missing from the mainstream discussion: the possible injustices, exclusions, and biases of International Criminal Law. This collection of essays is the first dedicated to the topic of critical approaches to international criminal law. It will be a valuable resource for scholars and students of international criminal law, international law, international legal theory, criminal law, and criminology.

Towards an International Criminal Procedure

The move to end impunity for human rights atrocities has seen the creation of international and hybrid tribunals and increased prosecutions in domestic courts. The Oxford Companion to International Criminal Justice is the first major reference work to provide a complete overview of this emerging field. Its nearly 1100 pages are divided into three sections. In the first part, 21 essays by leading thinkers offer a comprehensive survey of issues and debates surrounding international humanitarian law, international criminal law, and their enforcement. The second part is arranged alphabetically, containing 320 entries on doctrines, procedures, institutions and personalities. The final part contains over 400 case summaries on different trials from international and domestic courts dealing with war crimes, crimes against humanity, genocide, torture, and terrorism. With analysis and commentary on every aspect of international criminal justice, this Companion is designed to be the first port of call for scholars and practitioners interested in current developments in international justice.

Since the adoption of the Rome Statute of the International Criminal Court in 1998, international criminal law has rapidly grown in importance. This second edition of the first volume of an acclaimed three-volume Treatise on International Criminal Law deals with the foundations and general part of international criminal law, and general principles of international criminal justice. Taking into account the scholarly literature, not only sources written in English but also in French, German, Italian, Portuguese, and Spanish, the book draws on the author's extensive academic work and practical experience in international criminal law. This second edition of the authoritative volume has been completely revised, updated, and rewritten in some parts. These comprehensive updates ensure that Kai Ambos' Treatise remains an indispensable reference work for academics and practitioners of international criminal law.

This book provides an in-depth examination of the judicial response at the international criminal tribunals (ICTs) to the violation of procedural standards in the pre-trial phase of proceedings. It does so against the backdrop of the assumption that certain particularities of international criminal proceedings may warrant a different approach to the matter than at the national level. By reference to relevant human rights standards and to national criminal procedure, as well as to theoretical accounts of the judicial response to pre-trial procedural violations, this book assesses the ICTs' law and practice in this regard, thereby identifying points of concern and making suggestions for improvement. In doing so, it considers the most suitable rationale for responding to procedural violations committed in the pre-trial phase of international criminal proceedings and the merits of judicial discretion in this context, as well as the impact of certain particularities of such proceedings on the determination of how to address procedural violations. The book is intended for academics and practitioners in the field of (international) criminal law who want to gain a deeper understanding of the possible impact of pre-trial procedural violations on criminal proceedings. Kelly Pitcher is Assistant Professor of Criminal Law and Criminal Procedure at Leiden University in The Netherlands. This title sets out and analyses the procedural law applied by the International Criminal Court, systematically analysing the Court's organisational structure, overall procedural setting and the individual procedural regulations in comparison to that of other international tribunals.

Sustainable Development, International Criminal Justice, and Treaty Implementation

Volume I: Foundations and General Part

Since the adoption of the Rome Statute of the International Criminal Court in 1998, international criminal law has rapidly grown in importance. This three-volume treatise on international criminal law presents a foundational, systematic, consistent, and comprehensive analysis of the field. Taking into account the scholarly literature, not only sources written in English but also in French, German, Italian, Portuguese, and Spanish, the book draws on the author's extensive academic and practical work in international criminal law. This third volume offers a comprehensive analysis of the procedures and implementation of international law by international criminal tribunals and the International Criminal Court. Through analysis of the framework of international criminal procedure, the author considers each stage in the process of proceedings before the ICC, including the role of legal participants, the scope of jurisdiction, and the enforcement of sentences. The full three-volume treatise addresses the entirety of international criminal law, re-stating and re-examining the fundamental principles upon which it rests, the manner it is enacted, and the key issues that are shaping its future. It is essential reading for practitioners, scholars, and students of international criminal law alike.

International Criminal Procedure: Principles and Rules is a comprehensive study of international criminal proceedings written by over forty leading experts in the field. The book offers a systematic overview and detailed comparison of the standards governing the conduct of proceedings in all major international and internationalized criminal courts from the Nuremberg and Tokyo Tribunals to the recently established Cambodian Extraordinary Chambers and the Special Tribunal for Lebanon. Based on a major research project, the study covers all procedural phases from the initiation of investigation to

the appeals process. It pays special attention to the crosscutting themes which shape the contemporary discourse on international criminal justice, including the law of evidence, the defence issues, the procedural role of victims, and negotiated dismissal of international crime cases. The book not only takes stock of the procedural legacy of the UN ad hoc Tribunals for the former Yugoslavia and Rwanda and the International Criminal Court, but also reflects on the future directions of international criminal procedure. Investigating the tribunals' procedural law and practice through the prism of human rights law, domestic legal traditions, and tribunals' special objectives, the expert group puts forth proposals on how the challenges facing international criminal jurisdictions can best be met. International Criminal Procedure will be an indispensable work for practitioners involved in the adjudication of serious crimes on both national and international level, as well as international law students and academics.

This volume presents an overview of the principal features of the legacy of International Tribunals and an assessment of their impact on the International Criminal Court and on the review process of the Rome Statute. It illustrates the foundation of a system of international criminal law and justice through the case-law and practices of the UN ad hoc tribunals and other internationally assisted tribunals and courts. These examples provide advice for possible future developments in international criminal procedure and law, with particular reference to their impact on the ICC and on national jurisdictions. The review process of the Rome Statute is approached as a step of a review process to provide a perspective of the developments in the field since the Statute's adoption in 1998.

This book examines the rapid development of the fundamental concept of a crime in international criminal law from a comparative law perspective. In this context, particular thought has been given to the catalyzing impact of the criminal law theory that has developed in major world legal systems upon the crystallization of the substantive part of international criminal law. This study offers a critical overview of international and domestic jurisprudence with regard to the construal of the concept of a crime (actus reus, mens rea, defences, modes of liability) and exposes roots of confusion in international criminal law through a comprehensive comparative analysis of substantive criminal laws in selected legal jurisdictions.

This includes a critical assessment of differing approaches across the institutions as well as jurisprudential trends and developments. It therefore serves as a comprehensive guide to the law on evidence and international criminal procedures for practitioners and scholars alike.

Written by a team of international lawyers with extensive academic and practical experience of international criminal law, the fourth edition of this leading textbook offers readers comprehensive coverage and a high level of academic rigour while maintaining its signature accessible and engaging style. Introducing the readers to the fundamental concepts of international criminal law, as well as the domestic and international institutions that enforce that law, this book engages with critical questions, political and moral challenges, and alternatives to international justice. Suitable for undergraduate and postgraduate students, academics and practitioners in the field, and cited by the International Criminal Tribunal for Yugoslavia, the International Criminal Court, the Special Court for Sierra Leone, the Extraordinary Chambers in the Courts of Cambodia, and the highest courts in domestic systems, this book is a must-read for anyone interested in learning more about international criminal law.

International Criminal Law in Context provides a critical and contextual introduction to the fundamentals of international criminal law. It goes beyond a doctrinal analysis focused on the practice of international tribunals to draw on a variety of perspectives, capturing the complex processes of internationalisation that criminal law has experienced over the past few decades. The book considers international criminal law in context and seeks to account for the political and cultural factors that have influenced – and that continue to influence – this still-emerging body of law. Considering the substance, procedures, objectives, justifications and impacts of international criminal law, it addresses such topics as: • the history of international criminal law; • the subjects of international criminal law; • transitional justice and international criminal justice; • genocide, crimes against humanity, war crimes and the crime of aggression; • sexual and gender-based crimes; • international and hybrid criminal tribunals; • sentencing under international criminal law; and • the role of victims in international criminal procedure. The book will appeal to those who want to study international criminal law in a critical and contextualised way. Presenting original research, it will also be of interest to scholars and practitioners already familiar with the main legal and policy issues relating to this body of law.

Document from the year 2019 in the subject Law - European and International Law, Intellectual Properties, Tufts University, language: English, abstract: The focus of this book is the analysis of male sexual crimes in international criminal justice. The first part of the present research work is focused on the legal analysis of the relevant articles of international criminal court's Statute regarding the obligation of cooperation between states for the punishment of serious crimes against humanity and war. Judicial development, starting with the ad hoc tribunals and arriving at causes at various stages of proceedings still ongoing in the International Criminal Court (ICC), opens doctrinal and comparative national debates especially in the case of lacking states cooperation, seeking to elaborate specific topics such as the obligation of states cooperation, requests for assistance during preliminary investigations, during inquires, and confidential information. Court assistance to states parties participating in the Statute, suspending the execution of a request, the role of the prosecutor and the

non-assistance of some states impede the development and operation of international criminal justice. The second part has attempted to analyze sexual crimes and especially the crime of male rape. The jurisprudence of international criminal tribunals and the ICC have tried to qualify rape either as a crime of genocide in the form of serious and physical injuries, even if not necessarily permanent (lett.b) Art.6 of the Rome Statute; or as a crime against humanity where there are elements of context and above all material elements that emerge from the definitions given by the ad hoc tribunals and the elements of crimes; or even as a war crime in case it is implemented to that of sexual violence, according to a gender specific relationship to victims. Judges through the jurisprudence have included in this context any conduct of a sexual type of aggression to human dignity that does not consist in an act of penetration and that does not involve physical contact. The contrasts are always open. Due to the lack of dealing with a "particular" crime and difficult to prove it or testify before an international court. The indication on the level of gravity of the crime is necessary for the relevance of sexual violence and rape as crimes against humanity that we will see in the coming years.

Since the adoption of the Rome Statute of the International Criminal Court in 1998, international criminal law has rapidly grown in importance. This three-volume Treatise on International Criminal Law presents a foundational, systematic, consistent and comprehensive analysis of international criminal law. Taking into account the scholarly literature, not only sources written in English but also in French, German, Italian, Portuguese, and Spanish, the book draws on the author's extensive academic and practical work in international criminal law. This first volume addresses the foundations of international criminal law and the emerging general principles. It examines the history of the discipline and the concepts behind it. Looking at the sources of international criminal law, the book then moves to investigate the general structure of crime in international criminal law, and to address in detail the role played by the concept of individual criminal responsibility. The subjective requirements of criminal responsibility are examined, and also those defences that exclude such responsibility. The full three-volume treatise will address the entirety of international criminal law, re-stating and re-examining the fundamental principles upon which it rests, the manner it is enacted, and the key issues that are shaping its future. It will be essential reading for practitioners, scholars, and students of international criminal law alike.

'International Criminal Law' presents a full and systematic overview of the field, placing it in the context of wider international law. It offers a high-level, analytical examination with particular reference to the concept of an international crime and the role of domestic courts in prosecuting international crimes.--

'International Criminal Procedure, edited by two insiders to international criminal proceedings, Professor Linda Carter and Professor Fausto Pocar, a judge at the ICTY and a former President of this Tribunal, is a coherently organized, well-researched, very informative and not the least elegantly-written contribution to a young and rapidly developing legal sub-discipline. The book provides its reader with a highly accessible and up-to date introduction into key elements of international criminal procedure as well as with critical commentary and rich inspiration for improvements of current practices.' – Claus Kreß LL.M. (Cantab.), University of Cologne, Germany and Institute for International Peace and Security Law 'This book addresses compelling issues that have come before international criminal tribunals. They include the self-representation of accused persons, plea bargaining and victim participation. It usefully approaches all of the issues and problems from a comparative law perspective. This excellent and accessible work is essential reading for practitioners, faculty and students of international criminal law.' – Richard Goldstone, Retired Justice of the Constitutional Court of South Africa and former Chief Prosecutor of the United Nations International Criminal Tribunals for the former Yugoslavia and Rwanda The emergence of international criminal courts, beginning with the International Criminal Tribunal for the former Yugoslavia and including the International Criminal Court, has also brought an evolving international criminal procedure. In this book, the authors examine selected issues that reflect a blending of, or choice between, civil law and common law models of procedure. The issues include background on civil law and common law legal systems; plea bargaining; witness proofing; written and oral evidence; self-representation and the use of assigned, standby, and amicus counsel; the role of victims; and the right to appeal. International Criminal Procedure will appeal to academics, students, researchers, lawyers and judges working in the field of international criminal law.

This systematic, contextual and practice-oriented account of complementarity explores the background and historical expectations associated with complementarity, its interpretation in prosecutorial policy and judicial practice, its context (ad hoc tribunals, universal jurisdiction, R2P) and its impact in specific situations (Colombia, Congo, Uganda, Central African Republic, Sudan and Kenya). Written by leading experts from inside and outside the Court and scholars from multiple disciplines, the essays combine theoretical inquiry with policy recommendations and the first-hand experience of practitioners. It is geared towards academics, lawyers and policy-makers who deal with the impact and application of international criminal justice and its interplay with peace and security, transitional justice and international relations.

Judicial Responses to Pre-Trial Procedural Violations in International Criminal Proceedings

In The Right to Be Present at Trial in International Criminal Law Caleb H. Wheeler analyses how the right to be present is understood by international criminal courts and tribunals in the context of the right to a fair trial.

Sustainable Development, International Criminal Justice, and Treaty Implementation provides a serious and timely perspective on the relationship between two important and dynamic fields of international law. Comprising chapters written by leading academics and international lawyers, this book examines how the principles and practices of international criminal law and sustainable development can contribute to one another's elaboration, interpretation and implementation. Chapters in the book discuss the potential and limitations of international criminalization as a means for protecting the basic foundations of sustainable development; the role of existing international crimes in penalizing serious forms of economic, social, environmental and cultural harm; the indirect linkages that have developed between

sustainable development and various mechanisms of criminal accountability and redress; and innovative proposals to broaden the scope of international criminal justice. With its rigorous and innovative arguments, this book forms a unique and urgent contribution to current debates on the future of global justice and sustainability.

International criminal law is at a crucial point in its history and development, and the time is right for practitioners, academics and students to take stock of the lessons learnt from the past fifteen years, as the international community moves towards an increasingly uni-polar international criminal legal order, with the International Criminal Court (ICC) at the helm. This unique Research Companion takes a critical approach to a wide variety of theoretical, practical, legal and policy issues surrounding and underpinning the operation of international criminal law as applied by international criminal tribunals. The book is divided into four main parts. The first part analyses international crimes and modes of liability, with a view to identifying areas which have been inconsistently or misguidedly interpreted, overlooked to date or are likely to be increasingly significant in future. The second part examines international criminal processes and procedures, and here the authors discuss issues such as victim participation and the rights of the accused. The third part is a discussion of complementarity and sentencing, while the final part of the book looks at international criminal justice in context. The authors raise issues which are likely to provide the most significant challenges and most promising opportunities for the continuing development of this body of law. As international criminal law becomes more established as a distinct discipline, it becomes imperative for international criminal scholarship to provide a degree of critical analysis, both of individual legal issues and of the international criminal project as a whole. This book represents an important collective effort to introduce an element of legal realism or critical legal studies into the academic discourse. Authoritative, succinct and up-to-date introduction to the law and practice of the International Criminal Court.

International Criminal Law provides a set of teaching materials furnishing students with a grounding in the transnational issues likely to arise in federal criminal cases, and also in the law produced as a consequence of international efforts to impose criminal responsibility on the perpetrators of human rights atrocities.

International Criminal Law offers, for teaching purposes, a collection of cases (mainly domestic) and other materials, together with notes and questions about those cases and materials. The first part introduces the field of international criminal law, and includes a chapter on the general principles of both domestic and international law governing efforts to apply U.S. criminal law to foreign crimes and foreign criminals. The third part addresses procedural aspects of trying such cases in U.S. courts. This section also treats the extraterritorial application of the U.S. Constitution, immunities from jurisdiction, mutual assistance in criminal cases, extradition, alternatives to extradition, prisoner transfers, recognition of foreign criminal judgments, and the bearing on international human rights instruments on criminal procedure. The final part of International Criminal Law deals with the prosecution of international crimes, and takes up the question of what crimes constitute international crimes. This section also discusses the Nuremberg and Tokyo precedents, the ad hoc tribunals for the former Yugoslavia and for Rwanda, the Rome Statute of the International Criminal Court, and the substantive law of international crimes such as aggression, genocide, crimes against humanity, and war crimes. A Critical Introduction to International Criminal Law

An Introduction to the International Criminal Court

Crimes of atrocity have profound and long-lasting effects on any society. The difference between triggering and preventing these tragic crimes often amounts to the choice between national potential preserved or destroyed. It is also important to recognise that they are not inevitable: the commission of these crimes requires a collective effort, an organisational context, and long planning and preparation. Thus, the idea of strengthening preventative action has taken on greater relevance, and is now encompassed in the emerging notion of 'responsibility to prevent'. International courts and tribunals contribute to this effort by ending impunity for past crimes. Focusing investigations and prosecution on the highest leadership maximises the impact of this contribution. The ICC has an additional preventative mandate which is fulfilled by its timely intervention in the form of preliminary examinations.

Moreover, when situations of atrocity crimes are triggered, its complementarity regime incentivises states to stop violence and comply with their duties to investigate and prosecute, thus strengthening the rule of law at the national level. The new role granted

to victims by the Rome Statute is key to the ICC's successful fulfilment of these functions. This new book of essays, which includes the author's unpublished inaugural lecture at Utrecht University, examines these issues and places particular emphasis on the additional preventative mandate of the ICC, the ICC complementarity regime, the new role granted to victims, and the prosecution of the highest leadership through the notion of indirect perpetration. 'The work of Professor Olasolo breaks new ground in the academic field of international criminal law, as an analysis of the system as a whole. I therefore wish to express my congratulations for this work.' From the Foreword by Luis Moreno Ocampo Prosecutor, International Criminal Court, The Hague, 27 April 2011 '*[Professor Hector Olasolo's] compilation provides an enormous source of easy reference to students, academia and legal actors in the field of international law. A look at the titles compiled in this volume demonstrates the present challenges to international criminal justice'. From the Preliminary Reflections by Elizabeth Odio Benito Judge and Former Vice-President, International Criminal Court, The Hague, May 2011 'This collection, written by a brilliant and prolific scholar and practitioner of international criminal justice, is an insightful and important contribution to the existing literature...Each chapter in this collection is copiously footnoted and thoroughly researched, making it an important reference tool for scholars and practitioners in the field. Additionally and importantly, the chapters explore, without polemic, areas of controversy and dissent and thoughtfully and scrupulously set forth arguments for and against particular doctrinal choices.'* From the Introduction by Leila Nadya Sadat Henry H Oorschelp Professor of Law and Director, Whitney R Harris World Law Institute, Washington University School of Law; Alexis de Tocqueville Distinguished Fulbright Chair, Université de Cergy-Pontoise, Paris, Spring 2011

Criminological Approaches to International Criminal Law

A practical guide to what motivates international crimes and how these are structured and investigated in theory and practice.

Realizing Utopia is a collection of essays by a group of innovative international jurists. Its contributors reflect on some of the major legal problems facing the international community and analyse the inconsistencies or inadequacies of current law. They highlight the elements - even if minor, hidden, or emerging - that are likely to lead to future changes or improvements. Finally, they suggest how these elements can be developed, enhanced, and brought to fruition in the next two or three decades, with a view to achieving an improved architecture of world society or, at a minimum, to reshaping some major aspects of international dealings. Contributions to the book thus try to discern the potential, in the present legal construct of world society, that might one day be brought to light in a better world. As the impact of international law on national legal orders continues to increase, this volume takes stock of how far international law has come and how it should continue to develop. The work features an impressive list of contributors, including many of the leading authorities on international law and several judges of the International Court of Justice.
