The Swiss National Forest Inventory (NFI) is a forest survey on national level which started in 1982 and has already reached its 5th survey cycle (NFI5). It can be characterized as a multisource and multipurpose inventory where information is mainly collected from terrestrial field surveys using permanent sample plots. In addition, data from aerial photography, GIS and forest service questionnaires are also included. The NFI's main objective is to provide statistically reliable and sound data for forest researchers, ecologists, forest service, timber industry, national and international organizations as well as to international projects such as the Forest Resources Assessment of the United Nations. For Switzerland, NFI results are typically reported on national and regional level. State of the art methods are applied in all fields of data collection which have been proven to be of international interest and have even served as a basis for other European NFIs. The presented methods are representative for inventory around the globe. In 2001 the Swiss NFI published its methods for the first time. Since then, many methodological changes and improvements have been introduced. This book describes the complete set of methods and revisions since NFI2. It covers various topics ranging from inventory design and statistics to remote sensing, field survey methods and modelling. It also describes data quality concepts and the software framework used for data storage, statistical analysis and reporting.

What You Have Heard is True is a devastating, lyrical, and visionary memoir about a young woman's brave choice to engage with horror in order to help others. Written by one of the most gifted poets of her generation, this is the story of a woman's radical act of empathy, and her fateful encounter with an intriguing man who changes the course of her life. Carolyn Forché is twenty-seven when the mysterious stranger appears on her doorstep. The relative of a friend, he is a charming polymath with a mind as seemingly disordered as it is brilliant. She's heard rumors from her friend about who he might be: a lone wolf, a communist, a CIA operative, a sharpshooter, a revolutionary, a small coffee farmer, but according to her, no one seemed to know for certain. He has driven from El Salvador to invite Forché to visit and learn about his country. Captivated for reasons she doesn't fully understand, she accepts and becomes enmeshed in something beyond her comprehension. Together they meet with high-ranking military officers, impoverished farm workers, and clergy desperately trying to assist the poor and keep the peace. These encounters are a part of his plan to educate her, but also to learn for himself just how close the country is to war. As priests and farm-workers are murdered and protest marches attacked, he is determined to save his country, and Forché is swept up in his work and in the lives of his friends. Pursued by death squads and sheltering in safe houses, the two forge a rich friendship, as she attempts to make sense of what she's experiencing and establish a moral foothold amidst profound suffering. This is the powerful story of a poet's experience in a country on the verge of war, and a journey toward social conscience in a perilous time.

An award-winning scientist offers his unorthodox approach to childrearing: " Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions " (Amy Chua, author of Battle Hymn of the Tiger Mother). If you ' re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley ' s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You ' ll be laughing and learning at the same time.

In spite of all the assistance offered by electronic control systems, the latest generation of passenger car chassis still relies on conventional chassis elements. With a view towards driving dynamics, this book examines these conventional elements and their interaction with mechatronic systems. First, it describes the fundamentals and design of the chassis and goes on to examine driving dynamics with a particularly practical focus. This is followed by a detailed description and explanation of the modern components. A separate section is devoted to the axles and processes for axle development. With its revised illustrations and several updates in the text and list of references, this new edition already includes a number of improvements over the first edition.

Critical Issues in Ecotourism seeks to shake the current stagnant literature on the subject of ecotourism out of a state of complacency. Drawing upon emerging insights provided by pre-eminent scholars in the field it identifies and comprehensively addresses current critical issues. Accessible to both academic and non-academic audiences, it provides the reader with the following:
* A critical, direct and hard hitting analysis of the real issues that apply to the field of ecotourism
*Contributions from prominent international scholars that address issues of relevance to a diverse and international readership
* Dissemination of the scholarly works of social and natural science addressing this field
* A collection of works by outstanding international scholars, in a comprehensively planned and integrated book Incorporating rigorous scientific insights in specialised fields of research, for example, identifying and protecting critical habits where tourists engage with endangered species, Critical Issues in Ecotourism is an important and ground breaking contribution set to expose the increasingly mythologized field of ecotourism.

Operation IoTopia, a Malaysian thriller novel by Bruce Allsman A white hat hacker has to rescue two of his friends held captive by a mercenary at the behest of his frenemy, a diabolical billionaire technopreneur with a sinister plan. White hat hackers, Din Kamal and his wife, are professional penetration testers, freelance cyber security consultants based in Penang, Malaysia. When Gary Ang, a whistleblower at IoTopia Berhad, secretly copies his employer's top secret data and tries to escape with it, he finds a mercenary pursuing him.

While speeding away in his car, realizing the urgency, he uploads to his personal cloud the most important encrypted file and sends Din, the only hacker friend he could trust, a link to the file. During the subsequent high speed car chase across the Penang Second Bridge, Gary crashes his car. He dives into the sea, manages to escape, and calls Din from a budget hotel at Batu Kawan. Unfortunately, the mercenary abducts him just before Din arrives. Later, after failing to decrypt the file he had downloaded, Din realizes the gravity of the situation and enlists the help of Shila, his sister, a cyber crime investigator of the Malaysian government's cyber crime division to track down the mercenary's identity and employer. Further investigations reveal the identity of the mercenary and his employer, the founder and owner of IoTopia Berhad, a billionaire technopreneur from Penang and Din's longtime frenemy. Din enlists the help of Kumar, a hacker friend to hack into IoTopia Berhad's computer servers to uncover more information. Kumar attempts a hack but fails and suffers the same fate as Gary. Consequently, Din organizes a team to help him rescue Gary and Kumar. While formulating the rescue plan they uncover a sinister plot, code-named Operation IoTopia. What is it exactly? What are its true objectives? How will Din and his team mount a rescue operation and foil the sinister plot? Operation IoTopia, a Malaysian #thriller #novel, 181 pages

Toyota's Global Marketing Strategy

There are many books on the market that discuss the Toyota Production System but few that insightfully analyze its marketing strategy. Authored by former Toyota marketing executives, this is the first book of its kind to detail how Toyota's thinking habits go beyond the shop floor and influence and guide Toyota's marketing function. Toyota has expanded from a venture enterprise to one of the biggest global enterprises because of its innovative mindset (Toyota Thinking habits) problem solving, turning 180 degrees away from conventional thinking. Written by Toyota's former executive managing director and founder of Breakthrough Thinking, Toyota's Global Marketing Strategy: Innovation through Breakthrough Thinking and Kaizen: Explores Toyota's "Breakthrough Thinking" Examines how Toyota conducts information gathering. Illustrates how Toyota builds and maintains its unique business culture Shows how Toyota "goes to the customer" and comprehensively covers the Toyota car models. Shows how Toyota's cars have become some of the biggest selling models in the USA The authors of this book explore Toyota thinking habits as well as Toyota's global marketing strategy, which, since the 1980sa, has been expanding exponentially. The reader will understand the importance of thinking habits in the workplace and will know how to apply them using Toyota as the prime case study.
