Valley and Kyzylkum Desert. The impact of humanity on the earth overshoots the earth's bio-capacity to supply humanity's needs, meaning that people are living off earth's capital rather than its income. However, not all countries are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts. The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints. This leads to comparison and discussion of what living within the limits of the planet might mean.

Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives. This book takes a 'bottom-up' approach by calculating the footprints of daily living. The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future. Offering a global perspective on the question of sustainable living, this book will be of great interest to anyone with a concern for the future, as well as students and researchers in environmental studies, human geography and development studies.

independence, after half a century of Soviet occupation, in the immediate aftermath of the failed Moscow coup in August 1991. As the multi-national Soviet state disintegrated, Lithuania evolved, without war or violence, from a communist state and a command economy to a liberal democracy, a free market, and a society guaranteeing human and minority rights. Lithuania therefore offers a notable example of peaceful transition, all the more impressive in the light of the bloody conflict elsewhere in the former Soviet Union of Yugoslavia, where the

aspirations to independence of the constituent republics were either violently resisted or dissolved into inter-ethnic violence. Equally remarkable has been Lithuania's determination to 'return to Europe' after half a century of separation, even at the price of submerging its recently restored sovereign rights in the supranational European Union. The cost of membership in western economic and security organizations are judged to be worth paying to prevent Lithuania's being drawn once again into a putative Russian sphere of influence. On the

threshold of a new millennium therefore, Lithuania has made a pragmatic accommodation to the demands of becoming a modern European state, whilst vigorously resisting the dilution of her rich cultural and historical traditions.

These twin themes of accommodation and resistance are Lithuania's historical legacy to the current generations of Lithuanians as they integrate into European institutions and continue the modernization process.
