The most comprehensive and up-to-date guide to American and British special forces, covering all aspects of their equipment, training and deployment in the Iraq age of warfare. It takes a special kind of person to join the Special Forces and those to pass the stringent entrance requirements are subjected to the most rigorous training. They're trained to be super-fit, taught to survive in the most adverse conditions, and turned into killing machines. This book reveals what makes these men tick, and everything you need to know to become one of them. It covers all the types of training required - for fitness, combat, survival, navigation, communication, infiltration, interrogation, extraction and evasion. And it details the full array of weapons used, from small arms and knives to explosives and air back-up. Also included are full listings of all the units - including the SAS, Green Berets, SBS, Navy SEALs, Delta Force, Army Rangers - and their deployment in present-day conflicts such as Desert Storm, Somalia, Afghanistan, Iraq and anti-terrorist operations. A "densely packed and invigorating account" of the diplomatic and political approaches prescribed during the Libyan revolution and the Benghazi attack (The Herald). In this remarkable book, Mark Muller tells the story of British intervention in Libya and the Arab Spring from a unique civil society standpoint: he was there in Benghazi two weeks after the UN No-Fly Zone Resolution was passed, meeting with Rebel leaders to discuss how Western civil society might help them stabilize the country and resolve difficult legacy issues such as victim claims over Lockerbie and the supply of IRA Semtex. In an age when Western governments have become risk averse and distrusted in the Middle East, Muller documents how non-state mediators, non-governmental organizations, journalists, artists and like-minded diplomats, such as assassinated US Ambassador Chris Stevens, explore ways to support democratic movements and promote human rights in one of the world's most turbulent regions. Storm in the Desert describes a dramatic story of revolution and also the murky but sometimes inspiring role successive British governments have played in trying to contain conflict in the region. It gives a unique insight into the world of diplomacy and power politics and the way they impact upon ordinary human lives, suggesting that it is civil society not government that ultimately stabilizes countries and unearths the truth about conflict and the ill-treatment of civilians at the hand of state forces.

The Nashville Chronicles is a fascinating journalistic tour de force of the movie that legendary film critic Pauline Kael called "The funniest epic vision of America ever to reach the screen." In writing this book, Jan Stuart enjoyed the benefit of full cooperation from Altman, who sat for many hours of interviews, as well as most of the motley crew of cast and characters. In 1992 Ineke Bosman founded the PCC-Hand in Hand Community with three other Ghanaians. This is an inter-religious community that gives shelter and rehabilitation to abandoned and mentally handicapped children in Ghana. "I was moved by the plight of the mentally handicapped children who were abandoned and had nowhere to stay, literally nowhere. By 1992 I started to take some in my home and later this grew into the community as it is now, in the year 2006: a large and beautiful village in Nkoranza where 41 mentally handicapped children find a home and where 15 other youngsters find a new life by learning skills in the sheltered workshop." In the past few years Ineke Bosman has written down stories of Ghanaian emigrants. Looking for a way out of poverty, Libye, Europe, calls to them. Some are stories of success, but there are also stories of failures.

"Doing things by the book" acquires a whole new meaning in Brandon R. Schrand's memoir of coming of age in spite of himself. The "works cited" are those books that serve as Schrand's signposts as he goes from life as a hormone-crazed, heavy-metal wannabe in the remotest parts of working-class Idaho to a reasonable facsimile of manhood (with a stop along the way to buy a five-dollar mustard-colored M. C. Hammer suit, so he'll fit in at college). The Adventures of Huckleberry Finn informs his adolescent angst over the perceived injustice of society's refusal to openly discuss boners. The Great Gatsby serves as a metaphor for his indulgent and directionless college days spent in a drunken stupor (when he wasn't feigning interest in Mormonism to attract women). William Kittredge's Hole in the Sky parallels his own dangerous adulthood slide into alcoholism and denial. With a finely calibrated wit, a good dose of humility, and a strong supporting cast of literary characters, Schrand manages to chart his own story--about a dreamer thrown out of school as many times as he's thrown into jail--until he finally sticks his landing.

Great Lakes Conflagration' is the second in two volumes covering military operations in the Democratic Republic of Congo (DRC) at the turn from the 21st century. This volume explores developments in the DRC that led to the outbreak of violence in August 1998, and systematically details the continued build-up and status of the Congolese, Rwandan and Ugandan armies, as well as the forces of Angola, Namibia, Zimbabwe and other African countries that were sucked into the conflict. Recounted is the Rwandan attempt to topple the government of Laurent Kabila through an operation that saw a redeployment of some of best Rwandan units from Kigali and Goma to the western DRC, resulting in a series of fierce air-land clashes with Zimbabwean and Angolan forces and culminating in the Battle of Kinshasa. Also described is the fighting along what became the 'Eastern Front' in the DRC, as Zimbabwean and allied troops attempted to stop Rwandan, Ugandan and rebel advances out of Kivu Province in the direction of the Congo River through 1998 and 1999. These early phases of the war, or 'The First African War' as it has come to be known, were characterized by surprising outflanking and infiltration maneuvers; foreign mercenaries; Zimbabwean Hawk and Lynx light strikers flying intensive combat operations from N'Djili airport, half of which was occupied by Rwandans, Ugandans and Congolese rebels; interdiction strikes guided by special forces deployed deep behind enemy lines; operations of helicopter gunships and transport aircraft under intense ground attack in support of troops cut off by advancing opponents; use of transport aircraft as makeshift bombers in bad weather and by night and clashes of armored forces and many other elements of 'high-technology' warfare. All the protagonists deployed their best military units, their best equipment and some of their best military commanders, yet despite their best efforts, and hampered by in-fighting, the conflict ultimately resulted in a stalemate which dragged on for a further three years while negotiations bogged down. This book is illustrated with an extensive selection of exclusive photography, color profiles and markings, making it of special interest to enthusiasts and professionals alike.

An ancient Arab proverb states, "When Allah made the Sudan, he laughed." Had he known the country's future, he would have done better to cry. To most of the world, Sudan means Darfur and the tragedy of atrocities and ethnic cleansing that has occurred there. Canada's first involvement in Sudan was in 1884, when Canadian voyageurs were recruited to help rescue General Gordon, who was besieged in Khartoum by the Mahdi. Canada in Sudan introduces Canadians to this massive, troubled nation, telling the story from ancient times through to the modern era and the work of Canadian archaeologists, aid organizations, and Canadian Forces military observers deployed to Sudan as part of Operation Safari. On March 30, 2007, Minister for Foreign Affairs Peter MacKay said, "Sudan is an almost perfect storm of conflict, dislocation, underdevelopment, and brutality." Perhaps he was confirming that Canada will be in Sudan for a very long time.

The New York Times bestselling inside account of the attack against the U.S. diplomatic and intelligence outposts in Benghazi, Libya On the night of September 11, 2012, the American diplomatic mission at Benghazi, Libya, came under ferocious attack by a heavily armed group of Islamic terrorists. The prolonged firefight, and the attack hours later on a nearby CIA outpost, resulted in the deaths of four Americans, including the American ambassador to Libya, Christopher Stevens, the Information Officer, Sean Smith, and two former Navy SEALs, Tyrone Woods and Glen Doherty, working for the Central Intelligence Agency. After the fall of Qaddafi, Benghazi was transformed into a hotbed of fundamentalist fervor and a den of spies for the northern half of the African continent. Moreover, it became the center of gravity for terrorist groups strategically situated in the violent whirlwinds of the Arab Spring. On the eleventh anniversary of the 9/11 attacks against the United States, a group of heavily armed Islamic terrorists had their sights set on the U.S. diplomatic and intelligence presence in the city. Based on the exclusive cooperation of eyewitnesses and confidential sources within the intelligence, diplomatic, and military communities, Fred Burton and Samuel M. Katz reveal for the first time the terrifying twelve-hour ordeal confronted by Ambassador Christopher Stevens, Sean Smith,

his Diplomatic Security (DS) contingent, and the CIA security specialists who raced to rescue them. More than just the minute-by-minute narrative of a desperate last stand in the midst of an anarchic rebellion, *Under Fire* is an inspiring testament to the bravery and selflessness of the men and women who put their country first while serving in one of the most dangerous regions in the world. "Black Hawks Rising" tells the story of the formation and deployment of the African Union Mission to Somalia (AMISOM) in March 2007. Initially confined to peacekeeping within the Mogadishu enclave, it transformed into a peace-making mission. Many - including the author, who predicted the mission was DOA (Dead on Arrival) - gave the mission little chance of success. As a fighting force, however, AMISOM took on the Somali insurgents in 2010; expelled them from Central Mogadishu on Saturday, 6 August 2011; and expanded control of territory under the Somali Government in the succeeding years to most of Somalia. The opening chapters of the book take the reader behind the scenes to highlight the inconsistent - and sometimes disastrous - US policy in the Horn of Africa generally, and in Somalia (specifically dating back to the Kennedy administration in the early 1960s). Under President George Bush, the US strongly and vigorously opposed deployment of regional African troops in Somalia - instead sponsoring Somali factions to fight against each other and, when that flopped, egged on Ethiopia to invade Somalia in December 2006, which caused the rise of violent insurgency that spilled across borders. Young jihadists streamed from the heart of USA to fight the invaders. To clean up the mess, the Bush administration finally supported the deployment of regional troops. *Black Hawks Rising* captures intimately the stories of the men and women who made up AMISOM: their triumphs, setbacks and victories. The spotlight focuses on the Uganda People's Defence Forces (UPDF), whose Herculean efforts supported by Burundi National Defence Forces (BNDF) - and later the Kenya Defence Forces (KDF), Forces Armées Djiboutiennes (FAD), Ethiopian National Defence Forces (ENDF) and Republic of Sierra Leone Armed Forces (RSLAF) - were pivotal to the success of the mission. Their dedication, professionalism, ideological commitment, hard work and humanity turned Somalia from a wasted nation to one with hope for peace, stability and a better future for the Somali people. Like Heru - the Hawk-God of Ancient Egypt - AMISOM's new breed of African peace-warriors have demonstrated the capacity to work across borders regionally, continent-wide and globally to help resolve conflicts whenever and wherever they arise - protecting lives and property, and preventing genocides before they happen.

War Without Borders

A tense, complex, and twisting diplomatic thriller in which one woman must choose between morality and compromise—and in either case, the consequences may be deadly. Katarina "Kate" Hollister is a second-generation Foreign Service officer, recently assigned to Kyrgyzstan. She's not there by chance. Kate is a Foreign Service brat who attended high school in the region; her uncle is the U.S. ambassador to the country, and he pulled a few strings to get her assigned to his mission. U.S.–Kyrgyz relations are at a critical juncture. U.S. authorities have been negotiating with the Kyrgyz president on the lease of a massive airbase that would significantly expand the American footprint in Central Asia and could tip the scale in "the Great Game," the competition among Russia, China, and the United States for influence in the region. The negotiations are controversial in the United States because of the Kyrgyz regime's abysmal human-rights record. The fate of the airbase is balanced on a razor's edge. Amid these events, Kate's uncle assigns her to infiltrate an underground democracy movement that has been sabotaging Kyrgyz security services and regime supporters. Washington has taken an interest in the movement, her uncle conveys, and may find it worth supporting if they understand more about the aims and leadership. And Kate has an in—many followers of the movement were high school classmates of hers. But it soon becomes clear that nothing about Kate's mission is as it seems . . . and that she might need to lay her life on the line for what she knows is right.

For more than sixty years, *The Wall Street Journal* has prided itself not just on its serious journalism, but also on the whimsical and arcane stories that amuse and delight its readers. In that regard, animal stories have proven to be the most beloved of all. Now, veteran *Journal* reporter and Page One editor Ken Wells gathers the finest, funniest, and most fascinating of these animal tales in one exceptional book. Here are lighthearted, witty stories of breakthroughs in goldfish surgery, the untiring efforts of British animal lovers who guide lovesick toads across dangerous motorways, and the quest to tame doggy anxieties by prescribing the human pacifier Prozac. Other pieces reflect on mankind's impact on the animal kingdom: a close-up look at the nascent fish-rights movement, the retirement of U.S. Air Force chimpanzees that once soared through space, and ongoing scientific efforts to defeat that most hardy enemy -- the cockroach. Each of these fifty-odd stories -- from the outlandish to the poignant -- exemplifies the superb feature writing that makes *The Wall Street Journal* one of America's best-written newspapers. This charming and utterly captivating collection will be a joy not only to animal lovers, but to all those who appreciate artful storytelling by writers who are obviously having a wonderful time spinning the tales.
