***A demanda por melhorar os produtos e processos no ambiente organizacional é cada vez mais crescente, em razão da competitividade das empresas. Por outro lado, saber definir qual é a melhor atitude a ser tomada, para termos resultados que confirmem a otimização do processo, acaba gerando incerteza em função da diversidade de metodologias de gestão existente. Este estudo identificou os fatores limitantes de um processo de alvejamento contínuo de tecido plano em uma empresa do ramo têxtil para atingir melhores resultados e, em seguida, utilizou-se ferramentas para a melhoria e aumento da eficiência produtiva. Com a aplicação de ferramentas estatísticas simples às mensurações diárias do processo fabril foi possível monitorar as atividades do processo em estudo. Visando gerenciar estes fatores que colaboram para desperdícios no processo, foi utilizado o indicador de eficiência global dos equipamentos – OEE (Overall equipment effectiveness) e identificado as perdas existentes no processo fabril, o comprometimento dos índices de disponibilidade do equipamento, performance e qualidade; além de reavaliar o percentual de perdas, takt-time, setup, volumes em estoque, etc. Sem a necessidade de grandes investimentos, conclui-se que é possível aplicar o indicador de OEE à gestão de processos industriais, adequando o direcionamento de ações que agilizem o retorno e o resultado esperado.***

The FJ55 was introduced in 1969, the 43 series continued to be made in Japan and the 40 and 45 Series had improvements made throughout the 1970s. While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.***

Unless someone (and I bet it'll have to be Bobby) comes up with a fantabulous plan to make crumpets more interesting, Bobby's dad might lose his job and that means ... uh-oh ... moving again. And who's that even newer boy across the street acting like he's better than everyone else, and making eyes at Imelda and trying to be her best friend instead? Looks like there's a crumpety calamity on Pip Street! Keep your eyes peeled for more PIP STREET adventures: A WHISKERY MYSTERY (9781407132815) "Utterly charming and delightful" Mel Giedroyc
