

Train The Trainer Instructor Guide Ebook

CERT (Community Emergency Response Team) is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community-- neighborhood associations, schools, workplaces, places of worship, and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. Audience: Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. Man Mountain's Refuge: Mine Refuge Chamber Training

Active Shooter Incident Management (ASIM) Basic

Train-the-Trainer Resource Guide

Creative Training Techniques Handbook

Health Auxiliary Training, Instructor's Guide

Community Emergency Response Team Basic Training Instructor Guide

"This instructor's guide is designed for use by instructors who train mine employees on how and when to use a mine refuge chamber, and aids the instructor in reinforcing the critical decisions that have to be made during a mining emergency. The discussion notes and teaching points included in this instructor's guide are based on a paper-and-pencil simulation exercise that trainees use to learn about the choices that must be made in an emergency situation. In this exercise, trainees work through an interactive story that presents a scenario in which a section crew, along with additional general labor workers, must decide what to do when they learn there is a fire somewhere in the mine, but do not know the exact location. One of the characters in this story is Man Mountain, a member of the labor crew. As time goes by, the miners face a series of choices about how best to increase their chances for survival. The story is taken in part from real-life incidents. The teaching instructions in this instructor's guide have been designed for use with the simulation exercise, which is included in the Trainee's Problem Book.The completion of this exercise can help new miners, experienced miners, trainers, and others, who must deal with issues of self-rescue and escape, to become more aware of: (1) the need to gather as much information as possible as early as possible; (2) the value of knowing one's escapeways; (3) the need to use self-contained self-rescuers (SCSRs) properly; (4) the value of a multigas detector in an emergency; (5) when, and under what circumstances, to enter a refuge chamber; and (6) how to recognize the reaction signs of traumatic incident stress." - NIOSHTIC-2

Instructor Guide for the FEMA course to become a CERT team member. It contains the same information as the pdf which can be downloaded from FEMA.gov at no cost. This book contains additional helpful tabs and pages for notes.

In this second course, Managing Company Tactical Operations: Command Decision Making, you will continue to learn the skills and abilities needed to provide effective initial command and implement and manage tactical operations. This course is designed to: develop supervisory and management skills in structural firefighting operations; and, examine critical elements of situation assessment and decision making for structural firefighting operations.

The first comprehensive guide to scenario-based instruction (SBT), this flight instructor's manual combines latest studies and proven practices. The concrete guidelines and tips help flight instructors expand their FAA practical test standards and numerous topics are covered such as systematic risk reduction, critical and evaluation, including past accidents, and tailoring programs to reach specific and individualized goals. learn how to build effective, creative scenarios for IFR training, advanced training, and instrument proficiency. Using structured scripts, SBT teaches students to consider all aspects of every flight, from beginning to end. Train Like You Fly is packed with scenarios, guidelines and tips that will help flight instructors reach well beyond the FAA Practical Test Standards to help students to train like they fly, so they fly like they train. In this new Second Edition, the author provides specific narrative examples of scenario-based training for each chapter and topic.

Designed to be user-friendly, the Train the Trainer Student Course Book is interactive in that the student will be writing in it throughout the course and will be able to use it as an ongoing reference tool. Topics covered include curriculum development, classroom management, learning methods, learner diversity, and presentation design and techniques. The Active Shooter Incident Management (ASIM) Basic course is an introductory 4-hour performance level direct delivery course designed to improve incident management and integration of law enforcement, fire and EMS responders to active shooter events. The course provides a model framework for use by law enforcement, fire and EMS to manage active shooter event response to improve time to threat neutralization, medical intervention, and survivability of victims. The framework utilizes the Active Shooter Incident Management Checklist, a validated active shooter event response checklist integrating best practices guided by principles of the National Incident Management System (NIMS), Tactical Emergency Casualty Care (TECC), and Advanced Law Enforcement Rapid Response (ALERRT).The course is an awareness course to provide participants with functional knowledge of a basic complexity Active Shooter Event, as compared to the ASIM Advanced curriculum which provides participants with knowledge of Basic through Moderate Complexity events and Complex Coordinated Attacks (CCAs). This course is available as a Train the Trainer (TtT) program in two and three day delivery models, training (5) instructors (2-day) and (10) instructors (3-day) in the delivery of 4 hour programs focusing on basic complexity events.

Among the many challenges facing the trucking industry is standardizing driver training to ensure placement and retention of highly skilled professionals in the filed. The Train the Trainer Program produced by PTDI and Delmar, Cengage Learning strengthens the knowledge and skills of future trainers ? the foundation of the trucking industry ? and improves the image of the industry by improving instructor training. This exciting new turnkey instructor-training program includes an Instructor's Guide, a Student Course Book, and a DVD Series. Developed as a modular system, the Train the Trainer Program can be used to fit a pre-existing program that lasts from 2-4 days. It can be used for training "finishing" trainers at companies or instructor's in driving schools.

Having the capacity to benefit from emotions, rather than being paralyzed by them, offers people the opportunity to navigate difficulties, while being able to face life, relationships, and themselves with courage, grace, and strength. In "The Skills System Instructor's Guide," author Julie F. Brown provides a curriculum for helping people improve emotion regulation capacities, which allows the person to actively participate in both joyful and challenging aspects of life. The guide presents nine simple, user-friendly adaptive coping skills effective for individuals of diverse learning abilities. Based on Dialectic Behavior Therapy principles, the Skills System helps people of all ages learn to effectively regulate emotions, thoughts, and actions to reach personal goals. PRAISE FOR "The Skills System Instructor's Guide" "In this instructor's guide, Julie Brown provides a clear step-by-step introduction to the emotion regulation skills curriculum that she has developed over the course of two decades of work with individuals with learning challenges and emotional difficulties. Brown succeeds admirably where few others have even dared to set foot. Complex emotion regulation challenges are broken down into manageable problems using a series of steps that people of many different skill levels can apply for themselves. At once simple and sophisticated, this guide is a must for anyone who works with, or cares for, someone with emotion regulation difficulties." -James J. Gross, PhD, professor of psychology, Stanford University; editor, "Handbook of Emotion Regulation" "This practical Skills Training Handbook fills a critical need of providing Dialectical Behavior Therapy based techniques and related treatment procedures to individuals with emotional and intellectual challenges. KUDOS Julie Brown." -Donald Meichenbaum, PhD, Distinguished Professor Emeritus, University of Waterloo, Ontario, Canada; Research Director of the Melissa Institute for Violence Prevention Miami, Florida "Purchase this book and you will return to it again and again. The Skills System offers a concise, ultra-pragmatic skills training approach with comprehensive, step-by-step curriculum materials, great for teaching emotion regulation to learners of all abilities. Both experienced and novice skills trainers will love her tool kit of teaching strategies!" -Dr. Kelly Koerner, PhD, Evidence-Based Practice Institute, Seattle; editor, "Dialectical Behavior Therapy in Clinical Practice: Applications across Disorders and Settings"

Here you will learn how to develop your attitude, knowledge, skills and abilities to effectively provide initial command and implement and manage tactical operations. The course is designed to: 1) develop supervisory and management skills in structural firefighting operations; 2) examine critical elements of pre-incident preparation for structural firefighting operations, and, 3) examine the company commander's role in fireground operations, company readiness, communications, building construction, and fire behavior.

Following the events of September 11, 2001, Citizen Corps was launched as a grassroots strategy to strengthen community safety and preparedness through increased civic participation. Since then, the importance of preparedness education, training, and involving the whole community has become increasingly recognized as critical to successful community preparedness and resilience. Citizen Corps is administered by the Federal Emergency Management Agency, within the Department of Homeland Security, but is implemented locally. Communities across the country have created Citizen Corps Councils as effective partnerships between government and community leaders to focus on the following objectives: engaging the whole community in collaborative community planning and capacity building; integration of community resources; outreach and localized preparedness education and training; emergency communications to all population segments; drills and exercises; and, volunteer programs. CERT is a critical program in the effort to engage everyone in America in making their communities safer, more prepared, and more resilient when incidents occur. Community-based preparedness planning allows us all to prepare for and respond to anticipated disruptions and potential hazards following a disaster. As individuals, we can prepare our homes and families to cope during that critical period. Through pre-event planning, neighborhoods and worksites can also work together to help reduce injuries, loss of lives, and property damage. Neighborhood preparedness will enhance the ability of individuals and neighborhoods to reduce their emergency needs and to manage their existing resources until professional assistance becomes available. Studies of behavior following disasters have shown that groups working together in the disaster period perform more effectively if there has been prior planning and training for disaster response. These studies also show that organized grassroots efforts may be more successful if they are woven into the social and political fabric of the community-neighborhood associations, schools, workplaces, places of worship, and other existing organizations. Effective response therefore requires comprehensive planning and coordination of all who will be involved--government, volunteer groups, private businesses, schools, and community organizations. With training and information, individuals and community groups can be prepared to serve as a crucial resource capable of performing many of the emergency functions needed in the immediate post-disaster period. The CERT Program is designed to train individuals to be assets to help communities prepare for effective disaster response. The purpose of the Community Emergency Response Team (CERT) Basic Training is to provide the individuals who complete this course with the basic skills that they will need to respond to their community's immediate needs in the aftermath of a disaster, when emergency services are not immediately available. By working together, CERT members can assist in saving lives and protecting property using the basic techniques in this course. The target audience for this course is individuals who desire the skills and knowledge required to prepare for and respond to a disaster.

Because of Southern Pacific Transportation Company's commitment to providing quality first responder training and the National Fire Academy's mandate to provide similar training the Academy has approved Southern Pacific Transportation Company's use of the Academy material that has been developed, field tested, and handed off through the National Train-the-Trainer program. Upon successful completion of this educational opportunity Southern Pacific may issue a Certificate of Training which appropriately displays the logo's of both the Academy and Southern Pacific Transportation Company. As with all National Fire Academy courses, completion of this program is not to be construed as a demonstration of expertise within the subject matter, nor is it to imply an ability or certification to teach said subject matter.

This instructor's guide is designed for use by instructors who train mine employees on how and when to use a mine refuge chamber, and aids the instructor in reinforcing the critical decisions that have to be made during a mining emergency. The discussion notes and teaching points included in this instructor's guide are based on a paper-and-pencil simulation exercise that trainees use to learn about the choices that must be made in an emergency situation. In this exercise, trainees work through an interactive story that presents a scenario in which a section crew, along with additional general labor workers, must decide what to do when they learn there is a fire somewhere in the mine, but do not know the exact location. One of the characters in this story is Man Mountain, a member of the labor crew. As time goes by, the miners face a series of choices about how best to increase their chances for survival. The story is taken in part from real-life incidents. The teaching instructions in this instructor's guide have been designed for use with the simulation exercise, which is included in the Trainee's Problem Book.The completion of this exercise can help new miners, experienced miners, trainers, and others, who must deal with issues of self-rescue and escape, to become more aware of: (1) the need to gather as much information as possible as early as possible; (2) the value of knowing one's escapeways; (3) the need to use self-contained self-rescuers (SCSRs) properly; (4) the value of a multigas detector in an emergency; (5) when, and under what circumstances, to enter a refuge chamber; and (6) how to recognize the reaction signs of traumatic incident stress.
