Master Planning and Scheduling

An Essential Guide to Competitive Manufacturing

A Practical Guide to Challenges in the Current and Future Competitive Manufacturing World

This book presents a series of cultural situations that could occur within the first one-hundred days of a school year: responding to entrenched vocabularies and behaviors, addressing professional and instructional bad habits, enacting alternative teaching scripts, leveraging a policy blindside, redefining the goals and practices of teams, and implementing outside-the-box programs. Each cultural situation offers a new school leader the opportunity to redefine the goals, values, and practices of an entrenched school culture—the Central High way. Administrators reading the title of this book may view one hundred days as an arbitrary number picked out of administrative thin air. I argue that disrupting and replacing organizational and instructional routines is a race against time. Every school day that goes by without some sign of creative destruction is one more day that comfortable organizational and instructional routines live on in main offices and classrooms. The idea for this book originated from a question I asked a former student of mine who had just signed a contract to become the principal of a high school. We were discussing the complexities of changing a school culture when I asked the following question: “What would you do on the first day in your new office to change your school’s culture?” The response to that question described a series managerial routines that all new administrators have learned to perform as they move from the classroom to the main office: organize the office, meet staff, tour the building, write a newsletter, examine data, and visit community venues. Nothing in this conversation described strategies for redefining the beliefs and values of an entrenched school culture. With this conversation in mind, I made it a point in my formal and informal contacts with school administrators to always ask the question: “What would you do in the first day in your new office to change your school’s culture?” The most common responses involved reviewing district documents, touring facilities, meeting staff, listening to stakeholders and managing systems. In each conversation, school leaders populated their responses with the current jargon of school reform: learning communities, data mining, standards-based curriculum, differentiated learning, common core standards, formative assessment, race to the top, continuous improvement, etc. While these responses encompass reasonable behaviors on the first day in the main office, not one of these actions possesses the capacity to connect educational values expressed in school mission statements—why are we here—to daily organizational and instructional routines. Each activity gives the appearance of leading, but produces no connections between beliefs, values, and practices. Although none of these responses would make or break a school culture, they do represent a pattern of thinking and behaving that holds out little possibility of fundamentally changing a school’s culture.

Executives in the most forward-thinking businesses are taking project management beyond specific projects in manufacturing, product development, and IT, and adopting its powerful methods company-wide. This book describes in detail the four key functions, also known as the Four Pillars of the EPMO House of Excellence, that are crucial to building an effective Enterprise Project Management Office (EPMO).

Discover a proven way to start successful and cost-effective training programs that produce tangible bottom line results Follow along as you are guided through the steps for creating a business plan, developing standards and policies, and setting budgets.

Reach ALL students and prove how critical your counseling program is! For school counselors, using data effectively doesn't have to be a burden. Data can make the difference for today's embattled school counseling programs, and this insightful book shows how to collect and manage it. School

counseling scholar and advocate Dr. Trish Hatch describes how K-12 counselors can replace “random acts of guidance” with intentional, well-timed interventions, based on student data. Aligned with current research and the American School Counselor Association (ASCA) standards, this essential resource includes a complete set of tools and templates for data collection, action-planning and reporting. Readers will learn how to Develop a robust counseling curriculum that supports the Common Core Standards and drop-out prevention Measure progress through pre- and post-assessments

Deliver compelling reports that demonstrate your program's impact This well-timed book is designed to help school counseling programs make the most of limited resources and measurably demonstrate how their work improves school performance. "Trish Hatch provides extensive examples of how school

counselors can enhance student achievement and well-being through the use of data. Not only does she provide useful examples and a framework from which counselors can explore data, she helps counselors understand some of the very common barriers to change within school systems." —Jennifer

Bettters-Bubon, Assistant Professor UW Whitewater, WI "As practicing school counselors, we rarely find a text that tells us what to do, why we should do it, and how to do it. Priceless!" —Franciene Sabens, School Counselor Chester High School, IL Looking for more resources on data in school

The results are in. The evidence has been analyzed. Research shows that the lack of enterprise-wide training is the biggest reason for ERP implementation failures. It is the single most important precursor to achieving success. Integrated Learning for ERP Success is the first resource to offer a specifically defined, comprehensive method for planning, delivering, and evaluating ERP training efforts. It even includes formulas for determining training return on investment. The Learning Requirements Planning (LRP) process presented involves a six-step enterprise-level instructional design model that when implemented correctly assures success. If you would rather have a root canal than oversee an ERP implementation, you are not alone. But like avoiding a root canal, avoiding ERP implementation only causes more pain. This book eases the implementation pain. It shows you how a formal plan for learning will increase the productivity of the ERP implementation team, shorten overall implementation time, and substantially decrease implementation costs. It also provides a discussion on how an ERP implementation can be used as a catalyst for lifelong organizational learning. Implementing an ERP system can cost three to ten times the actual software purchase price. You can't afford to waste money or time in the areas of ERP education. Integrated Learning for ERP Success shows you how to create learning-focused ERP implementations that provide substantial savings and the competitive advantage.

Small Learning Communities (SLCs) and Career Academies, one variety of SLC, have grown rapidly in recent years. They are among the few high school reform approaches that seem promising and popular, bringing students together into cohorts where they support each other, teachers into teams where they do the same, and students and teachers into closer relationships which seem to benefit both. Yet while SLCs seem to work "when well implemented", they are not easy to implement. They embody a number of variations from the way high schools typically operate. In the authors' experience, failure to adhere to these two requirements--cohort student scheduling and team teacher scheduling--is responsible for the most frequent downfalls of SLCs. They have seen a number of SLCs and Career Academies fail outright because of poor master scheduling, and many others struggle when the job is done clumsily. As such, the authors have written this "Scheduling Guide" for SLCs and Career Academies. The authors begin with a fuller explanation of why scheduling is so important to the success of an SLC. Chapter II explains who needs to be involved in developing a master schedule, and in what ways. Chapter III delves into the process itself, the complexities of what needs to happen when, organized into five stages and a series of steps within each, with an annual calendar that provides a suggested timeline. Chapter IV discusses the potential conflicts that arise in the process and the many constraints that have to be considered in developing a master schedule. Chapter V reviews the features needed in software designed to assist scheduling and touches on what training and support exists to assist those who want to learn more. Appended are: (1) Alternative Bell Schedules; (2) Software Matrix; and (3) Glossary. A bibliography is included.

Discover the practical, real-world advantages of the Oliver Wight master planning and scheduling methodology. The newly revised Fourth Edition of Master Planning and Scheduling: An Essential Guide to Competitive Manufacturing delivers a masterful exploration of today's master planning and scheduling techniques, as well as an insightful discussion of the future of the master planning and scheduling processes and profession. Written in the context of an ever-evolving digital environment and augmented with new and critical information required to implement best practices, the book is a guide for practitioners and leaders on the principles of master planning and scheduling and its application in modern and future work environments. In this book, readers will learn: Insights regarding top-down, bottom-up, and side-to-side integration of business practices in support of a company's strategic direction and tactical deployment The critical link between time-phased integrated business planning, master planning, master scheduling, capacity planning, and material planning "How-to" details and examples to support master planning and scheduling implementation and enhancements within the company's demand and supply organizations Master Planning and Scheduling is an indispensable guide for supply chain professionals, planners and schedulers in all functional domains of a business. It also belongs on the bookshelves of any executive or manager who seeks to improve their understanding of best practice planning and scheduling processes and how those processes enable a business to outperform the competition through alignment, integration and synchronization across all functions in an organization.

Written to help companies comply with GMP, GLP, and validation requirements imposed by the FDA and regulatory bodies worldwide, Quality Control Training Manual: Comprehensive Training Guide for API, Finished Pharmaceutical and Biotechnologies Laboratories presents cost-effective training courses that cover how to apply advances in the life sciences to produce commercially viable biotech products and services in terms of quality, safety, and efficacy. This book and its accompanying CD-ROM comprise detailed text, summaries, test papers, and answers to test papers, providing an administrative solution for management. Provides the FDA, Health Canada, WHO, and EMEA guidelines directly applicable to pharmaceutical laboratory-related issues Offers generic formats and styles that can be customized to any organization and help management build quality into routine operations to comply with regulatory requirements Contains ready-to-use training courses that supply a good source of training material for experienced and inexperienced practitioners in the biotechnology/biopharmaceutical industries Includes a CD with downloadable training courses that can be adopted and directly customized to a particular organization Supplies ready-to-use test papers that allow end users to record all raw data up to the issuance of the attached certificate The biotechnology/bioscience industries are regulated worldwide to be in compliance with cGMP and GLP principles, with particular focus on safety issues. Each company must create a definite training matrix of its employees. The training procedures in this book enable end users to understand the principles and elements of manufacturing techniques and provide documentation language ranging from the generic to the specific. The training courses on the CD supply valuable tools for developing training matrices to achieve FDA, Health Canada, EMEA, MHRA UK, WHO, and GLP compliance.
