Contains original papers written to celebrate the European Year of Older People and Solidarity between Generations.

In the mad dash to succeed fast, many of us compromise so much in the areas of health, relationships, family and personal satisfaction for our work. Over time, we feel bored, burned out, unhappy or unfulfilled and have no idea how we got there or how to fix it. Renessa Boley, America's Premier Life Designer, offers witty insights to revitalize your career, business and overall life so that you experience greater freedom and fulfillment in the climb to success. This book is a wake-up call to raise the bar on happiness in both your life and your work.

This book is devoted to computer-based modeling in cardiology, by taking an educational point of view, and by summarizing knowledge from several, commonly considered delimited areas of cardiac research in a consistent way. First, the foundations and numerical techniques from mathematics are provided, with a particular focus on the finite element and finite differences methods. Then, the theory of electric fields and continuum mechanics is introduced with respect to numerical calculations in anisotropic biological media. In addition to the presentation of digital image processing techniques, the following chapters deal with particular aspects of cardiac modeling: cardiac anatomy, cardiac electro physiology, cardiac mechanics, modeling of cardiac electro mechanics. This book was written for researchers in modeling and cardiology, for clinical cardiologists, and for advanced students.

Insider Secrets to Redesign Your Success and Reclaim the Passion, Purpose and Balance You Lost Along the Way

Written by noted French car expert Richard Adatto, Bugatti historian Julius Kruta and furniture authority Christina Japp, The Art of Bugatti brings the heritage of this famous family of artists and innovators to life. With rarely seen historical photographs and documents, each car is presented anew in studio photography by renowned automotive

Lesser Feasts and Fasts has not been updated since 2006. This new edition, adopted at the 79th General Convention (resolution A065), fills that need. Biographies and collects associated with those included within the volume have been updated; a deliberate effort has been made to more closely balance the men and women represented within its pages.

8.5" x 11" student composition journal featuring a scientific illustration from 1899 on the cover. The inside has 100 pages College Ruled. Perfect as a school notebook, composition notebook, class notebook, science notebook, or just to use as a writing journal! Great gift for kids going back to school!

Cognitive Psychology

In January 2009, Barack Obama became the 44th president of the United States. In the weeks and months following the election, as in those that preceded it, countless social observers from across the ideological spectrum commented upon the cultural, social and political significance of "the Obama phenomenon." They focused particularly on what Obama's successful campaign said about the state of American democracy, and about the role of race in the saga of American politics. In "At this Defining Moment", Enid Logan provides a nuanced analysis framed by innovative theoretical insights to explore how Barack Obama's presidential candidacy both reflected and shaped the dynamics of race in the contemporary United States. Using the 2008 election as a case study of U.S. race relations, and based on a wealth of empirical data that includes an analysis of over 1,500 newspaper articles, blog postings, and other forms of public speech collected over a 3 year period, Logan claims that while race played a central role in the 2008 election, it was in several respects different from the past. Obama won not in spite of race, but because he offered a highly palatable, appealing, and carefully mediated version of blackness that was eagerly digested by a majority of the electorate. Logan ultimately concludes that while the selection of an individual African American man as president does not mean that racism is dead in the contemporary United States, we must also think creatively and expansively about what the election does mean for the nation and for the evolving contours of race in the 21st century.

Biological Distance Analysis: Forensic and Bioarchaeological Perspectives synthesizes research within the realm of biological distance analysis, highlighting current work within the field and discussing future directions. The book is divided into three main sections. The first section clearly outlines datasets and methods within biological distance analysis, beginning with a brief history of the field and how it has progressed to its current state. The second section focuses on approaches using the individual within a forensic context, including ancestry estimation and case studies. The final section concentrates on population-based bioarchaeological approaches, providing key techniques and examples from archaeological samples. The volume also includes an appendix with additional resources available to those interested in biological distance analyses. Defines datasets and how they are used within biodistance analysis Applies methodology to individual and population studies Bridges the sub-fields of forensic anthropology and bioarchaeology Highlights current research and future directions of biological distance analysis Identifies statistical programs and datasets for use in biodistance analysis Contains cases studies and thorough index for those interested in biological distance analyses

The idea that such pervasive and ever-growing immersion in virtual play affects consciousness seems obvious and is the focus of this volume. These apparently wide-ranging topics have never been collected together under the consciousness and gaming header. Adding to any serious inquiry into gaming and consciousness must be the first-person account or the phenomenon itself. This book leads off with just such an examination. The 16 chapters in this edited book are divided into five sections: Player Experience; From Attention and Absorption to Flow; Unconscious Processing; Imaginal Considerations; and Applications. This book represents an international and interdisciplinary offering.

PC Gaming: Computer Gaming World's Instant Expert Guide covers everything new game players need to know, such as game genres, terminology, ratings, and new technology, as well as hardware needs, accessories, and how to troubleshoot the most common problems. The free CD includes hot game demos, such as Quake, Star Trek Generations and Command & Conquer Red Alert, which are attractive to avid players, but will also serve as a "try-before-you-buy" sampler for new gamers.

Women receive 2% of venture funding and make up 9% of VC partners, yet research shows that companies with female leaders and board members outperform all-male companies. Changing Tides brings together experienced female venture capitalists, entrepreneurs and thought leaders who share their expertise and tactical guidance through a collection of essays. This book is intended as a resource for anyone wanting to win -- or support a woman to win -- at the heavily stacked entrepreneur and funding game. Contributors Maha Ibrahim, Canaan Partners Gillian Muessig, Sybilla Masters Fund Terri (Hanson) Mead, Class Bravo Ventures Xandra Laskowski, OSEA Angel Investors Suzanne Fletcher, Stanford StartX Fund Amy Belt Raimundo, Kaiser Permanente Ventures Mukund Mohan, BuildDirect Technologies Deb Kilpatrick, Evidation Health Dorin Rosenshine, Outleads Tammy Bowers, Lionheart Innovations Robyn Ward, FounderForward Jessica Livingston, Y Combinator Kate Purmal, Georgetown University Women's Leadership Institute Debra Vernon, VLP Law Group A percentage of the proceeds from this book will go to All Raise, a nonprofit dedicated to diversity founders and funders. Early Praise for Changing Tides "This book is a must read for all female entrepreneurs. As a previous corporate strategist and current founder and CEO of my own company, I live by the words "knowledge is power." This book provides just that. Jenn does a beautiful job of providing transparency and clarity with the necessary how-to's for navigating the waters ahead." -- Maria Malavenda, Founder, EVVEMI "As an angel investor, I've focused on women-led companies because they have been historically underfunded yet have delivered abovemarket returns. Changing Tides provides insight and inspiration for both female founders and the smart investors who invest in them." -- Nancy Hayes, Angel Investor "As one who works with female founders around the world, it's refreshing to see how well this book illustrates the extent to which both opportunities and challenges are shared globally. Changing Tides goes beyond storytelling, catalyzing collaborative, innovative solutions towards meaningful progress for female founders, for women, for society." --Lucie Newcomb, Founder & CEO/CMO, The NewComm Global Group "Numbers don't lie. As an investor, I seek better returns. Changing Tides makes a clear and data-driven business case for investing in female founders. All investors should read this book." -- Zeynep Urgan Zorlu, Global Investor, Zurgun Capital "Changing Tides is exactly what every female founder -- and every investor -- needs. It's a rallying cry for all of us who support female founders. A peek into what the collective experience is, and what is needed to lift up and propel these founders and create better, more diverse offerings in this world." --Ari

Horie, Founder, Women's Startup Lab

In this darkly lyrical tale of a traveling faith healer roaming through Scotland and Wales with his wife and his manager, the author has created a metaphorical portrait of the artist as both creator and destroyer. The Broadway production starred James Mason.--From publisher description.

Based on fresh translations of historical documents, this volume offers a revealing look at Japan during the time of the Tokugawa shoguns from 1600–1868, focusing on the day-to-day lives of both the rich and powerful and ordinary citizens. • 60 original documents, divided into 42 thematic sections • A chronology of Japanese history from roughly a half century before the beginning of the Tokugawa period until the fall of the Tokugawa shogunate in 1868, with selected events in world history included

This text presents the basic concepts of modern cognitive psychology in a succinct and accessible manner. Empirical results, theoretical developments, and current issues are woven around basic concepts to produce coherent accounts of research areas. Barsalou's primary goal is to equip readers with a conceptual vocabulary that acquaints them with the general approach of cognitive psychology and allows them to follow more technical discussions elsewhere. In meeting this goal, he discusses the traditional work central to modern thinking and reviews current work relevant to cognitive science. Besides focusing on research and theory in cognitive psychology, Barsalou also addresses its fundamental assumptions. Because the cognitive approach to psychology is somewhat subtle, often misunderstood, and sometimes controversial, it is essential for a text on cognitive psychology to address the assumptions that underlie it. Therefore, three of the eleven chapters address the "meta- assumptions" that govern research and theory in cognitive psychology. These meta-chapters provide a deeper understanding of the content areas and a clearer vision of what cognitive psychologists are trying to accomplish. The remaining eight "content" chapters cover the central topics in cognitive psychology. This book will be of value to a variety of audiences. Ideal for researchers in computer science, linguistics, philosophy, anthropology, and neuroscience who wish to acquaint themselves with cognitive psychology, it may also be used as a text for courses in cognitive science and cognitive psychology. Lay readers who wish to learn about the cognitive approach to scientific psychology will also find the volume useful.

58 Bad Boyfriend Stories

A revealing firsthand account of the Civil War as told through the letters of a Michigan regimental surgeon.

The stories you are about to read are true. Often hilarious and always relatable, they all describe the moment when good sense and simple self-respect triumph over the human need to be loved—or, at least, the need to be with a particular man. The relationship may not last beyond lunch, or it may linger for weeks, months, or even years. But inside, you know: it's over. What Was I Thinking? 58 Bad Boyfriend Stories includes contributions from: Francesca Lia Block Bonnie Bruckheimer Cindy Chupack Kate Coe Melinda Culea Carrie Fisher Wendy Hammers Nicole Hollander Maira Kalman Lisa Napoli Lynn Snowden Picket Mimi Pond Rachel Resnick Penny Stallings Laurie Winer Amy Wruble Whether the story is funny, sad, poignant, sweet, or just plain psychotic—we bet you can't read just one.

Putting into the air the largest striking force ever committed to battle was a highly complex task and remains one of the great achievements of the war. With more than three hundred photographs and dozens of line drawings, this book relates the procedures and the improvisations that lay behind the success of this mighty air force. Over 1,700 aircraft at a time, involving 15,000 men and a vastly sophisticated supply chain, were engaged in a ceaseless war of high altitude daylight precision bombing that did much to secure eventual allied success.
