Naming What We Know examines the core principles of knowledge in the discipline of writing studies using the lens of "threshold concepts"—concepts that are critical for epistemological participation in a discipline. The first part of the book defines and describes thirty-seven threshold concepts of the discipline in entries written by some of the field's most active researchers and teachers, all of whom participated in a collaborative wiki discussion guided by the editors. These entries are clear and accessible, written for an audience of writing scholars, students, and colleagues in other disciplines and policy makers outside the academy. Contributors describe the conceptual background of the field and the principles that run throughout practice, whether in research, teaching, assessment, or public work around writing. Chapters in the second part of the book describe the benefits and challenges of using threshold concepts in specific sites—first-year writing programs, WAC/WID programs, writing centers, writing majors—and for professional development to present this framework in action. Naming What We Know opens a dialogue about the concepts that writing scholars and teachers agree are critical and about why those concepts should and do matter to people outside the field.

From reviews of the text: "The content is strong and clearly explained. . . . This is the best [counseling research text] I have seen." -Monica Osburn, UNC-Pembroke and Webster "The majority of my students report it is easy to follow and understand, even those with limited research knowledge. . . . So often I find counseling students viewing research methods courses as courses they must just 'get through' and not ones that will help them in their future careers. This book . . . does help students understand how this knowledge can benefit them in their future practice. -Ryan Melton, Portland State University "The book is very clear and concise, and it is an easy text for the students to understand. The many examples used throughout the text and sample paper are great resources for the students. . . . It is relevant to counseling students, it has information required by CACREP, and it is a comprehensive research textbook that is easy for students to follow. The examples given are superb . . . ." -Lakitta D.
