The American chestnut, whitebark pine, and several species of ash in the eastern United States are just a few of the North American tree species that have been functionally lost or are in jeopardy of being lost due to outbreaks of pathogens and insect pests. New pressures in this century are putting even more trees at risk.

Expanded human mobility and global trade are providing pathways for the introduction of nonnative pests for which native tree species may lack resistance. At the same time, climate change is extending the geographic range of both native and nonnative pest species.

Biotechnology has the potential to help mitigate threats to North American forests from insects and pathogens through the introduction of pest-resistant traits to forest trees. However, challenges remain: the genetic mechanisms that underlie trees' resistance to pests are poorly understood; the complexity of tree

genomes makes incorporating genetic changes a slow and difficult task; and there is a lack of information on the effects of releasing new genotypes into the environment. Forest Health and Biotechnology examines the potential use of biotechnology for mitigating threats to forest tree health and identifies the ecological, economic, and social implications of deploying biotechnology in forests. This report also develops a research agenda to address knowledge gaps about the application of the technology.

Based on primary data collected from 14 communities in 11 districts in these states, it discusses the current state of affairs concerning de-notified tribes. There is no accurate and comprehensive information available on the present socio-economic status of these communities, either in the literature or with government agencies. This book provides valuable information on how they are faring in post-independence India since their de-notification from the Criminal Tribes Act, 1871.

Not a Hindu, pens a thought-provoking critique of Brahmanism and the caste system in India, while anticipating the death of Hinduism as a direct consequence of, what he says is, its anti-scientific and anti-nationalistic stand. This work challenges Hinduism`s interpretation of history, with a virulent attack on caste politics, and also takes a refreshing look at the necessity of encouraging indigenous scientific thought for the sake of national progress. It establishes Hinduism as a `backward` religion that suppresses the latent scientific and productive potential of the Dalit–Bahujan communities. The author says this oppressive system of spiritual fascism is detrimental to both the future of religion and the nation-state. He thus criticizes the idea of spiritual justice or varnadharma, used to justify the caste system, as rooted in spiritual inequality. On a

micro-analytical level, it is based on a thorough study of the productive knowledge systems of the Dalit–Bahujan communities of Andhra Pradesh, and provides a detailed day-to-day analysis of the scientific technological processes and events at work in the life of a member of these communities. On a macro level, it shows how Hinduism fails to negotiate between faith and reason, unlike other major religions of the world. Kancha Ilaiah critiques the intellectual imagination of the dominant communities and inspires the marginalized. In the process of doing so he crafts a work of immense socio-political interest which appeals to academics, and also to all those who are concerned about contemporary India`s polity and social fabric.

On a Caribbean island, the morning after a full moon, Felix Hobain tears through the market in a drunken rage. Taken away to sober up in jail, all that night he is gripped by hallucinations: the impoverished hermit believes he has become a healer, walking from village to village, tending to the sick, waiting for a sign from God. In this dream, his one companion, Moustique, wants to exploit his power. Moustique decides to impersonate a prophet

himself, ignoring a coffin-maker who warns him he will die and enraging the people of the island. Hobain, half-awake in his desolate jail cell, terrorized by the specter of his friend's corruption, clings to his visionary quest. He will try to transform himself; to heal Moustique, his jailer, and his jail-mates; and to be a leader for his people. Dream on Monkey Mountain was awarded the 1971 Obie Award for a Distinguished Foreign Play when it was first presented in New York, and Edith Oliver, writing in The New Yorker, called it "a masterpiece." Three of Derek's Walcott's most popular short plays are also included in this

volume: Ti-Jean and His Brothers; Malcochon, or The Six in the Rain; and The Sea at Dauphin. In an expansive introductory essay, "What the Twilight Says," the playwright explains his founding of the seminal dramatic company where these works were first performed, the Trinidad Theatre Workshop. First published in 1970, Dream on Monkey Mountain and Other Plays is an essential part of Walcott's vast and important body of work.
