This collection includes a preface and a table of embellishments.

This edition of J. S. Bach's Inventions I-XV, and Sinfonias I-XV has been edited by Dr. Hans Bischoff and translated by Alexander Lipsky. It includes a three-page preface with a table of embellishments.

It would appear that J.S. Bach really composed his two- and three-part Inventions (Sinfonias) on purpose to prepare his pupils for his larger works, - especially for his "Well-Tempered Clavier", - and as such they cannot be too urgently recommended. And to this day, a diligent study of these Inventions will greatly benefit every talented student of the piano who desires to rise above mediocrity; they will cultivate his musical taste and develop

his technic. For in no modern, easy piece of music is the left hand given so independent of a treatment of the theme as in these Inventions. Edited By: Carl Czerny (1791 – 1857) Friedrich Conrad Griepenkerl (1742 – 1849) Friedrich August Roitzsch (1805 – 1889) (Note: This edition contains only the 15 Inventions, and not the 15 Sinfonias.)

They are a result of in-depth musicological study by Dr Hinson. Each series provides assistance in the areas of performance practice and historical backgrounds as they relate to each piece. Bach Two and Three Part Inventions for the Piano G Schirmer, Incorporated

Like the two-part inventions, Bach's three-part inventions (also known as Sinfonias) were composed as instructional material for his son, Wilhelm Friedemann. In researching the sinfonias, Willard A. Palmer discovered that previous editors had misinterpreted an important note in Sinfonia No. 11. Such careful research is a hallmark of Palmer's Bach editions.

Pianists all know the benefits of playing the "Two-Part Inventions" of J. S. Bach. Now, world-respected jazz pianist and composer Bill C. has written his own "inventions" that will benefit every player's understanding and performance of jazz. These great-sounding etudes explore harmonic, melodic, and technical challenges faced by jazz keyboardists, including the ii-V and ii-V-I progressions, outlining changes, chord ornamentation, playing in octaves, tonic patterns, block chords, polytonality, stride piano, and left-hand walking bass. Pieces feature clear explanatory notes, and preparatory exercises, and each invention is performed on the CD by Bill Cunliffe. 123 pages.
