The BUG travel guidebook series focuses solely on the needs of the backpacking traveller and books in this series will be comprehensively updated with a new edition released every other year. Budget travel is what we're all about. No flash hotels and fancy banquets - just the most comprehensive information on backpackers' hostels and enjoying your trip without blowing the budget. BUG's books are smaller than other guides so travellers can bring along a book that is a useful resource rather than a burden. Despite being more compact, BUG travel guides are packed full of useful information. BUG travel guides feature BUG's exclusive star rating system, which makes it easy to find a great backpackers' hostel at a glance. Hostels have four different five-star ratings for different aspects of the hostel, plus an overall rating.

This extensively revised fourteenth edition incorporates the major changes to planning introduced by the 2004 Planning and Compulsory Purchase Act and the government's mission to change the culture of planning. It provides a critical discussion of the system of planning – the institutions involved, the plans and other instruments that are used, the procedures for controlling development and land use change, and the mechanisms for implementing policy and proposals. It reviews current policy for sustainable development, housing and the Sustainable Communities Plan, the Barker Review, urban renewal and regeneration, the renaissance of city and town centres, the countryside, transport, and the heritage. Contemporary arrangements are explained with reference to their historical development, the influence of the European Union, the Labour government and changing social and economic demands for land use change. Detailed consideration is given to: the nature of planning and its historical evolution policies for managing urban growth and delivering housing sustainable development principles for planning social and economic development of the countryside conserving the heritage changes to the profession and education of planners. Special attention is given to the objective of improving the co-ordination of government policies through the spatial planning approach. The many recent changes to the system are explained in detail, and each chapter ends with notes on further reading, lists of official publications and an extensive bibliography, all of which enhances its reputation as the bible of British Planning.

This edited open access book gives a comprehensive overview of small and lightweight electric three- and four-wheel vehicles with an international scope. The present status of small electric vehicle (SEV) technologies, the market situation and main hindering factors for

market success as well as options to attain a higher market share including new mobility concepts are highlighted. An increased usage of SEVs can have different impacts which are highlighted in the book in regard to sustainable transport, congestion, electric grid and

transport-related potentials. To underline the effects these vehicles can have in urban areas or rural areas, several case studies are presented covering outcomes of pilot projects and studies in Europe. A study of the operation and usage in the Global South extends the

scope to a global scale. Furthermore, several concept studies and vehicle concepts on the market give a more detailed overview and show the deployment in different applications.
