International Arbitration and the COVID-19 Revolution Edited by Maxi Scherer, Niuscha Bassiri & Mohamed S. Abdel Wahab The impact of the COVID-19 pandemic on all major economic sectors and industries has triggered profound and systemic changes in international arbitration. Moreover, the fact that entire proceedings are now being conducted remotely constitutes so significant a deviation from the norm as to warrant the designation 'revolution'. This timely book is the first to describe and analyse how the COVID-19 crisis has redefined arbitral practice, with critical appraisal from well-known practitioners of the pandemic's effects on substantive and procedural aspects from the commencement of proceedings until the enforcement of the award. With practical guidance from a variety of perspectives – legal, practical, and sector-specific – on the conduct of international arbitration during the COVID-19 pandemic and beyond, the chapters present leading practitioners' insights into the unprecedented and multifaceted issues that arise. They provide expert tips and challenges in such practical matters as the following: preventing and resolving disputes of particular types – construction, energy, aviation, technology, media and telecommunication, finance and insurance; arbitrator appointments; issues of planning, preparation and sample procedural orders; witness preparation and cross-examination; e-signature of arbitral awards; setting aside and enforcement proceedings; and third-party funding. Also included are an empirical survey of users' views and an overview of how the COVID-19 revolution has affected the arbitration rules of leading arbitral seats. With this timely and practical book, arbitration practitioners and scholars will gain up-to-date knowledge of sector-specific challenges brought about by the COVID-19 pandemic and approach arbitration proceedings with an understanding of the most important legal and practical considerations during the crisis and beyond.

In Christen und Sethianer versucht Herbert Schmid zu zeigen, dass sowohl Schenkes Sethianismus, als auch andere frühe Ausprägungen der Gnosis als frühe Versuche christlicher Theologie zu begreifen sind. In Christen und Sethianer Schmid argues that H.-M. Schenkes Sethianism as well as other strands of the gnostic movement are probably best understood as early attempts to phrase Christian theology.

Readers of Imray's East Coast Pilot will need no introduction to Garth Cooper whose familiarity with North Sea passage-making is evident in the practical guidance he gives. Under his authorship, this edition has been restructured to reflect the changing nature of passages across the North Sea. As well as a consideration of the various Traffic Separation Schemes, routes take into account the many new offshore windfarms and oil and gas extraction platforms. As its name suggests, the emphasis of this pilot is on the passage routes, whether taking a more direct line between the UK and the Continent or incorporating hops along the East Coast and the adjacent coasts of France, Belgium and Holland. Pilotage is included for a selection of key ports. Updated plans and numerous new photographs help to illustrate the key features to help guide you across this challenging yet rewarding stretch of water.

The Health and Safety (First Aid) Regulations 1981 apply to workplaces in the UK, including those with less than five employees, and to the self-employed.

The continuum of exploitation that has historically defined the everyday of domestic work - exclusion from employment and social security standards and precarious migration status - has frequently been neglected. It is primarily the moments of crisis, incidents of human trafficking, slavery or forced labour, that have captured the attention of human rights law. Only recently has human rights law begun to address the structured inequalities and exclusions that define the domain of domestic work. This book addresses the specific position of domestic workers in the context of evolving human rights norms. Drawing upon a broad range of case studies, this book presents a thorough examination of key issues such as the commodification of care, the impact of the jurisprudence of the Court of Justice of the European Union and the European Court of Human Rights on 'primary care providers', as well as the effect that trends in migration law have on migrant domestic workers. This volume will be of interest to lawyers, academics and policy makers in the fields of human rights, migration, and gender studies.

It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

This document sets out the Governments proposals for a new points-based approach to managing the flow of migrants coming to the UK to work or study. Whilst it is generally agreed that migration makes a substantial contribution to economic growth, fills gaps in the labour market, and increases investment, innovation and entrepreneurship, and enriches cultural diversity, it needs to be managed. The Government proposes a five-tier framework, to help people understand how the system works and to direct applicants to the category that is most appropriate for them. The tiers are: (1) highly skilled individuals to contribute to growth and productivity; (2) skilled workers with a job offer to fill gaps in the UK labour force; (3) limited numbers of low skilled workers needed to fill specific temporary labour shortages; (4) students; (5) youth mobility and temporary workers, people allowed to work in the UK for a limited period of time to satisfy primarily non-economic objectives. For each tier applicants will need sufficient points to obtain entry clearance or leave to remain in the UK. Points will be awarded according to objective and transparent criteria, giving a structured decision-making process. Applicants in tiers 2 to 5 will need a certificate of sponsorship. The Government aims for a system that better identifies and attracts migrants who have most to offer the UK; is more efficient, transparent and objective; and that improves compliance and reduces the scope for abuse.

Talking math with your child is simple and even entertaining with this better approach to shapes! Written by a celebrated math educator, this innovative inquiry encourages critical thinking and sparks memorable mathematical conversations. Children and their parents answer the same question about each set of four shapes: "Which one doesn't belong?" There's no one right answer--the important thing is to have a reason why. Kids might describe the shapes as squished, smooshed, dented, or even goofy. But when they justify their thinking, they're talking math! Winner of the Mathical Book Prize for books that inspire children to see math all around them. "This is one shape book that will both challenge readers' thinking and encourage them to think outside the box."--Kirkus Reviews, STARRED review

When did you last read yours? For over 80 years The Highway Code has been the official guide to using the roads safely and legally. It has contributed enormously to road safety and reliable road transport.

However, every day, on average five people are killed and just over 60 people are seriously injured in road collisions. So it is as important as ever that all road users, including drivers, motorcyclists, cyclists, horse riders and pedestrians, should update their knowledge of The Highway Code. The Highway Code - for life, not just for learners.

Deep trade agreements (DTAs) cover not just trade but additional policy areas, such as international flows of investment and labor

and the protection of intellectual property rights and the environment. Their goal is integration beyond trade or deep

integration. These agreements matter for economic development. Their rules influence how countries (and hence, the people and

firms that live and operate within them) transact, invest, work, and ultimately, develop. Trade and investment regimes determine

the extent of economic integration, competition rules affect economic efficiency, intellectual property rights matter for

innovation, and environmental and labor rules contribute to environmental and social outcomes. This Handbook provides the tools

and data needed to analyze these new dimensions of integration and to assess the content and consequences of DTAs. The Handbook

and the accompanying database are the result of collaboration between experts in different policy areas from academia and other

international organizations, including the International Trade Centre (ITC), Organisation for Economic Co-operation and

Development (OECD), United Nations Conference on Trade and Development (UNCTAD), and World Trade Organization (WTO).

Some documents found on the web are missing some pages or the image quality is so poor, they are unusable. If you find a good copy, you could print it using a network printer you share with 100 other people (typically its either out of paper or toner). If it's just a 10-page document it's 250-pages, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. It's much more cost-effective to just order the book from Amazon.com This book includes original commentary which is copyright material. Note that government documents are in the public domain. The second edition updates and expands upon the standard methodology for conducting prevention effectiveness analyses.

CI/ASCE Standard 38-02 presents a credible system for classifying the quality of utility location information that is placed in design plans. The Standard addresses issues such as: how utility information can be obtained, what technologies are available to obtain that information; how that information can be conveyed to the information users; who should be responsible for typical collection and depiction tasks; what factors determine which utility quality level attribute to assign to data; and what the relative costs and benefits of the various quality levels are. Used as a reference or as part of a specification, the Standard will assist engineers, project and utility owners, and constructors in developing strategies to reduce risk by improving the reliability of information on existing subsurface utilities in a defined manner.
