

Ultimate Reptileopedia The Most Complete Reptile Reference Ever

A guide for the hobbyist covers reptile, amphibian, and invertebrate feeding, general care, breeding, and health care; offers advice on choosing appropriate housing and equipment; and includes a directory of over three hundred species.

What's the weather? Wake up to this ultimate reference, teeming with fascinating facts, amazing features, the latest science, and tons of close-up images of the wildest weather on the planet. Did you know that a bolt of lightning can crack through the air at up to 136,000 miles per hour and reach temperatures hotter than the surface of the sun? Or that if all the ice in the Antarctic melted, the oceans would rise by about 220 feet? Welcome to the amazing world of weather. From how weather happens to the most extreme weather in the world, it's all covered in this easy-to-use reference featuring all the major types of weather and what kinds of weather happen in particular places, from the desert to the tropics to the poles. The main content is highlighted with fun facts, Did You Know? details, and colorful photos and graphics. Thematic spreads cover topics such as climate change, weather survival stories, animal adaptations to weather, and much more. Fans of other National Geographic Kids Ultimate "pedias" in the same series--Dinopedia, Bugopedia, Reptileopedia, Oceanpedia, and Predatorpedia--will want to find a place for Ultimate Weatherpedia on their bookshelves.

Is your first and second favorite animal a horse? Is your bedroom covered with horse posters on your walls and horse models on your shelves? Would you rather muck out a stall than clean your room? Then you are absolutely, undeniably horse crazy, and For Horse-Crazy Girls Only is the book for you! This is the only comprehensive book about everything a horse-crazy girl needs to know about horses. You'll learn everything from the different breeds of horses, to how a horse's body works, to the quirky little things that make the horse the BEST animal ever. Author Christina Wilsdon even shares ideas for horse-themed parties, and suggestions for the best horse movies to watch with your friends. And that's just the beginning.

With 39 pet profiles that describe origins, behaviors, cage installation plans, food, maintenance, and more, this book contains all the general and fun information for a variety of easy-to-care-for animals that kids will love. Also included are the author's observations based on his very own pet collection throughout, as well as anatomical diagrams, high-quality photography, helpful illustrations, and easy-to-read informational blurbs.

Presents numerous facts about reptiles, using a series of questions and answers.

Lizards are cool. Literally. They are ectotherms, which means they can't make their own heat. That's why you see many types of lizards basking in the sun, seemingly doing nothing at all. That's the life. But make no mistake, lizards have very busy lives—looking for food and avoiding being food.

Popular science writer Sneed B. Collard III gets down and dirty with all kinds of lizards—from your average "Joe Lizard," the western fence lizard, to the impressively large Komodo dragon. In a kid-friendly narrative, Sneed explores many different kinds of lizards, their habitats, defense systems, hunting techniques, and mating rituals. He reveals the exciting life of a lizard—from rappelling from the tops of trees to the forest floor, to dropping off a tail to get away from a predator.

Lizards of the World is ultimate book on these fascinating creatures, featuring the all the different types of lizard worldwide. As survivors from the time of the dinosaurs, lizards are scaly, cold-blooded, living fossils—relics from a prehistoric world that remain alive and well in ours. Lizards exert a morbid fascination, in many mythologies they are dark creatures, symbolizing death and misfortune. From chameleons and skinks to geckos and iguanas, Lizards of the World brings these creatures firmly into the light, to reveal their extraordinary diversity Found in almost every type of terrain globally, there are almost 6,500 species of lizard, including lizards with frills, horns, or wings, those that drop their tails, and others that squirt blood from their eyes. Here, the lizard family and subfamily profiles, organized phylogenetically, are illustrated with stunning photography. Each profile includes a population distribution map, a table of essential information, and a fascinating commentary revealing notable characteristics, fresh scientific understanding, and the diversity of species. Written by world-renowned herpetologist Mark O'Shea, Lizards of the World is a magnificent showcase of the natural history and beauty of these remarkable reptiles.

This charming reference introduces young readers to the wider world by exploring languages, landscapes, weather, animals, capital cities, mountains, deserts, and other landscapes and landforms, and more. It encourages kids to get play with activities such as creating a mini-rainforest in a bottle and singing a simple song in Spanish. More than 100 colorful photos are paired with kid-friendly and age-appropriate maps along with basic facts about each continent. This book will quickly become a favorite at storytime, bedtime, or any other time.

Introduces deer, describing their physical characteristics, habitat, life cycle, feeding habits, and the conservation efforts being made to protect them.

Rad Robots, Brilliant Biomimicry, and Incredible Inventions Inspired by Nature

Discover how the natural world inspires innovation in science and technology to create the latest and greatest breakthroughs and discoveries in this exciting book. Did you know that scientists have developed a bionic tool shaped like an elephant's trunk that helps lift heavy objects? Or that the needle-like pointed beak of the kingfisher bird encouraged engineers in Japan to change the design of the Shinkansen "bullet trains" to reduce noise? Across multiple fields of study and methods of problem-solving, scientists are turning to biomimicry, or engineering inspired by biology or nature, to make all kinds of cool technological advancements. From robots that protect people and gather information to everyday inventions, like reflectors on the roads and ice-proof coatings for airplanes, to new sources of renewable energy, this book dives into the ways that nature can give us ideas on how to improve our world. Discover more than 40 examples of technology influenced by animals, learn about some of the incredible creatures who have inspired multiple creations, and meet some of the scientists and the stories behind their inventions.
