intelligence connects a leader's cognitive abilities with their emotional state. The ability for leaders to recognize the impact of their own emotions on their decision making is paramount if a leader is to make sound decisions based on the best interests of the organization. A leader must be able to read emotions in his/her peers and employees in order to be as effective as possible. Stodgily originated this notion with linkages of leader personality and control over emotions to employee perception of leader effectiveness. A Critique of Contemporary Theories

Although few might think of Moses as a 'leader' in the contemporary business and political sense, Moses is not only among the most significant leaders in Western civilization but is also arguably the quintessential example of a powerful leader from whom much can be learned by anyone entering and occupying leadership positions. Various types of leadership approaches are

Moses' example as described in the Bible is analyzed to assert why Moses' approach makes for an appropriate and compelling form of leadership today. to these stakeholder groups. Leadership is neither limited to those holding formal managerial position, nor to any particular setting. Leaders can be found everywhere, in all layers of society. Leadership is only possible, however, if one dares to perceive and define oneself as a leader.
