This publication is a guide to complying with both Federal and State firearms laws. Specifically, it assists in complying with the Gun Control Act of 1968 (GCA) requirement that you may not sell or deliver a firearm to a nonlicensee whose receipt or possession of the firearm would violate State or local laws applicable at the place of sale or delivery. It also assists in making lawful over-the-counter sales of long guns to out-of-state residents.

A new edition of a book on sales and leases of goods by two of the country's leading experts in commercial law. The book uses a problem-based approach to help students master the applicable legal rules, understand how the law applies to both simple and complex commercial transactions, and learn how to use the law in planning transactions and drafting agreements. The book consists primarily of text and carefully sequenced problems. Many of the problems ask students to apply the law to a set of facts. Others do the reverse, asking students to identify a set of facts to which a specific rule applies. The remainder prompt students to think about the policies underlying the law or how the law affects commercial behavior or do a bit of contract drafting. An extensive teacher's manual, available in both print and electronic format, contains suggestions on teaching methodology and a detailed analysis of all problems. PowerPoint slides custom designed for almost every problem are available to teachers on the web site for the book.. For more information and additional teaching materials, visit the companion site.

In a logical and persuasive manner, this class-tested casebook first provides background information about UCC Article 2 and the CISG, then addresses key issues in the order in which a lawyer is likely to encounter them in practice: Which law is applicable? Has a contract been formed? What are the terms of the contract? Has the contract been performed? If not, what are the available remedies for the injured party? Finally, the text concludes by considering third parties involved in the sales transactions and the law governing their obligations. Many problems refer students to international collections found on the Internet, and the text provides references to both unrevised and revised UCC Article 1. The Second Edition has been updated to reflect the newer version of the INCOTERMS (INCOTERMS 2010), and the Uniform Customs and Practice for Documentary Credits (UCP 600). Liquor License Holders

Official Year Book of the Commonwealth of Australia No. 13 - 1920

The Concepts and Methods of Sales, Leases, and Licenses is a new kind of learning tool for mastering the terrible Two's -- Article 2, 2A, and 2B. Comparisons are drawn between Article 2 (sales) and other bodies of law including Article 2A (leases) and Proposed Article 2B (licenses) of the Uniform Commercial Code. Interesting cases, engaging problems, and humorous anecdotes are used to illustrate and remember key concepts and methods. Rustad examines the elemental building blocks -- the concepts and methods of sales, licenses, and leases. Each chapter features interesting and fun practice problems that feature Code concepts and methods, providing and opportunity for students to test their mastery of the concepts and methods. Model answers and explanations are provided to each practice problem. The final chapter presents examples and explanations of how the concepts and methods of the Code can be used to master multiple choice and essay examinations for law school courses or the bar examination. This book provides conceptual overviews, methodologies for analysis, and focused problems and exercises to help law students through difficult commercial law assignments. "I tell my students that I cannot make the difficult easy, but I'll try to make the difficult comprehensible. Professor Rustad has done just that in his textbook." -- Bimonthly Review of Law Books, Nov/Dec 1999 "Rustad's Concepts and Methods is another exceptional example of Carolina Academic Press's new genre of accessible student editions to complex subjects." -- Bimonthly Review of Law Books, March/April 2001

"This book analyzes the full range of complex legal issues that arise from domestic and international sales, leases and licenses. The author outlines preventive law tactics and planning strategies for all important aspects of domestic and cross-border sales, leases and licenses. The concepts of international contract law are illustrated through the activities of a hypothetical import/export company. The use of the hypothetical teaches practical as well as doctrinal principles of domestic and international contract law. This book uses practical examples and explanations to compare and contrast UCC Article 2 with CISG but also places licensing and leases in a global context. The book is divided into three parts so that individual instructors may select particular subjects which they wish to cover, in the order of their choosing. Each chapter provides helpful hints, practice points and practice problems in an accessible format. This comparative commercial law book is the first to provide extensive coverage of procedural, cultural and localization issues in cross-border commerce. The book is appropriate for a course in international contract law, sales and leases, or comparative commercial law."
