Courses on Latin America in Institutions of Higher Education in the United States

Designed for Primary and Intermediate Classes

No two nations in the world are as integrated, economically and socially, as are the United States and Canada. We share geography, values and the largest unprotected border in the world. Regardless of this close friendship, our two countries are on a slow-motion collision course—with each other and with the rest of the world. While we wrestle with internal political gridlock and fiscal challenges and clash over border problems, the economies of the larger world change and flourish. Emerging economies sailed through the meltdown of 2008. The International Monetary Fund forecasts that by 2018, China's economy will be bigger than that of the United States; when combined with India, Japan and the four Asian Tigers—South Korea, Taiwan, Singapore and Hong Kong--China's economy will be bigger than that of the G8 (minus Japan). Rather than continuing on this road to mutual decline, our two nations should chart a new course. Bestselling author Diane Francis proposes a simple and obvious solution: What if the United States and Canada merged into one country? The most audacious initiative since the Louisiana Purchase would solve the biggest problems each country expects to face: the U.S.'s national security threats and declining living standards; and Canada's difficulty controlling and developing its huge land mass stemming from a lack of capital, workers, technology and military might. Merger of the Century builds both a strong political argument and a compelling business case, treating our two countries not only as sovereign entities but as merging companies. We stand on the cusp of a new world order. Together, by marshalling resources and combining efforts, Canada and America have a greater chance of succeeding. As separate nations, the future is in much greater doubt indeed.

Atlas of the United States of North America

Did 9/11 revive a North American guns-butter trade-off? Established in the largest administrative overhaul since World War II, the Department of Homeland Security w with keeping the United States safe within a wider security community, but confronted the Washington Consensus-based Western Hemisphere free trade movement, I with the North American Free Trade Agreement (NAFTA) and extending to the Central American Free Trade Agreement (CAFTA) in 2003, to materialize a Free Trade Area Americas (FTAA) compact. Whether 9/11 restrictions impeded these trade-related thrusts or not, embracing neoliberalism permitted Canada and Mexico to pursue their initiatives, such as proposing free-trade to the US—Canada in 1985, Mexico in 1990, but, as during the Cold War, security imperatives ultimately prevailed. This work in Canada's and Mexico's Department of Homeland Security responses through three bilateral studies of policy responses along comparative lines, case studies of security intelligence apparatuses in each of the three countries, and a post-9/11 trilateral assessment. Ultimately, they raise a broader and more critical North American question: regional economic integration continue to be trumped by security considerations, as during the Cold War era, and thereby elevate second-best outcomes, or rise above constraints to reassert the unquenchable post-Cold War thirst for unfettered markets replete with private enterprises, liberal policies, and full-fledged competitiveness.
