The Making of the Masters

*NEW YORK TIMES BESTSELLER Now
for the first time, Tiger Woods reflects on
his record-setting win at the 1997 Masters
-- both on and off the course. In 1997,
Tiger Woods was already among the most-
watched and closely examined athletes in
history. But it wasn't until the Masters*

Tournament that his career would definitively change forever. Woods, then only 21, won the Masters by a historic 12 shots, which remains the widest margin of victory in the tournament's history, making it an iconic moment for him and sports. Now, 20 years later, Woods is ready to explore his history with the game, how it has changed over the years, and what it was like winning such an important event. With never-before-heard stories, this book provides keen insight from one of the game's all-time greats. Praise for The 1997 Masters "Woods writes with absorbing focus and profound emotion." -Publishers Weekly "A vivid and ultimately satisfying read." -Bookpage "As vivid on the printed page as it was in person." - GolfDigest "Provides a rare perspective of golf played at the highest level." -Kirkus

Organized chronologically, starting with

Buddha and ending with contemporary seekers, this book focuses on the moment of enlightenment in the lives of saints and masters that led to their witnessing divine reality.

Master of the Senate, Book Three of The Years of Lyndon Johnson, carries Johnson's story through one of its most remarkable periods: his twelve years, from 1949 to 1960, in the United States Senate. At the heart of the book is its unprecedented revelation of how legislative power works in America, how the Senate works, and how Johnson, in his ascent to the presidency, mastered the Senate as no political leader before him had ever done. It was during these years that all Johnson's experience—from his Texas Hill Country boyhood to his passionate representation in Congress of his hardscrabble constituents to his tireless construction of a political

machine—came to fruition. Caro introduces the story with a dramatic account of the Senate itself: how Daniel Webster, Henry Clay, and John C. Calhoun had made it the center of governmental energy, the forum in which the great issues of the country were thrashed out. And how, by the time Johnson arrived, it had dwindled into a body that merely responded to executive initiatives, all but impervious to the forces of change. Caro anatomizes the genius for political strategy and tactics by which, in an institution that had made the seniority system all-powerful for a century and more, Johnson became Majority Leader after only a single term—the youngest and greatest Senate Leader in our history; how he manipulated the Senate’s hallowed rules and customs and the weaknesses and strengths of his colleagues to change the “unchangeable”

Senate from a loose confederation of sovereign senators to a whirring legislative machine under his own iron-fisted control. Caro demonstrates how Johnson's political genius enabled him to reconcile the unreconcilable: to retain the support of the southerners who controlled the Senate while earning the trust—or at least the cooperation—of the liberals, led by Paul Douglas and Hubert Humphrey, without whom he could not achieve his goal of winning the presidency. He shows the dark side of Johnson's ambition: how he proved his loyalty to the great oil barons who had financed his rise to power by ruthlessly destroying the career of the New Dealer who was in charge of regulating them, Federal Power Commission Chairman Leland Olds. And we watch him achieve the impossible: convincing southerners that although he was firmly in their camp as the anointed

successor to their leader, Richard Russell, it was essential that they allow him to make some progress toward civil rights. In a breathtaking tour de force, Caro details Johnson's amazing triumph in maneuvering to passage the first civil rights legislation since 1875. Master of the Senate, told with an abundance of rich detail that could only have come from Caro's peerless research, is both a galvanizing portrait of the man himself—the titan of Capital Hill, volcanic, mesmerizing—and a definitive and revelatory study of the workings and personal and legislative power.

Here, Tim Wu shows how a battle royale for the Internet's future is brewing, and this is one war we dare not tune out.

Drawing on her decades of activism and a wide reading of environmental, cultural, and political history, Solnit argues that radicals have a long, neglected history of transformative victories, that the positive consequences of our acts are not always immediately seen, directly knowable, or even measurable, and that pessimism and despair rest on an unwarranted confidence about what is going to happen next. But Ninette's good luck ended the day that the lead dancer sprained her ankle and Ninette was chosen to dance her part at a matinee. Her reviews had been very good—too good. Shortly thereafter, Ninette had been fired in an attempt to soothe the wounded ego of the ballet's primary soloist. Alone, unemployed, and

filled with despair, Ninette had returned to her apartment to find a thin, rangy, tabby-striped tomcat sitting on her windowsill. He seemed like just another stray, until abruptly he spoke to her, mind-to-mind.

Ninette though she was going mad, but the cat offered her an alternative to a life of destitution, albeit a very odd one. He proposed that she impersonate a renowned Russian ballerina, Nina Tchereslavsky, and go to work in a specific music

hall in Blackpool, England. The cat also told her that he would take care of her in every way—he would somehow convey the English and Russian languages to her, supply her with money, and guide her every move. With no other option open to her, she place her life in his paws. the planet. Its discoverers termed it Meteora. With it came the ability to tap into a clean, seemingly unlimited source of energy. With further study, it was found that only a few genetically gifted individuals could use this power World War III was fought between these new beings and the United Governments of the world. After fighting to a stalemate, the governments and the beings who had access to this power, now known as Homospiritus, came to an

agreement called the Accords. Code 23: By law, all children born who are capable of using Meteora will be taken for safety reasons to Gardens to learn to control their powers, and serve the greater good of the commonwealth. Which meant to become a soldier in the army of the new world order. Tenchi was four years old when they came for him. Despite the best efforts by his mother to keep him hidden and safe, he was taken by force to Juneau

Gardens, which is the home of the Homospiritus and the new governing order of the former United States of America, now named Juneau. It is a Gardens itself, one of a series of peaceful and beautiful utopian societies made up of the now free Homospiritus who, under the terms of the Accords, were allowed their independence and sovereignty. Gardens are realms, which demonstrate the height of Meteora manipulation and the coming together

of humans with Meteora to create a utopian, Shangri-La-like paradise on a level with the Garden of Eden. Now inside of Gardens, Tenchi is swept up in a world of Meteora, fighting, and war, to protect a world he does not really feel a part of. He is taken from his home, his mother, and the only family he has ever known and commissioned to fight in a war for the peace and safety of the planet. He is forced to go through rigorous training and

trials, as well as torment from other Homospiritus, when the only thing he truly cares about is getting home to his mother. And, after six years in the Gardens' Academy comes to an end, he seems to get his chance when, at the age of ten, Tenchi graduates. Now he is an apprentice, under the command of a Master Agent who guards, trains, and protects him and his two other apprentices, Ko and Suki. In the field as a second level of training, Tenchi

has a greater degree of freedom, though under the careful guidance and tutelage of Master Agent Shaun. The team members begin their journey all over the world carrying out peace missions while simultaneously improving and learning how to better use Meteora in real-life battle situations, all to prepare the young Agents to eventually go out on their own. This is vital, as it is public knowledge that the life of an apprentice is a very

short one. Tenchi is then swept up in a series of missions, both dangerous and important to the fate and the safety of the whole world. Eventually, he is sent on a mission where he encounters terrorists with nuclear arms who have also taken their own dark dive into the use of Meteora, only to corrupt it. Tenchi is given the chance to abandon his mission and continue his own, which has always been to return to his mother. But now he is faced with a choice, to

How did plays participate in shaping the identities that situated laboring subjects within the social hierarchy? In what ways did the drama engage with contemporary discourses (social, political, economic, religious, etc.) that
