***Although research on business model innovation is flourishing internationally, many important questions on the 'how', 'what', and 'when' of this process remain largely unanswered, particularly in regard to the role of top management. This book answers some of those pressing questions by taking a deliberately managerial perspective. Based on new and original findings derived from a survey among firms from various industries, and several case studies (including DSM, NXP Semiconductors,***

***Randstad, and TomTom), the authors provide new insights into how and when managers can change a firm's business model. They turn their attention particularly to one key question: is it better to replicate existing models or develop new ones? Business model renewal is regarded as being especially vital in highly competitive environments.***

***Nonetheless, whatever the environment, high levels of both replication and renewal will be key for a firm to succeed. The book looks at four levers that can be used by managers to***

***innovate their business model: management itself, organizational structure, technology, and co-creation with external parties. It discusses the individual effects of these levers on business model replication and renewal. Designing Service Processes to Unlock Value explores how service processes can be designed to leverage the expanding range of opportunities for service providers and customers to co-create value. The service process design landscape is changing, with many of the previous limitations disappearing on how and by whom services are delivered. Opportunities for new service design configurations are being supported, to a large extent, by

technology-enabled innovations; many tasks previously performed by the service provider may now be performed by either the customer or the service provider. As a result, customers are playing a more active role in the service process, not only through self-service but also by providing information to the service provider to create a more personalized service experience. *Designing Service Processes to Unlock Value* explores how service processes can be designed to leverage the expanding range of opportunities for service providers and customers to co-create value. Readers will learn about frameworks for value co-creation and models for designing all types of service processes, as well as the unique challenges of designing knowledge-intensive services. And with the growing number of alternatives for designing

service processes and determining who performs the various service tasks, service performance outcomes are increasingly dependent on the knowledge, skills, and abilities—that is, capabilities—of both service providers and customers. Thus, the book concludes with approaches to unlock these capabilities – and further boost value co-creation.

(Drum Instruction). Progressive Rock Drumming explores many of the techniques used by the founding prog drummers and shows how drummers can create their own drumset parts based on these techniques, while also demonstrating how multiple and very different drumset parts can be created for the same music.

While this book explores some advanced techniques, it also teaches the reader how to create original and inventive drumset parts without the need to play in a demanding virtuosic style. The book addresses a wide variety of progressive rock styles, including such subgenres as symphonic, classical, fusion, neo-progressive, progressive metal, Rock In Opposition (RIO), and
