Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Federal Civil Rights Enforcement Effort : a Reassessment

Christopher Shaw, the book's author said, "Through preferential postage rates for nonprofits the Postal Service facilitates civic involvement and a healthy democracy." Nader also noted, "Postal employees are fairly remunerated in an increasingly low-wage, low benefit 'Wal-Mart' economy." According to Nader, "Post offices serve as the heart of community life in neighborhoods and towns nationwide and the presence of postal workers on community streets make them safer, as the many beneficiaries of their frequently heroic efforts attest." "The lack of citizen-consumers' involvement in the recently passed postal reform legislation has highlighted the need for a public dialogue about the future of our postal system. The book provides a starting point for that conversation," stated Nader.

Gambling monkeys, dancing zombies and mountain lions on treadmills are just a few projects exposed in Wastebook 2014 – highlighting \$25 billion in Washington's worst spending of the year. Wastebook 2014 — the report Washington doesn't want you to read —reveals the 100 most outlandish government expenditures this year, costing taxpayers billions of dollars. “With no one watching over the vast bureaucracy, the problem is not just what Washington isn't doing,

but what it is doing.” Dr. Coburn said. “Only someone with too much of someone else's money and not enough accountability for how it was being spent could come up some of these projects.” “I have learned from these experiences that Washington will never change itself. But even if the politicians won't stop stupid spending, taxpayers always have the last word.” Congress actually forced federal agencies to waste billions of dollars for purely parochial, political purposes. For example, lawmakers attached a rider to a larger bill requiring NASA to build a \$350 million launch pad tower, which was mothballed as soon as it was completed because the rockets it was designed to test were scrapped years ago. Similarly, when USDA attempted to close an unneeded sheep research station costing nearly \$2 million every year to operate, politicians in the region stepped in to keep it open. Examples of wasteful spending highlighted in “Wastebook 2014” include: • Coast guard party patrols – \$100,000 • Watching grass grow – \$10,000 • State department tweets @ terrorists – \$3 million • Swedish massages for rabbits – \$387,000 • Paid vacations for bureaucrats gone wild – \$20 million • Mountain lions on a treadmill – \$856,000 • Synchronized swimming for sea monkeys – \$50,000 • Pentagon to destroy \$16 billion in unused ammunition -- \$1 billion • Scientists hope monkey gambling unlocks secrets of free will – \$171,000 • Rich and famous rent out their luxury pads tax free – \$10 million • Studying “hangry” spouses stabbing voodoo dolls – \$331,000 • Promoting U.S. culture around the globe with nose flutists – \$90 million

This publication, FDA Food Code 2017, is a model for safeguarding public health and ensuring food is unadulterated and honestly presented when offered to the consumer. It represents the Food and Drug Administration's best advice for a uniform system of provisions that address the safety and protection of food offered at retail and in food service.This model is offered for adoption by local, state, and federal governmental jurisdictions for administration by the various departments, agencies, bureaus, divisions, and other units within each jurisdiction that have been delegated compliance responsibilities for food service, retail food stores, or food vending operations. Alternatives that offer an equivalent level of public health protection to ensure that food at retail and foodservice is safe are recognized in this model.Foodborne illness in the United States is a major cause of personal distress, preventable illness and death, and avoidable economic burden. Scallan et al. estimated that foodborne diseases cause

approximately 48 million illnesses, 128,000 hospitalizations, and 3,000 deaths in the United States each year. The occurrence of approximately 1,000 reported disease outbreaks (local, regional, and national) each year highlights the challenges of preventing these infections. FDA Food Code 2017 is a publication that every food service operation should use to help prevent foodborne illness.
