The Relentless Pursuit

Updated & Enlarged New Edition

A new global history of Fordism from the Great Depression to the postwar era As the United States rose to ascendancy in the first decades of the twentieth century, observers abroad associated American economic power most directly with its burgeoning automobile industry. In the 1930s, in a bid to emulate and challenge America, engineers from across the world flocked to Detroit. Chief among them were Nazi and Soviet specialists who sought to study, copy, and sometimes steal the techniques of American automotive mass production, or Fordism. Forging Global Fordism traces how Germany and the Soviet Union embraced Fordism amid widespread economic crisis and ideological turmoil. This incisive book recovers the crucial role of activist states in global industrial transformations and reconceives the global thirties as an era of intense competitive development, providing a new genealogy of the postwar industrial order. Stefan Link uncovers the forgotten origins of Fordism in Midwestern populism, and shows how Henry Ford's antiliberal vision of society appealed to both the Soviet and Nazi regimes. He explores how they positioned themselves as America's antagonists in reaction to growing American hegemony and seismic shifts in the global economy during the interwar years, and shows how Detroit visitors like William Werner, Ferdinand Porsche, and Stepan Dybets helped spread versions of Fordism abroad and mobilize them in total war. Forging Global Fordism challenges the notion that global mass production was a product of post–World War II liberal internationalism, demonstrating how it first began in the global thirties, and how the spread of Fordism had a distinctly illiberal trajectory.

Anatomy of the Works Minis

An expert craftsmanship of sports journalism and a powerful statement about the business of sports and economy. Certain character depictions are fictitious to convey the utter seriousness of a sport's specification where the ownerships of Champcar waged a boycott against IndyCar and Indianapolis Motor Speedway (IMS). Otherwise, "oil and gas" is a tightening up of economic realities, the real people on the verge of a financial takeover and how such economies work in relation to Major Leagues Sports in historically speaking the most productive times in U.S. economy. The Heists are back and Phil Elmach driving for James Sedgwick. Only in "oil and gas," Elmach joins Jake Coote and the experts in the Sunshine State. Turbochargers made the stealthiest cars, and successively IndyCar's resolution of a sport's escalation costs. To the supercops, the top outfits in the Champcar-IndyCar merger war pose a threat in a downturn economy and the owner-teams recognize that tires aren't the only switch-ups, but teams transferring into IndyCar. In the shuffle of cash, egos, and clashes, everyone gets caught in the comic drama of staying steps ahead of a supercop. In the chase, the story distinguishes myth from the legendary figures. Miles Deere's epic battles fit the grand schemes. Ground effects sold on American March know-how was a version of Desert Storm on neighboring Area 51 and runs open wheel cars in excess of constructor rules. The Heists have nabbed the technology, or at least former American March Jake Coote as advisor-teammate to Elmach's own answers.
