Criminologists have traditionally studied criminal offending and violent victimization separately. Extant studies, however, demonstrates that criminals and victims overlap to some degree, hinting that a common underlying trait explains both criminal offending and violent victimization. This study tests whether Gottfredson and Hirschi's self-control theory explains the overlap in criminal offending and violent victimization exposure among gang members. Using cross-sectional survey data from the Evaluation of the Gang Resistance Education and Training (GREAT) Program in the United States, 1995-1999, results from the regression models show that low self-control is to some degree correlated with criminal offending and violent victimization. Gang members were more likely than non-gang members to participate in some forms of criminal activities, but they were not more likely to be victimized. When variables stemming from social learning and social bonding are included in the regression models, results show that associating with delinquent peers had the strongest effect in predicting criminal offending, contradicting Gottfredson and Hirschi's claim that self-control is the only cause of criminal behavior. In concert with previous studies that have found a link between low self-control and violent victimization, results show that youths with low self-control were somewhat more likely than youths with higher self-control to report being victimized. The results of the study, as well as avenues for future research, are discussed.

Since his first publication in 1942, Luis Leal has likely done more than any other writer or scholar to foster a critical appreciation of Mexican, Chicano, and Latin American literature and culture. This volume, bringing together a representative selection of Leal's writings from the past sixty years, is at once a wide-ranging introduction to the most influential scholar of Latino literature and a critical history of the field as it emerged and developed through the twentieth century. Instrumental in establishing Mexican literary studies in the United States, Leal's writings on the topic are especially instructive, ranging from essays on the significance of symbolism, culture, and history in early Chicano literature to studies of the more recent use of magical realism and of individual New Mexican, Tejano, and Mexican authors such as Juan Rulfo, Carlos Fuentes, José Montoya, and Mariano Azuela. Clearly and cogently written, these writings bring to bear an encyclopedic knowledge, a deep understanding of history and politics, and an unparalleled command of the aesthetics of storytelling, from folklore to theory. This collection affords readers the opportunity to consider—or reconsider—Latino literature under the deft guidance of its greatest reader.

A Low-self Control Approach to Gang Violence, Gang Membership, and Criminal Offending—violent Victimization Among Gang Members

How identity influences the economic choices we make Identity Economics provides an important and compelling new way to understand human behavior, revealing how our identities—and not just economic incentives—influence our decisions. In 1995, economist Rachel Kranton wrote future Nobel Prize-winner George Akerlof a letter insisting that his most recent paper was wrong. Identity, she argued, was the missing element that would help to explain why people—facing the same economic circumstances—would make different choices. This was the beginning and who we want to be may shape our economic lives more than any other factor, affecting how hard we work, and how we learn, spend, and save. Identity economics is a new way to understand people's decisions—at work, at school, and at home. With it, we can better appreciate why incentives like stock options work or don't; why some schools succeed and others don't; why some cities and towns don't invest in their futures—and much, much more. Identity Economics bridges a critical gap in the social sciences. It brings identity and norms to economics; they learn, spend, and save. Thus people's identity—their conception of who they are, and of who they choose to be—may be the most important factor affecting their economic lives. And the limits placed by society on people's identity can also be crucial determinants of their economic well-being.

Are you looking for a great gift to celebrate your love of tacos and other Mexican food? Or better yet, a way to write your experiences, thoughts, and tastes during Cinco De Mayo? This book is a medieval historical novel about two royal brothers, the elder who would be king, suffers from guilt and regret that destroy his life and his kingdom. The younger prince is obedient and focused on what is beneficial for the kingdom, yet an inner burden steals his true joy for life. Through unimaginable events, the reader is taken on a journey of epic dimensions of joy and hardships.

Paleta Man continues to sell ice cream to the neighborhood kids and to secretly fight crime throughout the city whenever there is trouble. One day he is approached by a direct descendant of the Ancient Aztec tribe who informs him that his gold medallion holds a secret that has been kept by many generations of Aztec descendants. He must then travel to the great pyramid in Mexico in search of the well-kept secret and to try to unlock the mystery of how and why he was transformed into a Superhero with Aztec powers.
