This book is a comprehensive guide to psychiatry for undergraduate medical students. Beginning with an introduction to the field, the next chapters discuss biological sciences, psychosocial sciences, and classification and evaluation. The following sections cover the diagnosis and treatment of numerous psychiatric disorders, including schizophrenia, depression, bipolar and other mood disorders, OCD, sleep disorders, eating disorders, and many more. All sectors of the population are covered, from children and adolescents, to geriatrics, and a complete chapter is dedicated to culture bound syndromes (a combination of psychiatric and somatic symptoms that are considered to be a recognisable disease only within a specific society or culture). The book concludes with discussion on psychopharmacology and psychotherapies, legal and ethical issues, community and preventive psychiatry, and the history

guidance of eminent researchers from various reputed organizations. The focus of this volume is on technologies that help develop and improve society, in particular on issues such as advanced and sustainable technologies for manufacturing processes, environment, livelihood, rural employment, agriculture, energy, transport, sanitation, water, education. This conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region. On the other hand,

onwards for students of class 11. A new feature - Typical Illustrative Examples and Typical Problems, has been added in some chapters for those students who want to attempt some more challenging problems. The entire matter in the book is given in a logical sequence so as to develop and strengthen the concepts of the students. We live in an era of nation-states. Nationhood is predicated on shared sense of past and a common purpose of future. More than nation-state, India is a civilization, a complete civilization. To keep this civilization fresh and vibrant, winds from all directions are imperative for its nourishment. But, winds cannot be allowed to build into destructive storms, that threaten to

uproot the civilization, the very basis of nationhood. Jihadism and Maoism are the two main destructive storms. Fueling these storms are India's enemies as well as the forces of proselytization. They have to be crushed both at ideological and physical levels. We have been squeamish in dealing with the problems because of the misplaced notion that all ideologies are basically benign and beneficial, they are not. 73 years of our post-independence experience is testimony. This misplaced notion has caused at least a lakh lives in Kashmir alone, resulting in ethnic cleansing of Hindus from the Valley by the jihadists. Sardar Patel did crush the communist revolt in Telangana, but in the following years due to
