A beautifully written insight into the stresses, strains and successes of working for the London Ambulance service. On Monday 30 April 2007, five men were convicted of terrorist offences relating to a plot to detonate a fertiliser bomb in the UK in 2004. The arrests were the result of a police and MI5 operation codenamed CREVICE. Following the trial, the media reported that, at the time MI5 had been investigating CREVICE, the bomb plotters had been in contact with two unidentified men now known to be Mohammed Siddique Kahn and Shazad Tanweer, two of the

four men who, on 7 July 2005, detonated bombs on the London transport system, killing 52 people and injuring several hundred others. This report investigates why MI5, knowing of Khan and Tanweer, did not prevent the 2005 bombings. Part A examines what happened in Operation CREVICE and subsequently. Part B describes when MI5 came across some of the 7/7 bombers and the questions these events raise. Part C of the report considers the wider picture and lessons to be learnt. The CREVICE conspirators made over 4,000 telephone-based contacts and met many people. Throughout 2004 and 2005 these were being investigated by MI5 as they pursued other plots and unearthed still more people of interest on the sidelines of each plot. Although Khan and Tanweer were amongst those of interest, though

still unidentified, they were never put under surveillance as, based on what was known about them at the time, they did not merit resources being diverted to them (as opposed to other individuals known to be involved in attack planning). The Committee cannot criticise the judgments made by MI5 and the police based on the information they had and their priorities at the time. An update to the report outlines the reason for the delay in publication pending completion of other legal proceedings and gives further evidence uncovered recently.

new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added

government policymakers in America, Japan, and elsewhere. Drawing on rich historical materials from both sides of the Pacific, including corporate records and government documents never before made public, Mason examines the development of both Japanese policy towards foreign investment and the strategic responses of American corporations. This history is related in part through original case studies of Coca-Cola, Dow Chemical, Ford, General Motors, International Business Machines, Motorola, Otis Elevator, Texas Instruments, Western Electric, and Victor Talking Machine. The book seeks to

explain why s little foreign direct investment has entered modern Japan. In contrast to the widely held view that emphasizes an alleged lack of effort on the part of foreign corporations, this study finds that Japanese restrictions merit greater attention. Many analysts of the modern Japanese political economy identify the Japanese government as the key actor in initiating such restrictions. Mason finds that the influence of Japanese business has often proved more potent than these analysts suggest. This book offers fresh insights into both the operation of the modern Japanese
