In this book, Eric Danfield reveals the simplicity of the Christian faith, and brings you to a crossroad of change. Choose to Trust is not just a book to be read, it's a choice to be lived out. It's time to step out of the crowd and become one of the few.

In this little book you will learn the names of men, women and children who occupied the lowest rung in colonial society. As slaves, they tilled the soil, split the wood, cooked the food and, in some cases, fought in our wars.

Ask Dr. Mueller captures the glamour and grittiness of Cookie Mueller's life and times. Here are previously unpublished stories - wacky as they are enlightening - along with favorites from Walking Through Clear Water in a Pool Painted Black and other publications. Also the best of Cookie's art columns from Details magazine, and the funniest of her advice columns from the East Village Eye, on everything from homeopathic medicine to how to cut your cocaine with a healthy substance. This collection is as much an autobiography as it is a map of downtown New York in the early '80s - that moment before Bright Lights, Big City, before the art world exploded, before New York changed into a yuppie metropolis, while it still had a glimmer of bohemian life.

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In A House To Remember, she explains why.

Alan Spillett is recognised as one of Britain's foremost painters of trucking scenes with over 700 commissions to date. He portrays lorries from the 1960s, '70s and '80s, when he was a long-distance driver, as well as more recent trucks. His paintings are set in exact locations, capturing to the full the experiences of so many drivers. A Volvo easing its way along a Scottish lochside on a summer's day or an ERF setting out on a wet early morning from a factory in Kent - these are strongly evocative images. The paintings are accompanied by full captions

describing the context of the pictures. There are longer features on aspects of trucking and truckers, photographs and miscellanea adding up to a fulfilling read. His images range widely through England, Wales, Scotland and Ireland. Alan's first book, Roadscapes, was published in 2005. The paintings in Roadscapes II have not been published in book form before and many have been prepared specially for this new book. The Range Conservationist Passbook (R) prepares you for your test by allowing you to take practice exams in the subjects you need to study.

If you wish to strengthen your intuition and perception of the Otherworld, then this is the deck for you. Descriptions, meanings, and keywords are explored. There are also channeled oracle messages received from the beings on the cards.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's

invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and O (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
