The Birth of NASA--The Diary of T. Keith Glennan tells the story of the critical formative months of the new agency. The Introduction describes the background of T. Keith Glennan, the first NASA Administrator. After the Introduction, the book continues with Glennan's recollections of NASA from his appointment until the end of 1959. The 13 chapters are written in a diary format covering month-by-months his activities until he left the position in 1961. A Postscript, written in 1963, gives his views on the space program after he

left office. A Biographical Appendix gives short sketches of about 400 individuals active in the space program during this period. Throughout the diary numerous explanatory footnotes by the editor clarify events and provide references for further details. Although Glennan's stay at NASA was short, his contributions are most significant, as he built the organization that would send men to the moon and serve the nation to the present time. defenses in the same context. Chapters are organized around specific components and tasks, providing theoretical background that prepares network defenders for the always-changing tools and techniques of intruders. Part I introduces programming, protocol, and attack concepts. Part II addresses subject areas (protocols, services, technologies, etc.) that may be vulnerable. Part III details consolidation activities that hackers may use following penetration.

Looks at the operations of the International Space Station from the perspective of the Houston flight control team, under the leadership of NASA's flight directors, who authored the book. The book provides insight into the vast amount of time and energy that these teams devote to the development, planning and integration of a mission before it is executed. The passion and attention to detail of the flight control team members, who are always ready to step up when things do not go well, is a hallmark of NASA human spaceflight operations. This text aims to develop vocabulary skills by teaching students three basic strategies: dictionary skills, context clues, and word elements, all within an approach that links students' general knowledge to vocabulary and helps students see that vocabulary is relevant to their lives. Unifying themes for each chapter are central to the author's approach, as are the carefully paced lessons and exercise sequences. The text includes readings on subjects from across the disciplines and supplies information that is of use to students in their other or future coursework.

A number of widely used contemporary processors have instruction-set extensions for improved performance in multi-media applications. The aim is to allow operations to proceed on multiple pixels each clock cycle. Such instruction-sets have been incorporated both in specialist DSPchips such as the Texas C62xx (Texas Instruments, 1998) and in general purpose CPU chips like the Intel IA32 (Intel, 2000) or the AMD K6 (Advanced Micro Devices, 1999). These instruction-set extensions are typically based on the Single Instruction-stream Multiple Data-stream (SIMD) model in which a single

instruction causes the same mathematical operation to be carried out on several operands, or pairs of operands, at the same time. The level of parallelism supported ranges from two floating point operations, at a time on the AMD K6 architecture to 16 byte operations at a time on the Intel P4 architecture. Whereas processor architectures are moving towards greater levels of parallelism, the most widely used programming languages such as C, Java and Delphi are structured around a model of computation in which operations takeplace on a single value at a time. This was appropriate when processors worked this way, but has become an impediment to programmers seeking to make use of the performance offered by multi-media instruction -sets. The

Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. Linux® is being adopted by an increasing number of embedded systems developers, who have been won over by its sophisticated scheduling and networking, its cost-free license, its open development model, and the support offered by rich and powerful programming tools. While there is a great deal of hype surrounding the use of Linux in embedded systems, there is not a lot of practical information.

Building Embedded Linux Systems is the first in-depth, hard-core guide to putting together an embedded system based on the Linux kernel. This indispensable book features arcane and previously undocumented procedures for:

Mankind with three possibilities: World War, Revolution or an Educational Solution. Herein, lies The Philosophy of Capitalism. This is a a wide-ranging 730-page account of traditional Sudanese medicine. I was born in the Sudan of Sudanese Muslim parents in Al-Dueim, on the west bank of the White Nile, central Sudan. I spent my early years in this town, and I went to school there. Since then, I have visited many towns and villages throughout the country. My mother tongue is Arabic, the main language of the country. I had a typical Sudanese childhood. I shared the daily life and activities of the people. My basic norms and values, I dare say, are those of the communities I describe in this book. At the age of four, I joined the

khalwa (Quranic School), learned rudimentary Arabic, and memorized the first short chapters of the Holy Book. While I was there, I gained my first insight into the inner circle of religious healers, and at an early age, I saw the maseed (colloquial for mosque) and the Sufi followers. Many families in the Sudan have their patron saints that they consult or invoke in times of stress and need. Al-Mikashfi Abu-Umar of Shikanieba village, central Sudan, is the patron shaikh of our clan. At the age of five, my parents took me to his shrine, half a day's journey from my hometown. There, I saw the local asylum, for the first time, and was excited to see the mentally ill inmates under treatment. I had my first haircut there. My parents, with other

worshippers, paid homage to the holy man. An impressive scene remained deeply engraved in my memory. During my childhood, I suffered every summer from attacks of epistaxis; I bled through the left nostril. Hospital treatment did not help. One morning my father decided to try his friend shaikh Awad Rahama, a laundry man in the market place, who was known as a traditional healer as well. He was particularly noted for his effective recipes for nose bleeding. The shaikh welcomed us and asked me to sit. He washed my forehead with water, and on it wrote some Quranic verses in copying pencil. He then gave me a hijab (amulet) to wear. That was the last time I ever had epistaxis! During my early life, I wore a variety of amulets. Some

were to combat the evil eye, some to ensure success at school, while others were hafidhas (protectors). Some were paper hijabs, and others were mihaya (erasure of holy verse) that I had to drink or bakhra to burn and fumigate myself with. Several types of treatment and healing séances are vivid in my memory. For example, I saw the bonesetter in action. There was one in every neighbourhood in every village or town. Many were notably skilful and experienced. They used no painkillers while setting a broken bone or manipulating a sprained joint, because they knew none, and, hence, had to work dexterously. I remember Al-faki Al-Zubair and Al-faki Hamoda, the two notable religious healers in our neighbourhood. They also led the

congregation prayers, taught the Quran, and stood as masters of ceremonies in weddings. I joined the Quranic School of the first, and had many amulets and bakhras from the second. The therapeutic musical extravaganza of the zar is a popular feature in northern Sudan. The zar is an exclusively women's congregation in which lavish musical ceremonies are performed. Several times, I escaped my parents' notice, and sometimes-even school, to sneak into one of the zar houses. I found the ceremonies fascinating, and still remember them vividly, and with pleasure. The rhythm of the zar music and the heavy fragrances that escape from the ceremony houses are unforgettable. Many Muslim Sudanese towns have

religious Sufi fraternities called turuq Sufiyya (Sufi orders). In these turuq, people perform zikr, remembrance chants in praise of the Prophet Muhammad and Sufi saints. The ceremonies range from the highly rhythmic type of the Qadiriyya order, to the quiet melodies of the Burhamiyya. We joined the zikr circles whenever there was a ceremony in the neighbourhood; we danced, chanted, and always waited for that dervish who would dance himself into a trance.
