Sonic Persuasion: Reading Sound in the Recorded Age critically analyzes a range of sounds on vocal and musical recordings, on the radio, in film, and in cartoons to show how sounds are used to persuade in subtle ways. Greg Goodale explains how and to what effect sounds can be "read" like an aural text, demonstrating this method by examining important audio cues such as

dialect, pausing, and accent in presidential recordings at the turn of the twentieth century. Goodale also shows how clocks, locomotives, and machinery are utilized in film and literature to represent frustration and anxiety about modernity, and how race and other forms of identity came to be represented by sound during the interwar period. In highlighting common sounds of industry and war in popular media, *Sonic Persuasion* also

Where do design principles come from? Are they abstract "rules" established by professionals or do they have roots in human experience? And if we encounter these visual phenomena in our everyday lives, how do designers use them to attract our attention, orient our behavior, and create compelling and memorable communication that stands out among the thousands of messages we confront each day? Today's work in visual communication design shifts emphasis from simply designing objects to

In response, Meredith Davis and Jamer Hunt provide a new slant on design basics from the perspective of audiences and users. Explanatory illustrations and professional design examples support definitions of visual concepts and discussions of context. *Work* spans print, screen,

Originally published in 1981, *Learning and Visual Communication* is about how to use visual communication in education. It offers visual forms of communication. In order to do this it draws on recent research - at the time of publication - in psychology, philosophy, semiotics, cultural analysis, education and media studies. Visual thinking, the key concept of the book, is defined in psychological and philosophical terms. It is placed in its cultural context and it is argued that it has not received the attention that it

Because of the implicit nature of visual argumentation and the relative lack of social accountability which images enjoy in comparison with words, pictures can be used to make advertising claims that would be unacceptable if spelled out verbally.

Taking this as a starting point, Paul Messaris analyzes a variety of commercial, political and social issue advertisements. He also discusses the role of images in cross-cultural advertising.
