

# Vivere 120 Anni Le Verit Che Nessuno Vuol Raccontarti

**De Spectaculis**, also known as **On the Spectacles** or **The Shows**, is a surviving moral and ascetic treatise by Tertullian. Written somewhere between 197-202, the work looks at the moral legitimacy and consequences of Christians attending the circus, theatre, or amphitheatre.

Sharp-witted and sharp-tongued, Arcangela Tarabotti (1604-52) yearned to be formally educated and enjoy an independent life in Venetian literary circles. But instead, at sixteen, her father forced her into a Benedictine convent. To protest her confinement, Tarabotti composed polemical works exposing the many injustices perpetrated against women of her day. **Paternal Tyranny**, the first of these works, is a fiery but carefully argued manifesto against the oppression of women by the Venetian patriarchy. Denouncing key misogynist texts of the era, Tarabotti shows how despicable it was for Venice, a republic that prided itself on its political liberties, to deprive its women of rights accorded even to foreigners. She accuses parents of treating convents as dumping grounds for disabled, illegitimate, or otherwise unwanted daughters. Finally, through compelling feminist readings of the Bible and other religious works, Tarabotti demonstrates that women are clearly men's equals in God's eyes. An avenging angel who dared to speak out for the rights of women nearly four centuries ago, Arcangela Tarabotti can now finally be heard.

The Plastics Paradox

*The Plastics Paradox is the first and only book to reveal the truth*

*about plastics and the environment. Based on over 400 scientific*

*articles, it dispels the myths that the public believe today. We are told*

## Online Library Vivere 120 Anni Le Verit Che Nessuno Vuole Raccontarti

*that plastics are not green when in fact, they are usually the greenest choice according to lifecycle analysis (LCA) We are told that plastics create a waste problem when they are proven to dramatically reduce waste, for example replacing 1lb of plastic requires 3-4lb of the replacement material We are told that plastics take 1000 years to degrade when in fact a plastic bag disintegrates in just one year outdoors We are led to believe that plastic bags and straws are an issue when in fact they barely register in the statistics The list goes on... Everything you believe now is untrue and we are making policies that harm the environment based on bad information. After reading The Plastics Paradox you will be able to make wise choices that help create a brighter future for us and for our children.*

Extracts from Calvin's commentaries topically arranged. This text presents readings of six of the most important theoretical works of Nicholas of Cusa (1401-1463). Though Nicholas's writings have long been studied as either scholastic Aristotelian or proto-Kantian, Miller locates Cusanus squarely in the Christian Neoplatonic tradition. He demonstrates how Nicholas worked on his own original synthesis of that tradition by fashioning a conjectural view of main categories of Christian thought: God, the universe, Jesus Christ and human beings. Each reading reveals how Nicholas's project of learned ignorance is played out in striking metaphors for God and the relation of God to creation. The six works read span the last quarter of Nicholas's life (1440-1463) and include *On Learned Ignorance*, *Conjectures*, *The Layman - About Mind*, *The Vision of God*, *The Not Other* and *The Hunt of Wisdom*. These readings are explications of the text; they interpret each work as a whole and focus in particular on the themes that order the work and how these get played out in its details.

The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante's encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch's and Boccaccio's heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity.

Marilyn Aronberg Lavin has taught the history of art at Washington University, the University of Maryland, Yale, Princeton, and Università di Roma, La Sapienza. Specializing in Italian 13th-16th century painting, she is internationally known for her books and articles on Piero della Francesca. Her other books include *The Place of Narrative: Mural Painting in Italian Churches, 1300-1600 AD.* , and *Seventeenth-Century Barberini Documents and Inventories of Art* , both of which were recipients of international prizes for distinguished scholarship. She is one of the leaders in the use of computers and digitized imagery for research, teaching, and publication in the history of art. This book offers a series of case studies intended to introduce and define an important class of fifteenth-century Italian art not previously recognized. It is argued that the paintings and sculptures discussed were created privately by artists for personal satisfaction and internal needs, outside the traditional framework of patronage and commercial gain. Since there is no direct documentation from this period of a work being privately made, the selection presented here is necessarily speculative. Instead, the essays focus on works by Piero della Francesca, Mantegna, Michelangelo, Bellini, and Titian that appear in the artists' testaments, letters of refusals to sell, and inventories showing ownership at the time of death. The task at hand is to uncover the motivation and

## Online Library Vivere 120 Anni Le Verit Che Nessuno Vuole Raccontarti

meaning of works of art in which the medieval craftsman began to rise to the status of independent artist, and the maker and the viewer confront each other face to face for the first time.

In *Latin Alive*, Joseph Solodow tells the story of how Latin developed into modern French, Spanish, and Italian, and deeply affected English as well. Offering a gripping narrative of language change, Solodow charts Latin's course from classical times to the modern era, with focus on the first millennium of the Common Era. Though the Romance languages evolved directly from Latin, Solodow shows how every important feature of Latin's evolution is also reflected in English. His story includes scores of intriguing etymologies, along with many concrete examples of texts, studies, scholars, anecdotes, and historical events; observations on language; and more. Written with crystalline clarity, this

*Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer and movement, the authors analyze the development and differentiation of European secular and religious drama, within the*

*disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of circulation and net structures in Drama Studies.*

*Steps forward in mathematics often reverberate in other scientific disciplines, and give rise to innovative conceptual developments or find surprising technological applications. This volume brings to the forefront some of the proponents of the mathematics of the twentieth century, who have put at our disposal new and powerful instruments for investigating the reality around us. The portraits present people who*

*have impressive charisma and wide-ranging cultural interests, who are passionate about defending the importance of their own research, are sensitive to beauty, and attentive to the social and political problems of their times. What we have sought to document is mathematics' central position in the culture of our day. Space has been made not only for the great mathematicians but also for literary texts, including contributions by two apparent interlopers, Robert Musil and Raymond Queneau, for whom mathematical concepts represented a valuable tool for resolving the struggle between 'soul and precision.'*

Inspired by Marcelo Dascal's theory of controversies, this volume includes studies in the theory of controversies, studies of the history of controversy forms and their evolution, and case-studies of particular historical and current controversies. The purpose of this volume is to identify a taxonomy of controversies and also to sense a line of development for the phenomenon of controversies itself. At the same time, we want to ask ourselves about the impact and the spread of controversies in the contemporary world, eminently intended as a heuristic element facilitating knowledge. For all these reasons, the fundamental aim of the volume is to provide the reader with a selection of current theoretical and practical perspectives on controversies, and to offer a broad picture of the complex range of definitions, meanings and practices connected to them.

The focus of this volume is on the aesthetics, semantics and function of materials in Roman antiquity between the 2nd century B.C. and the 2nd century A.D. It includes contributions on both architectural spaces (and their material design) and objects - types of 'artefacts' that differ greatly in the way they were

used, perceived and loaded with cultural significance. With respect to architecture, the analysis of material aesthetics leads to a new understanding of the performance, imitation and transformation of surfaces, including the social meaning of such strategies. In the case of objects, surface treatments are equally important. However, object form (a specific design category), which can enter into tension with materiality, comes into particular focus. Only when materials are shaped do their various qualities emerge, and these qualities are, to a greater or lesser extent, transferred to objects. With a focus primarily on Roman Italy, the papers in this volume underscore the importance of material design and highlight the awareness of this matter in the ancient world.

Modern seismology has faced new challenges in the study of earthquakes and their physical characteristics. This volume is dedicated to the use of new approaches and presents a state-of-the-art in historical seismology.

Selected historical and recent earthquakes are chosen to document and constrain related seismic parameters using updated methodologies in the macroseismic analysis, field observations of damage distribution and tectonic effects, and modelling of seismic waveforms.
