Renowned for his sportsmanship, his keen sense of humour and debunking wit, John Sprinzel is a natural communicator. As well as recounting John's own illustrious motorsport career this book also details the development and competition history of the Sebring Sprite.

Flow-based optimization of products and devices is an immature field compared to the corresponding topology optimization based on solid mechanics. However, it is an essential part of component development with both internal and/or external flow. The aim of this book is two-fold: (i) to provide state-of-the-art examples of flow-based optimization and (ii) to present a review of topology optimization for fluid-based problems.
