insurance, and much more. The author also focuses on policies that affect issues as racism, sexism, gay rights, and immigration. In addition, a wealth of updated instructor and student supplements give this text its celebrated

advantage as a leader in the social welfare policy textbook market. This book stands out from others because it does more than describe the major social welfare policies and programs. The book also tackles the conflict and controversies

surrounding these programs. Social policy is not presented as solutions to social problems. Social policy is portrayed as public conflict over the nature and causes of social welfare problems, over what, if anything, should be done about them,

Why is the internet so broken, and what could ever possibly

fix it? In Internet for the People, leading tech writer Ben Tarnoff offers an answer. The internet is broken, he argues, because it is owned by private firms and run for profit.

Google annihilates your privacy and Facebook amplifies

Guide

propaganda because it is profitable to do so. But the internet wasn't always like this—it had to be remade for the purposes of profit maximization, through a years-long process of privatization that

Acces PDF We
The People 8th
Edition Study
Guide

turned a small
research network
into a powerhouse of
global capitalism.
Tarnoff tells the
story of the
privatization that
made the modern
internet, and which
set in motion the
crises that consume
it today. The

Acces PDF We
The People 8th
Edition Study
Guide

solution to those
crises is

straightforward:
deprivatize the
internet.

Deprivatization aims
at creating an
internet where
people, and not
profit, rule. It calls
for shrinking the
space of the market

and diminishing the power of the profit motive. It calls for abolishing the walled gardens of Google, Facebook, and the other giants that dominate our digital lives and developing publicly and cooperatively owned alternatives

that encode real democratic control. To build a better internet, we need to change how it is owned and organized. Not with an eye towards making markets work better, but towards making them less dominant.

Not in order to
create a more
competitive or more
rule-bound version
of privatization, but
to overturn it.
Otherwise, a small
number of
executives and
investors will
continue to make
choices on

everyone's behalf,
and these choices
will remain tightly
bound by the
demands of the
market. It's time to
demand an internet
by, and for, the
people now.
