Planning Policy Framework introduced by the government is creating the incentives for local councils to increase available land for construction. There are early signs that this change in the planning system is contributing to the recovery in housing construction. Targeted macroprudential policies could address financial stability risks stemming from the housing market. Although mortgage credit as a share of gross domestic product has been declining in the current housing recovery, there are signs that there is a build-up of financial risks: loan-to-income ratios are increasing in London and among first time buyers.

The author brings linguistic theories, methods and ways of understanding and thinking about language to a study of the overt and covert homophobic discourses of three non-Anglophone populist movements, and grounds the interpretation of such practices in observable data. In doing so the book encourages us all to reconsider the power we give language in our activism and scholarship, as well as in our private lives.

defined contribution (DC) schemes. It is, therefore, important to ensure that these schemes deliver the best possible value for money. The impact of the charges levied on people's pensions savings over their lifetime can be significant - seemingly small variations in charges can result in a considerable difference in people's final retirement savings. A number of voluntary industry initiatives seeking to improve disclosure of charges information to scheme members and employers have been launched in an effort to reduce the complexity of the product. The Government welcomes these initiatives, but is interested in views on whether further action is required. There are a number of potential options: mandating disclosure to members by widening the disclosure requirements, to include information about charges;

standardising disclosure to employers; or disclosure of transaction costs - require disclosure to members, employers, as well as trustees, and independent governance committees (as recommended by the OFT). The Government is also interested in hearing views on whether: a cap on pension scheme charges should be introduced; differential charging between active and deferred members should be banned in DC qualifying schemes; the ban on consultancy charges should be extended from AE schemes to all qualifying DC schemes; adviser commissions set up prior to the introduction of the Retail Distribution Review should be banned in qualifying schemes

This volume explores new directions of governance and public policy arising both from interpretive political science and those

who engage with interpretive ideas. It conceives governance as the various policies and outcomes emerging from the increasing salience of neoclassical and institutional economics or, neoliberalism and new institutionalisms. In doing so, it suggests that that the British state consists of a vast array of meaningful actions that may coalesce into contingent, shifting, and contestable practices. Based on original fieldwork, it examines the myriad ways in which local actors - civil servants, mid-level public managers, and street level bureaucrats - have interpreted elite policy narratives and thus forged practices of governance on the ground. This book will be of key interest to scholars, students and practitioners of governance and public policy. As the Internet has matured in technology and reach, we have

Although a hat may be designed for the purpose of practicality or aesthetics, it is part of a complex interplay of wider cultural meanings. century to the present day, this book explores their significance as markers of social and cultural change. Taking a thematic approach, Clair Hughes charts how headgear during the modern era has been shaped by status, gender and necessity. Using case studies such as the bowler hat, which has moved up and down classes and professions, Hughes reveals that although a hat might seem bound to its status and context, it is as susceptible to subversion and reinvention as the society which creates it. From the transition of pilots' helmets from practical headgear to fashion items, to the

Drawing from material and historical research as well as depictions in art, literature and film, Hughes provides a fascinating insight into hats as a visible performance of social values and culture.

EXECUTIVE SUMMARY Recent data show a gradual economic recovery, with growth projected to reach just over 1 percent in 2014/15. Inflation has trended down to about 8 percent. The program is on track. Jamaica's four-year, SDR 615.38 million (225 percent of quota) Extended Arrangement under the EFF was approved by the IMF Executive Board on May 1, 2013, and the first four reviews under the program were completed on schedule. All end- June 2014 quantitative performance criteria were met. The structural benchmarks for end- June were also met. Based on the strong performance to date and the

authorities' updated policy intentions and commitments, staff recommends completion of the fifth review under the extended arrangement. Focus of the review. Discussions centered on the preparations for the 2015/16 budget and financial sector reforms. The program has been updated, with steps to support the ambitious fiscal goals by strengthening tax administration, enhancing public financial management, and containing the civil service wage bill. Further steps have been articulated to move ahead the reform of the securities dealers sector and to strengthen the financial system more broadly. Progress in implementing the authorities' program is steadily

advancing with every successful review, but risks to the program remain relatively high. A delayed growth recovery could undermine social support for the reform efforts, financial sector vulnerabilities could become more pressing, or risks to external financing (including from PetroCaribe) could crystallize. A further challenge will be to keep the budget on track in the face of risks to revenues and the wage bill.

Since the beginnings of independence, a number of African nations have been plagued by repeated coup d'états. Within the African Union (AU), there has been a concerted effort to break this cycle through the official adoption of an 'anti-coup norm', by which the AU is mandated to suspend a member state and restore constitutional order following a coup. Supporters of the stance see it as strengthening democracy in Africa, while critics argue that it has served to prop up existing

regimes. But there has been little analysis of what the AU's attempts to 'restore constitutional order' have meant for individual African states. In this book, Antonia Witt looks at the legacy of the AU's intervention in Madagascar following the 2009 'Malagasy crisis', one of the increasingly relevant yet under-researched cases of non-Western intervention in Africa. The book looks at the ways in which international intervention reconfigured the political order in Madagascar, how it facilitated the power struggle within the Madagascan elite and prevented more profound political change. It also considers what the example set by the Madagasc

La finance est en crise ; mais elle est indispensable à la vie des hommes en société. Cependant, il serait abusif de considérer "la finance" comme un tout homogène. En effet, loin de la finance conventionnelle qui fait la une de l'actualité, il existe une finance dite alternative qui tente de placer et de maintenir l'Homme au centre de son projet et à l'horizon de son ambition. Cet ouvrage, premier du genre, se propose de présenter sous forme d'études réalisées par des spécialistes du droit financier, les manifestations de cette finance alternative, les outils, instruments et techniques juridiques qui existent et qui permettent de concilier finance et humanisme. A timely and fascinating account of the revolution going on in the world of finance from the acclaimed author of Double Entry. This is the story of a twenty-first-century revolution being led by the most unlikely of rebels: accountants. Only the

Online Library What Will March 2014 Caps Paper Of Business Studies Concist

second revolution in accounting since double-entry bookkeeping began, it is of seismic proportions, driven by the 2008 financial crash and our ongoing environmental crisis. The changes it will wreak are profound and far-reaching and not only will transform the way the world does business but also will alter the nature of capitalism. While the wealth of nations and corporations has been vital to the global economy, increasingly the world is coming to realize that such endless growth is limited by the earth's resources and comes at a huge price to the planet and to human well-being. It simply cannot be sustained. This revolution demands that we go beyond merely accounting for traditional financial and industrial capital and take account of the benefits and detriments to the natural world and society. It urges us to

Online Library What Will March 2014 Caps Paper Of Business Studies Concist

include four new categories of wealth: intellectual (such as intellectual property), human (skills, productivity, and health), social and relationship (shared norms and values), and natural (environment). Making them part of our financial statements and GDP figures may be the only way to address the many calamities we face. Just two years ago this revolution seemed idealistic and unlikely. Today it is quickly unfolding. In 2012, the sea-change year, two key initiatives took root: an international movement to transform how corporate accounting is calculated and the rise of incorporating the effects on the environment to the accounting of national and global economies. Six Capitals tells the story of this coming new age in capitalism, evaluating its promise and the disaster that lies ahead if it is not implemented.

This makes it necessary to prepare the functioning of our systems for the occurrence of a terrorist attack so that they will operate quickly and effectively even in this type of crisis. Central Government departmental expenditure limits will be reduced by 1.1 billion in 2013-14 and by 1.2 billion in 2014-15, with the funds used to support housing. Schools and health budgets will remain unchanged; and public sector pay awards will be limited to an average of 1%. Budget 2013 is fiscally neutral - action to promote growth includes: (i) a reduction in corporation tax by 1% in April 2015; (ii) a 2000 employment allowance

In this report the Treasury Committee makes recommendations on pensions, savings, HMRC debt recovery powers and housing. The greater flexibility and choice provided by the proposed pension reforms is welcomed. The 'guidance guarantee' is an important part of making sure that consumers benefit from increased choice. ensure its effectiveness. The pensions reforms are also likely to lead to financial innovation. Following the financial crisis, and the mis-selling scandals, the reputation of the industry is under scrutiny. With regard to savings - double taxation has long been a deterrent to some forms of saving. With the enhanced flexibility for those saving there may now be scope in the long term for bringing the tax treatment of savings and pensions together to create a 'single savings' vehicle. The proposal to grant the power to HMRC to take money directly from people's bank accounts is

extremely concerning. Exceptional powers such as this require prior independent oversight. With regard to housing, the Help to Buy scheme, at least in the short-to-medium term, could raise house prices. There is also the risk that withdrawal of Help to Buy may have a distorting effect on the housing market. The need to address these difficulties places a particular responsibility on the FPC, as well as the Government, for detecting and addressing the financial stability risks arising from the housing market. There are also reservations about any extension of retrospection in the tax system.

financial regulatory policies in India. The New Consensus Macroeconomics (NCM), which established itself in the 1980s as mainstream macroeconomics, essentially represents an “uneasy truce” between two dominant schools of economic thought viz. New Classical and Neo-Keynesian economics. The NCM sets the tone for much of the macroeconomic (especially monetary) policy followed by the advanced economies in the period of the Great Moderation (1990-2005). The recent global crisis has posed a major challenge to the NCM as empirical models based on the NCM failed to anticipate the occurrence of the crisis and later

its extent and severity. The above considerations constitute the underpinnings of this book, which addresses the theoretical controversies within a general context and their policy implications for India. The authors' analysis leads to a somewhat critical assessment of the financial sector policies followed in India since the initiation of reforms in 1991. This makes the book a valuable resource not only for researchers working in this area, but also for policy makers.

There is a growing body of work on white farmers in Zimbabwe. Yet the role played by white women - so-called 'farmers' wives' - on

commercial farms has been almost completely ignored, if not forgotten. For all the public role and overt power ascribed to white male farmers, their wives played an equally important, although often more subtle, role in power and labour relations on white commercial farms. This 'soft power' took the form of maternalistic welfare initiatives such as clinics, schools, orphan programmes and women's clubs, mostly overseen by a 'farmer's wife'. Before and after Zimbabwe's 1980 independence these played an important role in attracting and keeping farm labourers, and governing their behaviour. After independence they also became crucial to the

way white farmers justified their continued ownership of most of Zimbabwe's prime farmland. This book provides the first comprehensive analysis of the role that farm welfare initiatives played in Zimbabwe's agrarian history. Having assessed what implications such endeavours had for the position and well-being of farmworkers before the onset of 'fast-track' land reform in the year 2000, Hartnack examines in vivid ethnographic detail the impact that the farm seizures had on the lives of farmworkers and the welfare programmes which had previously attempted to improve their lot.

On May 16, 2014, Narendra Modi was declared the winner of the largest democratic election ever conducted in human history. But how did this impoverished chai wallah, who sold tea on trains as a boy, rise to become Prime Minister of India? Political parties in the West pride themselves on the sophistication of their election strategies, but they all have a lot to learn from this election. Modi's campaign was a master class in modern electioneering. His team created an election machine that broke new ground in the use of social media, the Internet, mobile phones, and digital technologies. Modi took part in thousands of public events, but in

such a vast country it was impossible to visit every town and village in person. How did he do it? Via "virtual Modi"-a life-sized 3D hologram-beamed to parts of the vast nation he could not reach in person. These pioneering techniques brought millions of young people-the holy grail of election strategists everywhere-to ballot boxes. Under Narendra Modi's leadership the Bharatiya Janata Party (BJP) won a crushing victory in the 2014 general election leaving the Congress Party of the Gandhi political dynasty in disarray. For the first time in the history of India, an opposition leader swept to power with an overall majority. Former BBC correspondent

With complete freedom to tell the story as he found it, Price details Modi's rise to power, the extraordinary election victory, and its aftermath. The book examines Modi's rise, his unprecedented mass appeal despite the controversies surrounding him (including the West shunning him), and the pivotal role he will now play on the international stage.
